CREATE THE PERFECT WETROOM

Step 1

This step is a build up of four key elements (A, B, C, D) as a 'Build Your Code' structure. This creates a complete floor former and drainage order code.

Each of the above have different options and therefore a different Product Code which need to be noted down. These are then put together to give you Step 1's Order Code.

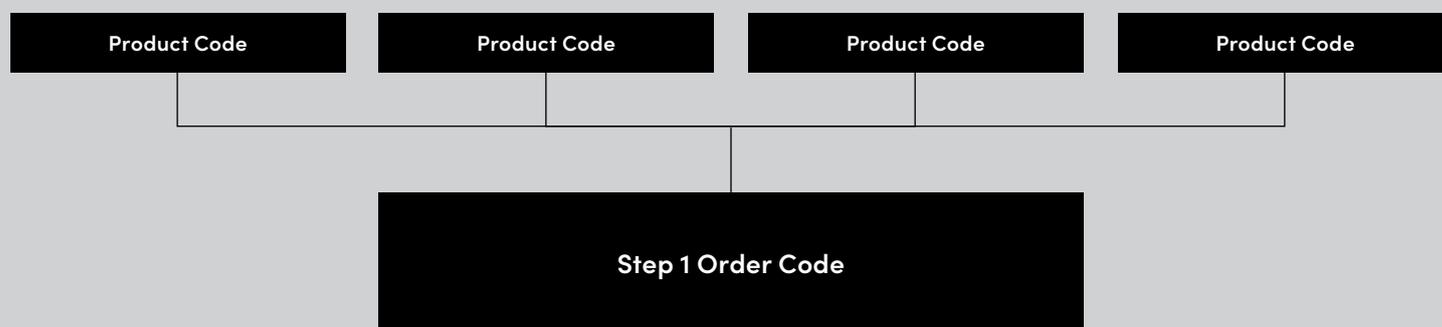

Identify the look that is desired within the room. Things to consider are the cuts for the tiles as well as the space available for the floor former.

Choose the size of the floor former to go within the showering area.

This will depend on the wetroom space and the situation it is being placed into.

A variety of drain top designs and drain inserts are available to create the perfect look.

Combine all four Product Codes to give you Step 1's Order Code.

Step 2

Add WaterGuard waterproofing for the room.

Step 3

Choose Aqua-Mat underfloor heating and thermostat.

Step 4

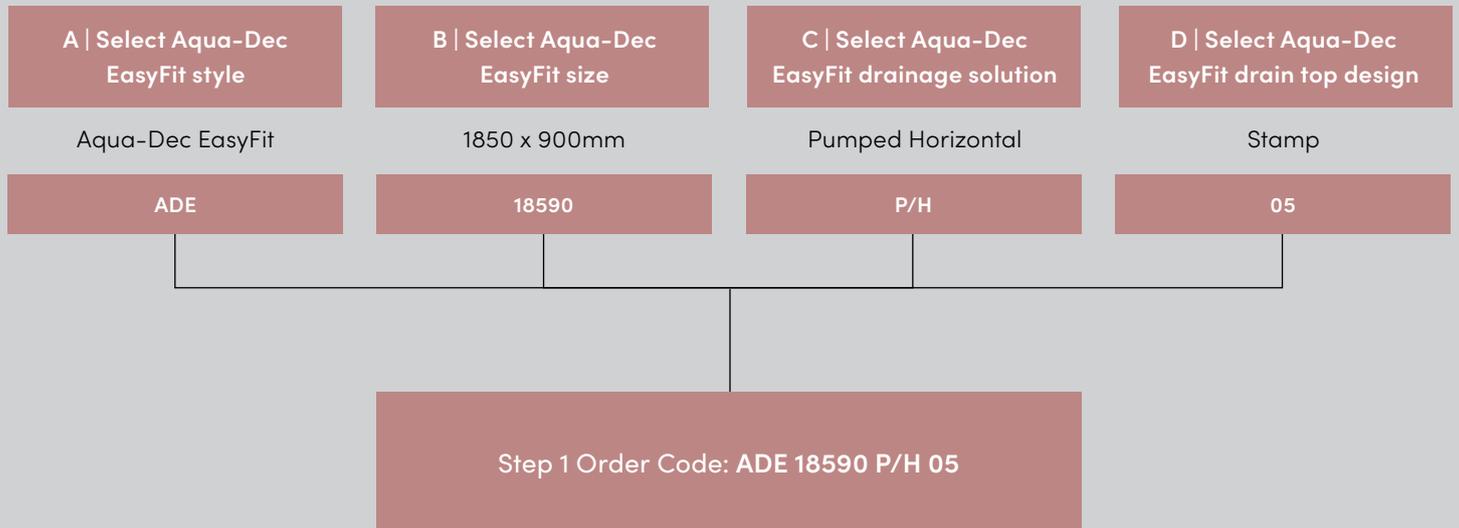

Personalise the space with Soho wetroom screens and doors, shower waste pumps and Geesa accessories.

STEP 1 EXAMPLES

Aqua-Dec Linear

Aqua-Dec EasyFit

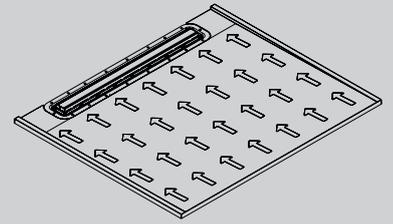

FLOOR FORMER OVERVIEW

Aqua-Dec Linear 1™ - see page 12

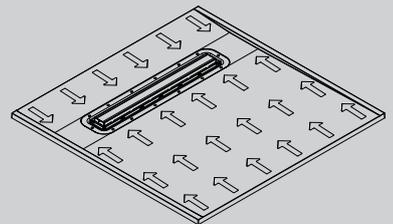

- 1 gradient leading to the drain
- No diagonal tile cuts
- 800mm linear drain tops
- Ideal for corner or open installations
- Linear drain 50mm from the wall
- 3 sizes available
- Not trimmable
- 22mm thick
- Made in the UK
- Designed and manufactured in the UK

Aqua-Dec Linear 2™ - see page 13

- 2 gradients leading to the drain
- No diagonal tile cuts
- 600mm linear drain top
- Ideal for alcove installations
- Linear drain 244mm from the wall
- Off-set waste position, with 2 sump locations
- Not trimmable
- 22mm thick
- Made in the UK
- Designed and manufactured in the UK

Aqua-Dec Linear 3™ - see page 14

- 3 gradients leading to the drain
- 2 diagonal tile cuts
- 800mm linear drain top
- Ideal for walk-through installations
- Linear drain 50mm from the wall
- Off-set waste position, with 2 sump locations
- Trimmable
- 22mm thick
- Made in the UK
- Designed and manufactured in the UK

