■ GLASS FOR LIFE

Rooflights provide a structural glass solution to increase the flow of light into a property, opening up internal spaces and basements, creating weatherproof atriums or linking two buildings.

Our wholly bespoke service offers maximum flexibility to create a wide range of rooflights to meet your individual requirements. Suitable for commercial or residential properties, church or heritage buildings.

- Add light and space to an existing roof
- Open up internal spaces with a glass rooflight
- Let light flow into basement or below ground developments
- Install walk on rooflights with a non-slip surface
- Link two separate buildings with glass roof panels
- Minimal framing for a contemporary and flush-mounted result with no upstand required
- Individual, bespoke metalwork and fixings
- Circular or non-standard shapes available
- Fully compliant with all relevant building and conservation regulations

Subject to individual requirements and compliance Ion Glass bespoke rooflights can be specified in a choice of glass finishes, sizes and metalwork options including:

- Clear float or low iron extra clear glass
- Sandblasted or patterned sandblast for an opaque or non-slip finish
- Single or double glazing
- Tinted glass
- Thermal control or switchable glass options available
- Include LED lighting for a spectacular result
- Single panels of glass or a series of linked panels to meet your specific dimensions
- Bespoke metal rooflight frames individually commissioned or manufactured by Ion Glass.
- All visible metalwork can be specified in polished or brushed stainless steel
- Powder coated mild steel finishes available.

We offer individual, location specific advice on the appropriate framework, fixing methods, glass size and glass specification to ensure compliance.

Unrivalled Service

All projects are surveyed and templated as required to confirm the design, layout, initial measurements and discuss building abutments. All our installations are carried out by fully trained and experienced Ion Glass technicians, managing all logistics and lifting requirements. Ion Glass guarantees that all our rooflight installations are checked for correct loading, including wind and snow loading requirements.

To discuss your project with our team of experts contact us by phone or email.
