

BESPOKE STRUCTURAL GLASS

ion

GLASS FOR LIFE

Ion Glass fully bespoke glass projects frequently push the boundaries of what can be achieved in structural glass, introducing new techniques and solutions to create beautiful, unusual and functional results.

Take your more unusual glass designs from concept to construction. Impressive installations in commercial, heritage, public and domestic environments.

- Impressive and unusual glass stairways
- Curved balustrades on spiral staircases
- Install a stunning and unusual glass entrance
- Frameless glass extensions or a bespoke glass structure
- An internal or external glass bridge
- Statement interior design features, glass walls or waterfalls
- Bespoke wall cladding, worktops and splashbacks
- Glass shelving or secure displays
- Incorporate bespoke structural glass fins or beams
- Individual, bespoke metalwork and fixings
- No height or size restrictions
- Compliance assured with all relevant building and conservation regulations
- Interior or exterior installations

Subject to individual requirements and compliance Ion Glass bespoke installations can be specified in a choice of glass finishes, sizes and metalwork options including:

- Clear float glass
- Low iron extra clear or tinted glass
- Sandblasted glass for an opaque or decorative finish
- Coloured or custom backpainted glass
- Digitally printed or custom laminated glass
- Single or double glazing
- Include LED lighting for a spectacular result
- Bespoke metal frames individually commissioned or manufactured by Ion Glass.
- All visible metalwork can be specified in polished or brushed stainless steel; powder coated mild steel finishes available.

Commission design expertise from our technical team to take your glass structure from concept to construction – we can provide individual, location specific structural advice on the appropriate fixing methods, framework, glass size, glass specification and overall design result.

Unrivalled Service

All projects are surveyed to confirm the design, layout, initial measurements and to check and discuss building abutments with templates produced as required. All installations are carried out by fully trained Ion Glass technicians, managing logistics and lifting procedures as required.

To discuss your project with our team of experts contact Ion Glass today. Please note, non-standard projects might be subject to non-standard T&C's.