Aqua-Dec Linear 4™ - see page 15

AQUA-DEC LINEAR™ FLOOR FORMER INNOVATION

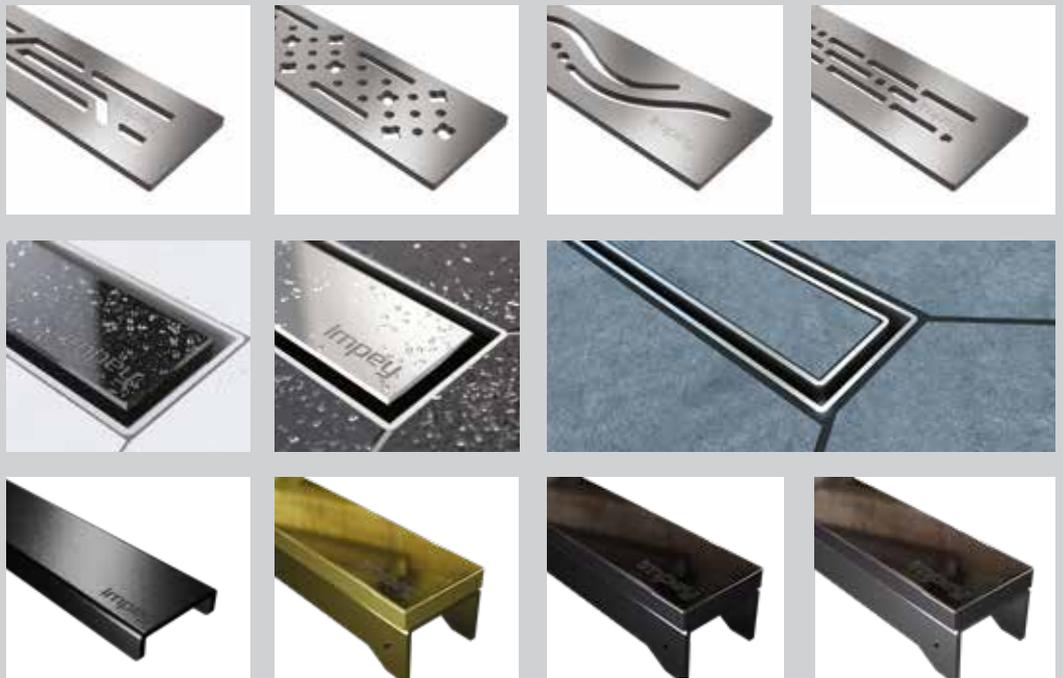

Designed with choice in mind, the Aqua-Dec Linear floor former range helps to achieve the desired look of each unique tiled wetroom, with four design variations and ranging in size from 900 x 900mm to 2000 x 1200mm.

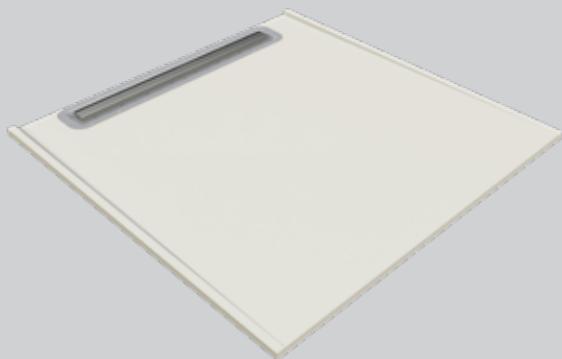

The Aqua-Dec Linear range features an elegant linear drain top in either a 600mm or an 800mm length depending on the size of the floor former.

The drain outlet is offset allowing the drain to be rotated 180° at installation, providing two placement options. The outlet is also fully rotatable allowing 360° waste positioning to avoid any potential obstacles such as joists and pipework.

The Aqua-Dec Linear range comes with a variety of drain top options.

NEW

Aqua-Dec Linear 1

With having a single fall for the water to drain, the Aqua-Dec Linear 1 wetroom floor former brings the modern look to your bathroom. Sleek design and functionality, requiring the minimal amount of grout lines and tile cuts. Integrating your showering area into your bathroom floor seamlessly. The Aqua-Dec Linear 1 is 22mm thick and can be installed on timber or concrete floors, providing flow rates of 40l/min.

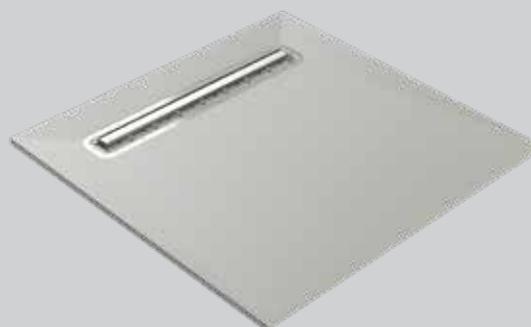

Aqua-Dec Linear 2

The construction of the Aqua-Dec Linear 2 wetroom floor former means there is no need to mitre the tiles in the corners. High-quality stainless steel inserts are available to finish the tile edges, which can be either flush to a wall or covered with a wetroom glass panel (not included with 1400 x 900mm). The Aqua-Dec Linear 2 is 22mm thick and can be installed on timber or concrete floors, providing flow rates of 40l/min.

Aqua-Dec Linear 3

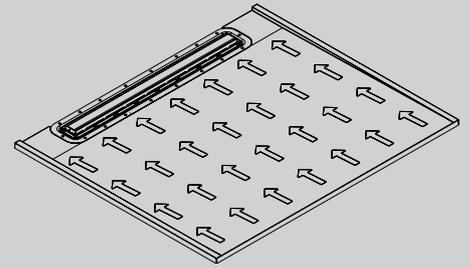

Unlike the Aqua-Dec Linear 1, 2 and 4, the Aqua-Dec Linear 3 can be cut to length within 75mm each side of the drain edge to assist with alcove spaces. Ideal for a minimal 'barely there' look with a compatible walk-through screen. The Aqua-Dec Linear 3 is 22mm thick and can be installed on timber or concrete floors, providing flow rates of 40l/min.

Aqua-Dec Linear 4

The style of the floor former, with 4 gradients leading down to the drain, draws your eye to the Linear Drain Top and provides a real statement. The broad range of sizes, 2 drainage widths of 600mm and 800mm and balanced design makes this the most versatile Linear floor former. The Aqua-Dec Linear 4 is 22mm thick and can be installed on timber or concrete floors, providing flow rates of 40l/min.

A | SELECT YOUR STYLE AQUA-DEC LINEAR 1™

- Universal (not handed) floor former
- 1 gradient leading to the drain
- No diagonal tile cuts
- 800mm linear drain top with various designs available

C | SELECT YOUR AQUA-DEC LINEAR DRAINAGE SOLUTION

Drainage solutions for various wetroom spaces and scenarios are provided. In some situations, a certain drain type will be required due to the setting it is being placed in.

For Aqua-Dec Linear 1, 2, 3 and 4 there are two Gravity Drain options available, either horizontal outlet or vertical outlet. Both of these variations come with a choice of Drain Top designs and finishes which add a touch of individual style to the wetroom.

Gravity Drain

The Gravity Drain is the most popular drain type to be used. Compatible with the Aqua-Dec Linear range within existing floor structure or easily incorporated into a new build.

