

CLAMPING SYSTEM BALUSTRADES

ion

■ GLASS FOR LIFE

Ion Glass bespoke 'clamp plate' balustrades offer a frameless result with the fixing details fully concealed behind a pressed metal or timber fascia.

This an ideal choice if wood detailing is required, especially useful on staircases. Clamped balustrades can be installed in commercial or residential properties, church or heritage buildings.

- Frameless design with fixings concealed behind a timber or pressed metal fascia
- Mild or stainless steel plates are bolted to the side of the staircase stringer or void edge
- Suitable for internal or external installations
- Install with or without a handrail
- Handrails can be produced in a choice of metal or timber finishes
- Straight or curved glass panels (or a combination)
- Each installation is wholly bespoke

Ion Glass bespoke balustrades can be specified in a choice of fixings and finishes including:

- Clear float glass
- Low iron extra clear glass
- Sandblasted glass for an opaque or decorative finish
- Tinted or coloured glass
- Digitally printed glass with full colour imagery
- Fully bespoke metalwork is produced or commissioned by Ion Glass

We offer individual, location specific advice on the appropriate metalwork, fixing methods, glass size and glass specification to achieve the optimum, fully compliant result.

Unrivalled Service

All projects are surveyed to confirm the design, layout, initial measurements and templated as required. All our installations are carried out by fully trained and experienced Ion Glass technicians, managing logistics and lifting procedures throughout the process. Ion Glass guarantees that all our glass balustrade installations are BS6180:2011 compliant.
