PROREND PAINTS

Premier Silicone Masonry Paints

ProRend and ProRend Paints are part of the SAS (Europe) Ltd range of products and systems. Information contained in this brochure is correct at the time of print. SAS (Europe) Ltd reserve the right to make alterations to the content of this brochure and to the products and services we make available as part of our continuing commitment to improvement.

PROREND MASONRY PAINTS

Superior Water-Repellence: Our ProRend masonry paints, available in two premium ranges, Water Repellent and Self-Clean, are ideal for both domestic and commercial, new build and renovation projects. Both are highly water-repellent and pair perfectly with ProRend basecoats and decorative renders. They provide an unmatched shield against the elements, ensuring your projects stays pristine for longer.

Innovative Self-Clean Technology: Elevate your project to the next level with our Self-Clean Masonry Paint. This advanced formula not only protects against the elements but also features innovative self-cleaning properties, maintaining its aesthetics effortlessly.

Paint To Perfection

Explore our silicone paints with exceptional flexibility that easily accommodate substrate movements.

- 65,000+ Colours
- Easy 2-Coat Application (Brush or Roller)
- Water Repellent
- Vapour Permeable
- Easy to Repair

Expansive Colour Range

Discover a palette of 30 popular colours in our standard range.

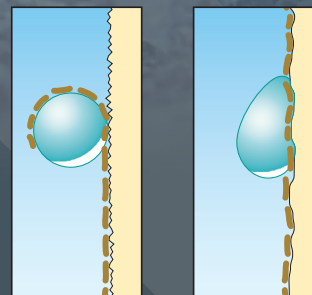

For a truly personalised touch, we offer the flexibility to create bespoke paint colours. Choose from RAL, NCS, or BS colour options, or simply provide us with a free sample, and we'll match it.

If you would like a free sample of your selected colours, get in touch with us today at info@sas-europe.com or 01647 24620.

The Self-Cleaning Effect

Our ProRend Self-Clean Masonry Paint harnesses cutting-edge hydrophobic nanotechnology inspired by nature's self-cleaning wonders found in certain plants and insects.

This innovative formula generates a microscopic textured surface with a contact angle of 140° , resulting in a hydrophobic surface. This causes water to bead up into pearls that run across the surface of the facade. As the water runs over the surface of the render, they collect any dirt and contaminants and remove them, cleaning the facade as it rains.

Technical Data

	Water Repellent Masonry Paint (WRM)	Self-Clean Masonry Paint (SCM)