- Specifically designed clamp to secure WaterGuard membrane, for a secure watertight seal at the drainage point. This membrane clamp has been created to also work as a cutter guide for WaterGuard.
- Patented height adjustment technology, allowing for tile height and underfloor heating. This technology allows adjustment between 6 - 26mm depending on drain top. Please note, there is a fixed height of 13mm and 24mm for some designs.
- Flow rate for Aqua-Dec Linear range is 35 - 40l/min, minimum. Tested in accordance with BS 274-1 and 2:2002 (depending on chosen drain top).
- Specially designed hook and removable bucket included for easy cleaning.
- The Gravity Drain has been designed to include a 50mm water seal to prevent odours escaping from the drainage system and feature a 43mm solvent weld pipe connection.
- 43mm Vertical Outlet, can also be connected into a 110mm Vertical waste.
- Tested in accordance to EN 1253.
- Vertical outlet is 27mm off centre to assist with alignment to existing pipework.

Complete the system with WaterGuard™ to receive our Lifetime Watertight Guarantee

AQUA-DEC EASYFIT™ AWARD-WINNING DESIGN

Winner of the 2019 Build-It Awards, the Aqua-Dec EasyFit features a large central patented 360° rotating drain plate to help circumnavigate all potential floor joists and under-floor obstructions.

Patented innovation that delivers unrivalled installation benefits.

The Aqua-Dec EasyFit floor former is an extremely strong 22mm thick SMC floorboard replacement with four pre-formed drainage gradients to provide a level-access wetroom floor suitable for tiling and vinyl flooring.

**The Aqua-Dec EasyFit
is designed and made
in the UK**

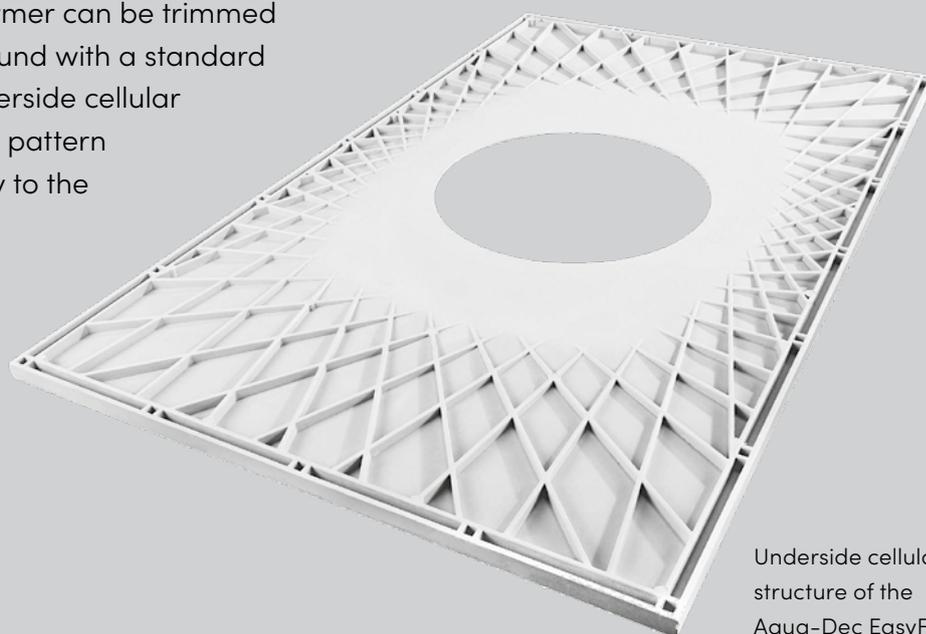

Lifetime Watertight Guarantee

Install our WaterGuard™ system with any Aqua-Dec floor former and receive our Lifetime Watertight Guarantee.

The Aqua-Dec EasyFit floor former can be trimmed anywhere up to the solid surround with a standard handsaw and features an underside cellular structure. The underside spoke pattern also provides increased rigidity to the structure of the floor former.

Aqua-Dec EasyFit is available in a range of sizes from a compact 800mm square to the most spacious 1850 x 900mm option.

Underside cellular structure of the Aqua-Dec EasyFit

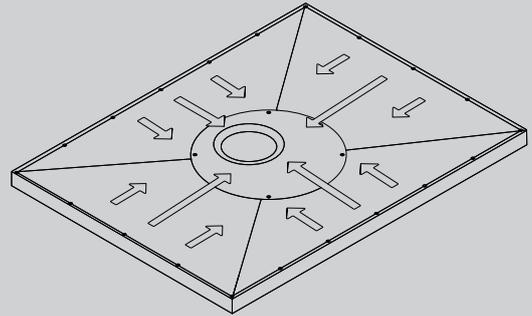

Suitable for both wooden and concrete floor installation. The Aqua-Dec EasyFit can be fitted on either floor type as the floor former is the same depth as most floorboards and the spoke structure provides the perfect surface to bond with wet concrete.

Build It Awards 2019
Best Drainage or Plumbing Product

Aqua-Dec EasyFit and product design are trademarked. Aqua-Dec EasyFit remains the intellectual property of Impey.

A | SELECT YOUR STYLE AQUA-DEC EASYFIT™

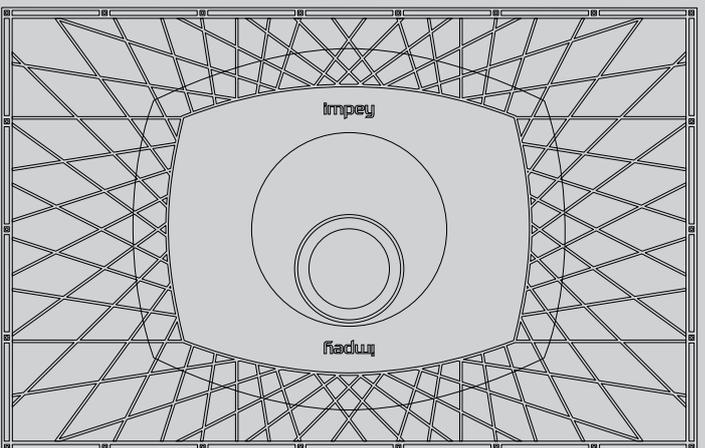

- Universal (not handed) floor former
- 4 gradients leading to the drain
- 4 diagonal tile cuts
- Portfolio of drain top designs
- The most versatile floor former, suited to all showering situations
- Variety of drainage options available
- Patented 360° rotating drain plate circumnavigates any underfloor obstructions
- Trimable up to the solid surround
- 22mm thick, same depth as standard floor board
- Made in the UK
- Lightweight and strong material, tested up to 300kg
- No need for underboarding
- Suitable for timber or concrete floors
- Flow rates of up to 36l/min, tested in accordance with BS 274-1 and 2:2002

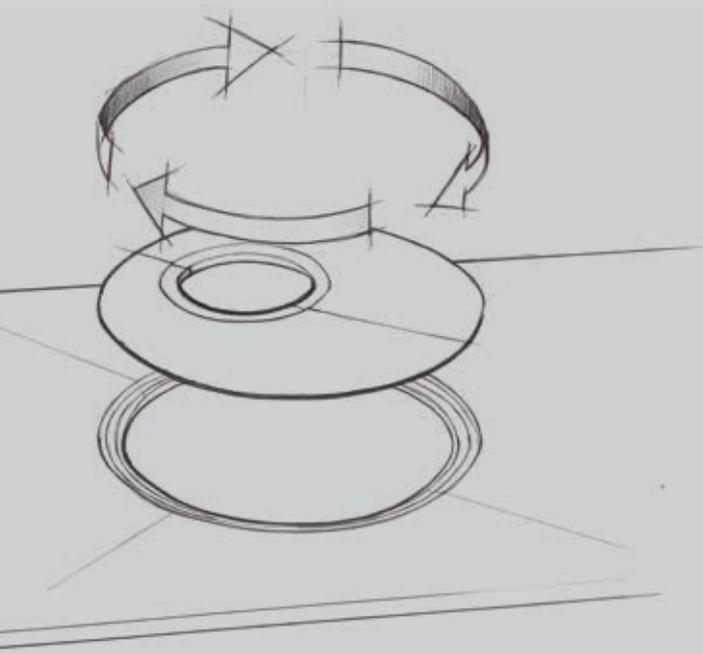

Product Code: ADE

The Aqua-Dec EasyFit features a large central 360° rotating drain plate to help circumnavigate all potential floor joists and underfloor obstructions.

