

# POST AND RAIL BALUSTRADES

ion

GLASS FOR LIFE

Ion Glass post and rail balustrades are ideal for high traffic areas such as schools, shopping malls and commercial spaces. The handrail is an integral element of the design with non-structural glass infill panels fixed to the metalwork. Appropriate for internal and external locations they are an effective and often a more economical solution.

- Suitable for internal or external installations
- Choose standard round, square or bespoke posts
- Satin or polished stainless steel metalwork
- Customise your design with a powder coated surface in your choice of colour or finish

**Ion Glass bespoke balustrades can be specified in a choice of fixings and finishes including:**

- Clear float glass
- Low iron extra clear glass
- Sandblasted glass for an opaque or decorative finish
- Tinted or coloured glass
- Digitally printed glass with full colour imagery

We offer individual, location specific advice on the appropriate metalwork, glass size and glass specification to meet your requirements and ensure your installation is fully compliant.

**Unrivalled Service**

All projects are surveyed to confirm the design, layout, initial measurements and templated as required. All our installations are carried out by fully trained and experienced Ion Glass technicians, managing lifting procedures and logistics at all stages. Ion Glass guarantees that all our glass balustrade installations are BS6180:2011 compliant.
