SAFE CLEAN TREND A LUMINESCENT SAFETY MAT COMBINATION WITH TACTILE GUIDANCE SYSTEM

We developed the Safe Clean Trend safety mat to complement integrated safety systems in public buildings. Thanks to white safety strips that sharply contrast to the remaining components, this entrance matting system is also particularly visible, for visually impaired persons. This is especially important since entrance mats have superior anti-slip features, compared to the surrounding flooring.

The Safe Clean TREND system shows its full strength in the event of sudden light failure: Special pigments in the safety strips collect luminous energy and provide a constant source of light. The mat remains visible even in complete darkness. Entrances, exits, and escape doors are much easier to locate thanks to the luminescent features of Safe Clean TREND. Other safety features, such as luminescent escape route signs and floor guidance strips, are thus complemented in an optimal way.

Tactile system combinations: Tactile floor indicators are important aids for handicapped or visually impaired persons. The luminescent safety strips of the Safe Clean TREND mat can easily be combined with our tactile guidance system. Orientation aids that address several human senses provide additional safety in entrance areas. The Safe Clean TREND system has received the 2017 ICONIC AWARD: Interior Innovation – Best of Best.

Please contact us if you are planning to install a safety system in your entrance area. We will gladly advise you.

Tactile Guidance System Safe Clean TREND

-  Tactile / visual guidance system
-  Accessible
-  For use indoors or in covered outdoor areas
-  For outdoor use
-  Recyclable
-  Rust-proof

All profiles feature highly effective impact sound insulation!

Visual and tactile guidance systems integrated into the mats assist blind persons and people with impaired vision to find their way indoor the building. The guidance system is available in any width and may be used with any profile. Combining various profiles is possible. All colours for ribbed carpet and cassette brushes are available when using a tactile guidance system.

VISUAL AND TACTILE GUIDANCE SYSTEMS FOR ENTRANCE AREAS

In public buildings in particular, visual guidance and orientation systems in entrance areas are essential. For visually impaired persons, however, additional tactile systems are necessary for orientation. We have developed a safety concept using floor indicators to allow visually impaired persons to find their way inside the building.

Customized, accessible solutions on the basis of Top Clean aluminium profile mats with integrated guidance strips are available. We apply profile inlays with various structures and colours to facilitate orientation. Contrasting installation patterns support the guidance concept. The tactile orientation aids can be easily identified with a white cane. The system addresses various human senses, providing increased safety.

Compatible with any Profile

The design of our guidance system, according to DIN 18040-1 for accessible development, may be adapted individually to architectural concepts. The system is compatible with any profile in the comprehensive Top Clean programme by us. A range of variants with ribbed carpet, scraper bars and brush cassettes is available in numerous colours and various profile heights. In addition, we provide powder-coated aluminium profiles in RAL colours.

Tailor-Made Solutions for Indoor and Outdoor Zones

The Top Clean programme comprises solutions for indoor and outdoor zones with normal and heavy pedestrian traffic – tailor-made and in any size. Special shapes with gaps, diagonal or circular cutting are available upon your request. Continuous, sound-absorbing rubber profiles on the underside prevent footfall noise effectively.

Tactile Guidance System Top Clean TREND®

-  Tactile / visual guidance system