The spoked structure underside increases strength and provides the ideal surface for bonding to concrete.

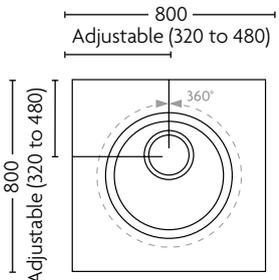

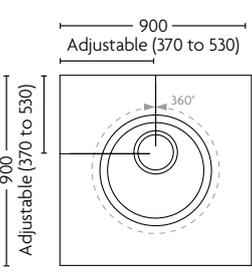

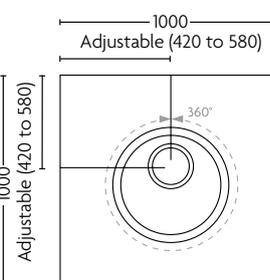

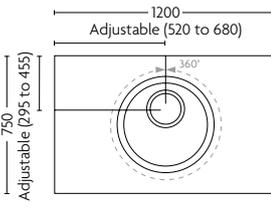

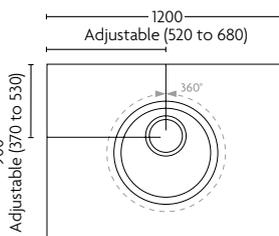

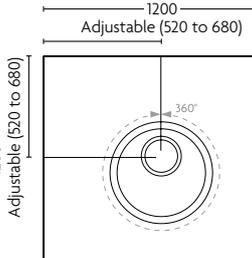

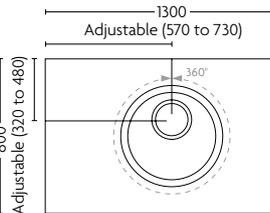

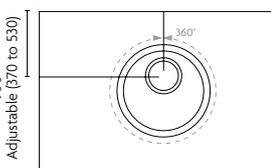

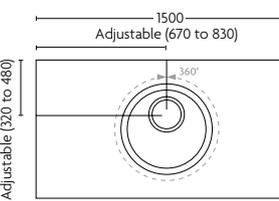

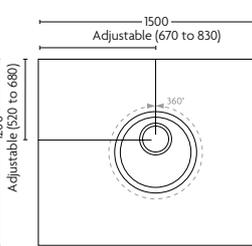

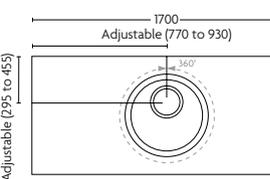

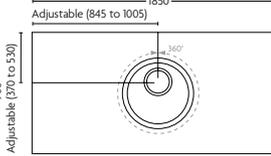

The Aqua-Dec EasyFit can be installed into both wooden and concrete floor as the floor former is the same depth as most floorboards and the spoke structure provides the perfect surface to bond with wet concrete.

Patented innovation that delivers unrivalled installation benefits.

Gravity Drain

The Gravity Drain is the most popular drain type to be used. Compatible with all Aqua-Dec floor formers within your existing floor structure or easily incorporated into a new build.

- Specifically designed to secure WaterGuard membrane into place using a clamp, guaranteeing a secure watertight seal at the drainage point.
- The patented height adjustment technology allows adaptability between 6–26mm to suit various tile depths. Height adjustment for Tiled Insert, Paragon and Allure collection are between 14–24mm.
- The Gravity Drain for Aqua-Dec EasyFit has a flow rate of 36l/min depending on the drain top.
- The 50mm water seal of the Gravity Drain prevents odours escaping from the drainage system and features a 43mm solvent weld pipe connection.
- Specially designed hook and removable bucket included for easy cleaning.

Slim+ Drain

The Slim+ Drain is designed for when the floor structure below is restricted in depth.

- Specifically designed to secure WaterGuard membrane into place using a clamp, guaranteeing a secure watertight seal at the drainage point.
- The patented height adjustment technology allows adaptability between 6–26mm to suit various tile depths.
- The Slim+ Drain has a potential flow rate of up to 32 l/min.
- Specially designed hook and hair trap included which is easy to remove and clean without affecting the membrane.

Pumped Drain

The Pumped Drain is the ideal solution for unbreachable floors as it evades any limitations that a floor structure may bring.

- Specifically designed to secure WaterGuard membrane into place using a clamp, guaranteeing a secure watertight seal at the drainage point.
- The patented height adjustment technology allows adaptability between 6–26mm to suit various tile depths.
- The Pumped Drain must be used with a shower waste pump to discharge showering water in areas gravity drainage is not an option, and is fully compatible with Whale pumps.
- The Pumped Drain flow rate is dependent on your chosen shower waste pump; 12l/min (Instant Match Premium) and 20l/min (Dry Deck 20).
- Specially designed hook included for easy cleaning.

2 | SELECT YOUR WATERGUARD™ COVERAGE

WaterGuard is a 1mm thick, flexible waterproofing membrane provided in 1m widths. The complete wetroom sealing solution - not just for floors but also to walls. When correctly installed across the entirety of a wetroom floor, it provides an impenetrable barrier against leaks, guaranteed for life.

This unique system provides the ultimate watertight wetroom with its market-leading membrane design. WaterGuard™ is fully compatible with all Impey products including Aqua-Mat underfloor heating, with resistance of up to 60°C. Impey's WaterGuard has been certified according to DIN EN ISO 9001:2008.

