

Astralux 6000

internal and external louvre blind systems

CI/SfB	(76.7)	X
--------	--------	---

DESCRIPTION

The Astralux 6000 internal and external louvre system is a very adaptable solar shading system for all types of vertical, sloping and angled glazing.

This solar shading system consists of aluminium rack arms onto which either aluminium or timber slats are securely held. The slats can then be adjusted to attenuate the light entering the space. Operation is typically by electric motor but gearbox operation is available for systems fitted at low level. The Astralux 6000 system can be fitted internally or externally to the glazing.

The Astralux 6000 internal and external louvre system is available in a range different slat finishes:

Internal:

- 50mm wide aluminium slats
- 50mm basswood timber slats

Internal & External:

- 80mm roll-formed aluminium slats
- 88mm interlocking extruded aluminium slats

CONTROL OPTIONS

- Gearbox operation with fixed or removable (to prevent unauthorised use) handle
- Special motorised operating system for gallery applications
- Motorised 240V systems with hard wired or radio controlled operation or links to virtually any control system

PRODUCT OPTIONS

- Fixed position louvres for permanent shading
- Powder coating of hardware to specific RAL/BS colours
- Shaped blinds
- Slats can be cut around obstructions
