High performance gratings

Growth in traffic speed and intensity coupled with ever changing climatic conditions is placing greater emphasis on the importance of installing high performance problem free, durable drainage solutions. This has led to Saint-Gobain PAM UK developing a range of gratings that include standard features that when combined aid in the reduction of future maintenance or replacement costs.

Designed and developed with the needs of the client and operators in mind, the AquaVantage & Aqua-Max range of high performance gratings are being selected and specified for some of the most testing applications in the strategic and local road networks. Each combine high absorption grating design with ease of use, enhanced durability and security features to aid in the reduction of whole life costs.

Increased safety

 Captive hinge with integral hinge pins.

Increased security

• Automatic spring arm locking device.

Improved efficiency

• Highly efficient grating design.

Recommended for use in city roads carrying continuous heavy traffic where efficient water removal is required – with the addition of a captive hinge for ease of maintenance.

Features

- Captive hinged grating.
- Non-rock design.
- Single-piece grating.
- LTS installation and durability features.
- Automatic grating security locking.
- Wedge seating.

All sizes are available with the Install Plus frame levelling system, please refer to the installation section for further details.

Options

• Security can be increased through the provision of retro-fit locking kits.

Recommended for use in carriageway surface water drainage channels with a 1:5 V shaped profile.

Features

- Captive hinged grating.
- Non-rock design.
- Single-piece grating.
- Automatic grating security locking.
- Wedge seating.

Options

• Additional security locking option.

Use loop handle lifting keys product code 190667 460mm long or 190668 610mm long.

- * Denotes removable grating.
- ** Denotes dimension when measured along direction of channel.

Recommended for use in city roads carrying continuous heavy traffic where efficient water removal is required - with the addition of a captive hinge for ease of maintenance.

Features

- Non-rock design.
- Single-piece grating.
- LTS installation and durability features.
- Automatic grating security locking.
- Multi-directional water deflectors.
- Wedge seating.

Options

• Additional security locking option.