Mandatory requirement. Red zone

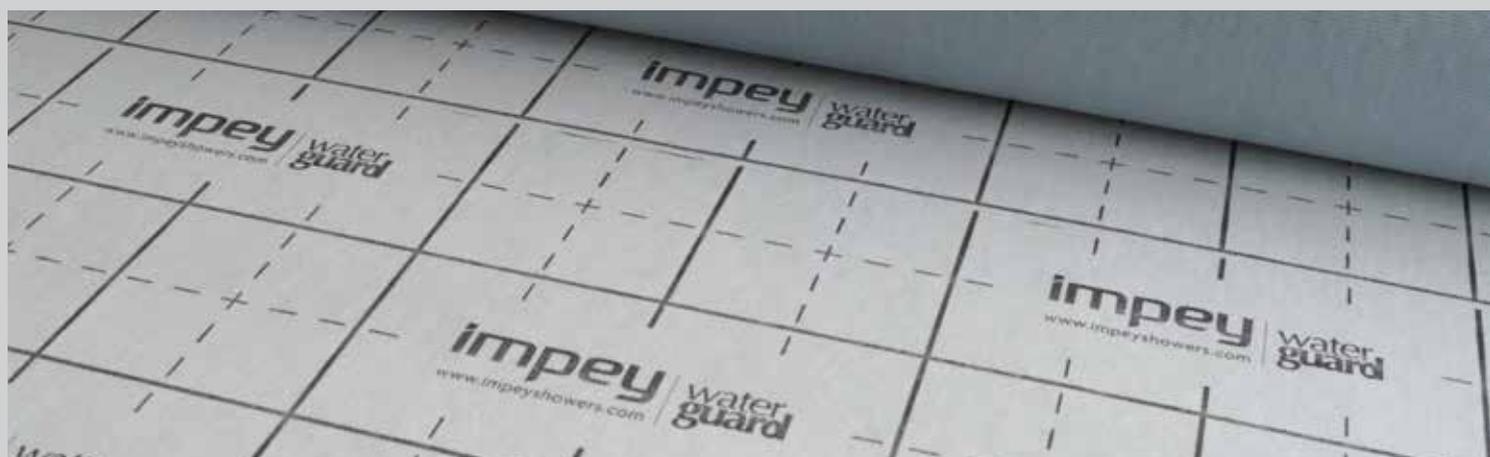

The entire wetroom floor must be tanked with WaterGuard to qualify for our lifetime guarantee. This will prevent any water ingress into the floor structure

Recommended. Red and Blue zone

The entire floor and walls immediately inside the wet area and extending 600mm beyond should be tanked to stop any water ingress into the floor and the walls.

Highly recommended. Complete coverage

WaterGuard tanking throughout the entire wetroom (floors and walls) will create a seamless impenetrable wetroom, providing heat and sound insulation and decoupling throughout.

WATERGUARD KIT OPTIONS

What are the benefits of adding WaterGuard?

Install WaterGuard with any Impey Aqua-Dec and receive our Lifetime Watertight Guarantee.

Only 1mm thick but offers the superior decoupling properties of 10mm.

Works with heavy wall tiles. Tried and tested to work with wall tiles and build up of up to 30kg/m².

Provides thermal insulation. Fully tested and compatible with Impey Aqua-Mat underfloor heating.

4 | PERSONALISE YOUR WETROOM SOHO® WETROOM SCREENS & DOORS

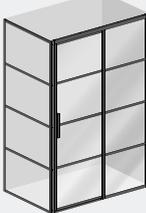

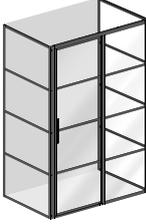

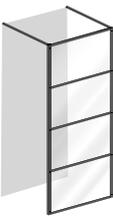

The Soho wetroom screen is inspired by urban industrial partitioning, the high-quality aluminium-framed screen is powder coated in jet black boasting 8mm safety glass; exposed frames on the outside of the unit, and visible screws to enhance the screen's authentic appeal.

The Hinged and Sliding door can be installed as a completely level-access solution. Both doors have frames on the outside and are flush on the inside for easy cleaning.

The Sliding door has soft open and close, and quick release technology for easy cleaning.

- Height: 2100mm to top of screens
- 8mm toughened safety glass tested to EN12150 and EN12600 standards
- Matte black finish
- Hidden hinges and seals
- 10 year guarantee
- CE certified
- For wetroom floors only. Cannot be installed on a shower tray

4 | PERSONALISE YOUR WETROOM SHOWER WASTE PUMPS

Instant Match Premium Pump

With market-leading products Impey and Whale have made level-access showering a reality for thousands of customers for nearly two decades. Partnering together, Impey and Whale make the installation of a wetroom possible in places where gravity drainage is not an option.

Whether down in a basement, or up in a loft conversion the options for a wetroom installation are more attainable now than ever before. Whale luxury wetroom pumps are fully compatible with the Impey Aqua-Dec EasyFit™ wetroom system and pumped drain.

Features & benefits

- Easily concealed within a vanity unit, or cupboard
- Wall mounted up to 2m away from the shower drain
- Fully automated with shower control
- Quiet operation- clever calibration to minimise suction noise at drain
- Removes shower run off with automatic purge cycle after 15 minutes
- Pumps shampoo, gel and hair without blocking
- 5 year extended warranty*
- BBA Approved (Dry Deck 20)

*T&Cs apply

If you are considering a pumped waste solution for your luxury wetroom project, please contact our Technical department for further information on the Whale Instant Match Premium and Dry Deck 20 shower waste pumps. For all queries and information on spare parts please contact 01460 256080

What is a pump?

A shower waste pump is used to discharge showering waste water, in areas you could not traditionally install a wetroom, where a gravity fall to drains cannot be achieved.

The Whale pumps listed on these pages connect directly to the hot and cold shower supplies, and will turn on and off automatically with the shower.

Dry Deck 20 Pump

SELECT YOUR SHOWER WASTE PUMP

Pump Model	Flow Rate	Universal (non-handed inlet)	Speed Set-up	Adjustable Off Delay	Optional Overrun Switch	Integral Valves (prevent drain odours)	IP45 Compliant

4 | PERSONALISE YOUR WETROOM ACCESSORIES

Impey's sister brand Geesa has a variety of bathroom accessories to finish off the look.

geesa.

