

Gaia Smart V2 Thermostat

An intuitive programmable thermostat for controlling underfloor heating, the Smart V2 features a colour screen, 7-day schedule and open window technology for maintaining a comfortable temperature and reducing energy use.

Complete with Wi-Fi connectivity and smart home integration, the Smart V2 thermostat can be operated through an app so you can control your underfloor heating even when you're away from home.

Benefits

- Wi-Fi connectivity
- Smart home integration
- Large colour touch screen
- 7 day, 4 period programs
- Temperature limiting function
- Sensor offset
- Frost protection mode
- Holiday mode
- 2-year warranty

Wiring Diagram

1.

Loosen the fixing screw located in the bottom of the thermostat to remove the front panel from the back panel.

2.

Connect the thermostat according to the wiring diagram.

3.

Insert the back panel into the wall box with the screws provided.

4.

Align the top part of the front panel with the back panel and connect them back together, then replace the fixing screw at the bottom.