Please see Geesa Brochure for full range and prices

STAGES OF A WETROOM

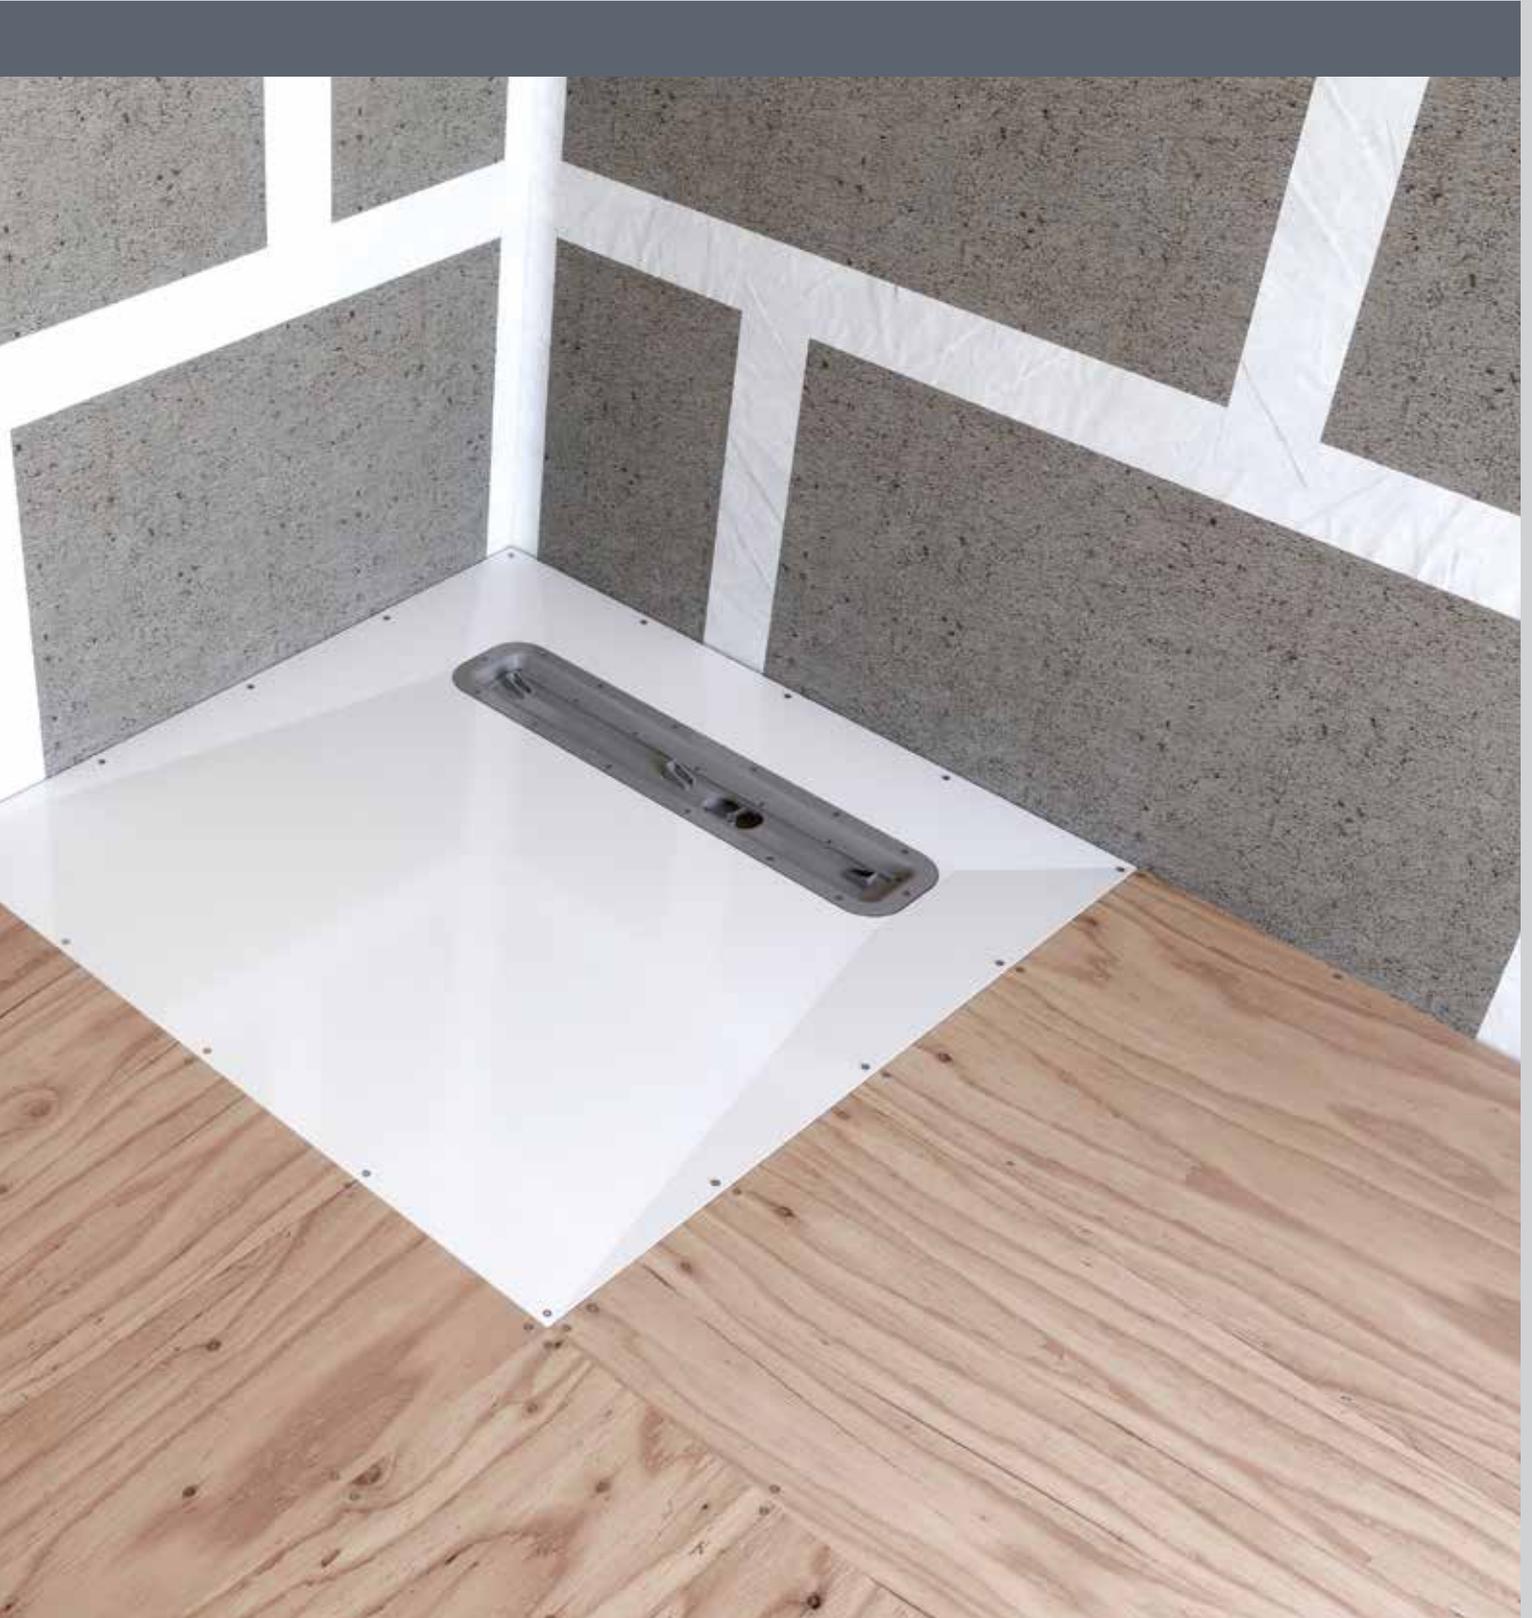

All Impey wetroom floor formers are 22mm thick and can be placed directly onto timber joists acting as reinforced floorboard replacements or set into concrete floors.

With four types of floor former to choose from, across the Aqua-Dec EasyFit and the Aqua-Dec Linear range, you can achieve the perfect look and result for any situation.

Installed in line with supplied instructions, our range of wetroom formers easily support weights of 47 stone and are guaranteed for life.

PREPARING
YOUR WETROOM

STAGES OF A WETROOM

Wetroom waterproofing or 'tanking' is a process which is designed to prevent water and humidity from penetrating the floors and walls of a showering area or building.

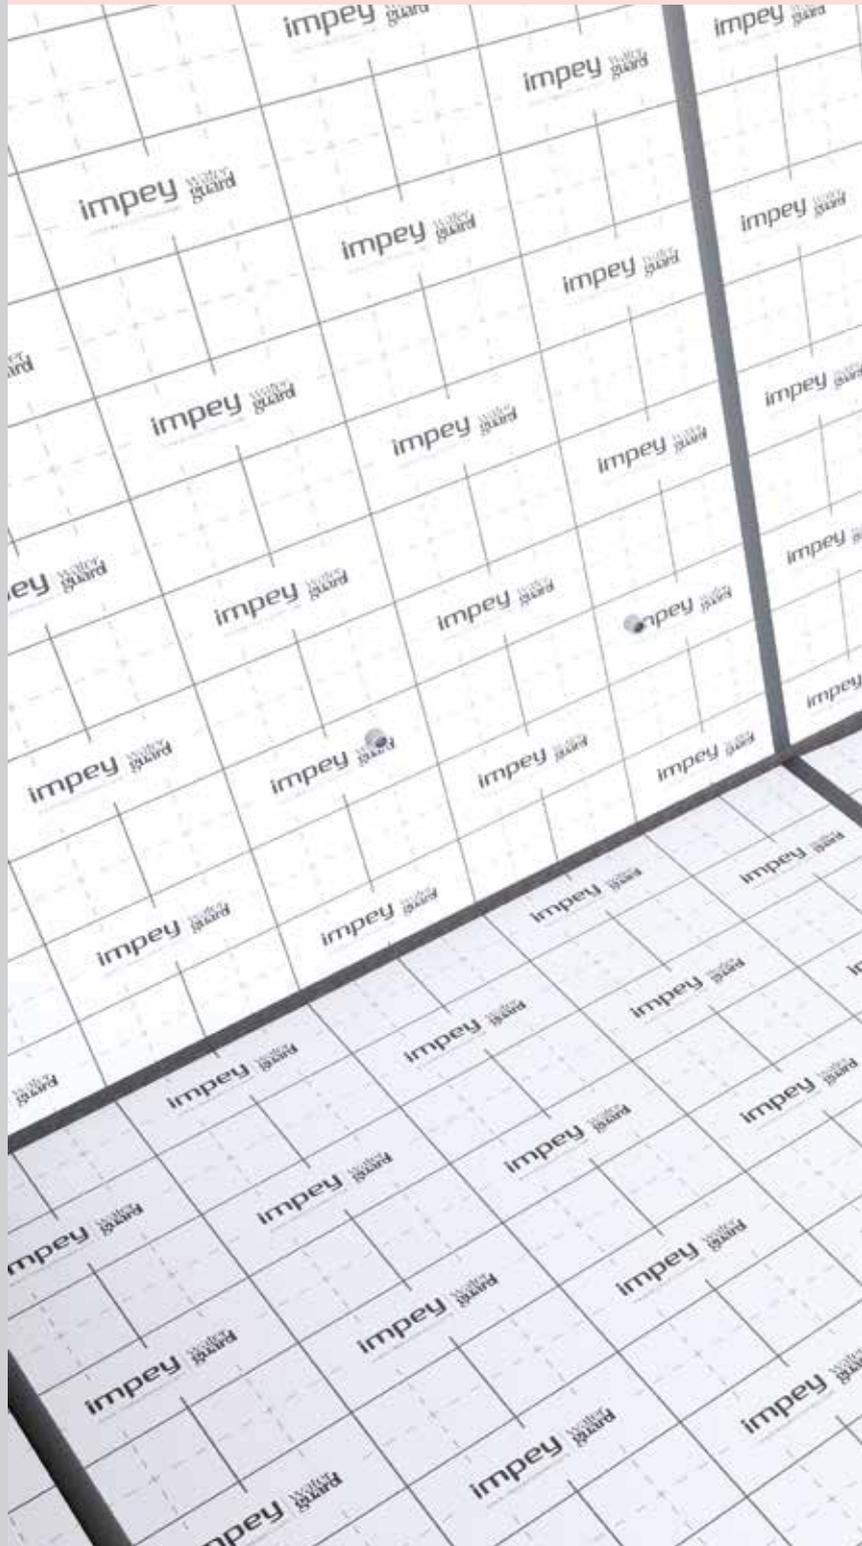

Water damage can cause serious issues to a building's structure. By correctly waterproofing wetroom floors and walls you guarantee a leak-free showering area. The self-adhesive WaterGuard membrane is laid across the entire floor and can also be used on walls.

A chemical-free and modern solution, WaterGuard is the most advanced wetroom tanking system available.

Receive Impey's Lifetime Watertight Guarantee when WaterGuard™ is installed correctly alongside an Impey wetroom floor former.

WATERGUARD
COVERAGE

PREPARING
YOUR WETROOM

STAGES OF A WETROOM

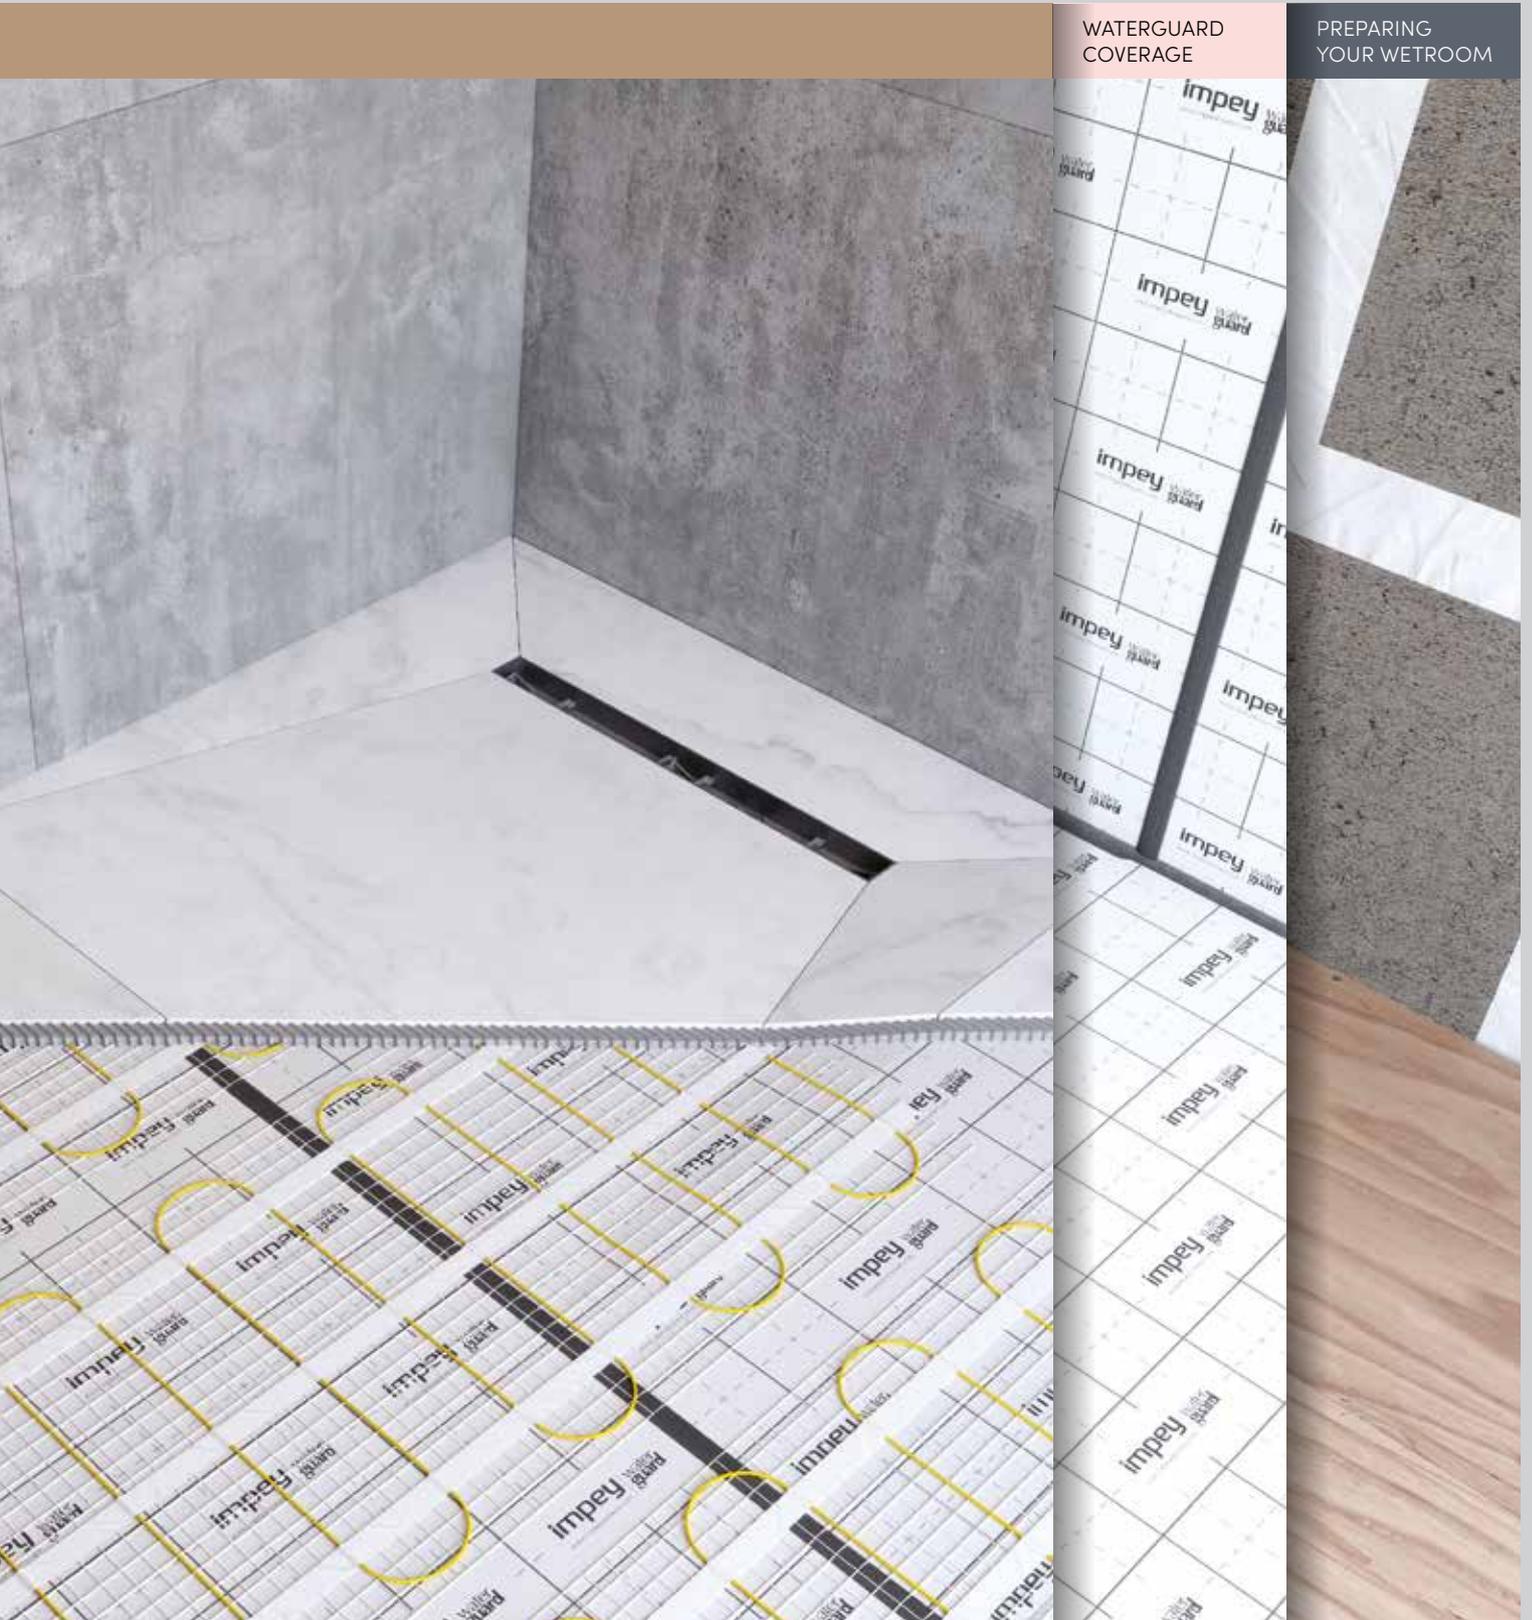

Stepping into a heated and comfortable wetroom, at just the right temperature and with the floor warm to the touch, makes for the ultimate showering experience.

Aqua-Mat underfloor heating across the entire floor and wet area creates the ideal floor tile temperature for showering all year round and is suitable for all types of floor, new concrete or wooden.

Modern underfloor heating can now be controlled remotely to ensure you can prepare a warm floor well in advance of use.

THE CORAM GROUP

Impey is part of Coram International.

C O R A M

The Coram International bathroom group

A Dutch family-owned business with offices in the Netherlands, Belgium, United Kingdom, Poland & Norway. Exporting to more than 70 countries worldwide.

OTHER CORAM GROUP BRANDS INCLUDE:

Coram Showers: A leading brand of shower enclosures, bath screens and shower trays with over 70 years of operation in the UK with very strong presence in plumbers merchant and bathroom retail sectors. Coram enclosures are designed to meet the highest aesthetic and functional standards expected whilst maintaining the reputation as a stylish and hassle-free range to install and maintain. Style with Standards.

Geesa: A world-class bathroom accessory brand since 1885. Geesa products have been installed in over 1100 hotels and cruise ships worldwide and hotel chains such as the Holiday Inn, Intercontinental and Radisson Blu. Ships such as 'Oasis of the Seas' and the 'Celebrity Solstice', each with 4000 cabins on board and thus the largest cruise ships in the world, have been furnished entirely with Geesa accessories.

Sealskin: Founded by Gerrit van Loon over 250 years ago. Sealskin started as an international producer of leather products. Over time, the company expanded its product range to include shower curtains, intended to dress the bathroom. Since 1950, shower enclosures have been added to the range, which are market-leading for their thoughtful design, smart functionality and eye for detail.

The company has been part of the Coram group since 1986 and dominates the showering market across the Benelux region.

Tiger: Founded in 1950, Tiger specialised in a manufacturing a wide range of plastic products for different applications. From bicycle handles to soap dishes. Tiger quickly became very successful in the Netherlands and in 1957 a start was made on exploring the international market. The Tiger brand grew quickly into international playing field with a wide range of bathroom accessories. The brand is recognised for it's design and innovation.
