

Washroom solutions for  
**Medical Environments**

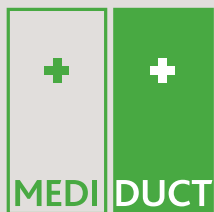

## Engineering intelligent washroom solutions.

Aaztec has been at the forefront of pioneering new techniques in the design, manufacture and installation of high quality cubicles and washrooms since 1992. Our ability to tailor a washroom solution to suit the exact needs of a client environment is unrivalled and today our customers span all industry sectors including:

- **Healthcare**
- **Hotel**
- **Retail**
- **Transport**
- **Leisure**
- **Public Sector**
- **Education**
- **Manufacturing**

Aaztec offers a full design consultancy service to ensure every cubicle or washroom fits the customer's exact needs in terms of look, feel, materials and durability. We can also advise on matters such as DDA compliance and provide finishes and fittings to complement and enhance any design or colour scheme. Our latest eco-friendly ranges harness recycled materials to help sustainability and the environment.

## MEDIDUCT

**The MEDIDUCT hand wash station offers an innovative, single panel, wall hung, hygienic solution to all environments where hand cleanliness is vital.**

**MEDIDUCT uses two materials - Advanced Bioclad® with Biocote® technology or Sanitized® laminate (both utilising silver ion technology) that inhibits the growth of a wide range of microbes including MRSA, E.coli, Salmonella and mould by up to 99.99% and are both fully certified.**

### SOLID GRADE LAMINATE

- Meets the highest hygiene and sterility requirements due to its Sanitized® protection and non-porous edges which allows for easy cleaning and maintenance.
- The ideal product for demanding, high traffic and humid areas.
- Suitable applications include:- Wash Hand Stations, Showers, Cubicles, Work Stations, Lockers & Benches

### ADVANCED BioClad® SINGLE SKIN PVC

- Inhibits growth of a wide range of microbes by up to 99.99%
- Continues to control bacteria indefinitely.
- Eliminates the need for aggressive cleaning fluids
- Suitable applications include Hospital Wards, Treatment Rooms, Kitchens, Laboratories, Wet and Hygienically sensitive areas

## How does this work?

**Biocote® technology utilises the power of silver, a safe, natural antimicrobial. It reduces levels of bacteria and mould on the surface of products, making them cleaner, safer and more hygienic to use.**

Panels protected with Biocote® are ideal for environments where hygiene is important, such as hospitals, care homes, schools, restaurants, leisure centres and other public buildings. Biocote® is incorporated into the products at the time of manufacture. It is sustainable technology, as it provides permanent built-in protection. Its antimicrobial performance does not deteriorate over time, nor does it need to be reapplied.

Solid Grade Laminate manufactured by Polyrey with Sanitized® protection offers key hygienic benefits. Its special formulation incorporates silver salts which are a natural substance and ecologically friendly. Sanitized® is non-toxic, anti-allergenic, dermatologically tested and technically proven to inhibit germ development on the surface area and prevent the development of microbial and bacterial odour.

MEDIDUCT is an easy to clean panel system that conceals all pipework and fixings. It has just one full length front panel, giving no joints or gaps. This makes cleaning and sanitising simple and quick to do, and leaves nowhere for microbes to breed.

MEDIDUCT can combine the use of the latest hygienic products with sensor operated soap and gel dispensers and sensor taps, thereby minimising contact with surfaces. The innovatively designed frame system allows it to be easily maintained. Once unlocked, the panel system swings open to allow disposal and replenishment of soaps and gels, whilst giving easy access for maintenance to thermostatic valves and pipework when required.

## Advantages of the MEDIDUCT System

- It is a complete package
- No-touch sensor dispensers and taps reduces transfer of bacteria
- One single duct panel leaves no gaps for bacteria to grow in
- Anti microbial surface inhibits microbe growth
- Smooth surface aids efficient cleaning
- Swing out, hinged panel system allows easy access for replenishment of soaps, gels etc.
- Easy access for maintenance
- Lockable for authorised access only

## Patient Hand Hygiene

All health professionals understand the need for hand hygiene. However, it is important for patients to also recognise this. Often, they are not as competent to deal with requests to comply with instructions. The MEDIDUCT system takes the stress out of this for them. A simple demonstration is all it takes to show how easy it is to effectively clean hands and reduce the spread of bacteria.

In a study by the Department of Health over sixty percent of people wrongly believed that using their hands to cover a cough or sneeze was the best way to reduce the spread of germs that cause colds, flu and other illnesses.

Utilising the MEDIDUCT system means that the transfer of germs is drastically reduced as no surfaces are touched in order to hygienically clean your hands.

### Who Can Use This System?

- Hospitals
- Clinics
- Doctors Surgeries
- Dental Surgeries
- Veterinary Practices
- Zoos and Animal Parks
- Beauty Industry – Spas etc
- Catering Establishments
- Pharmacies
- Opticians
- Food manufacturing
- Nurseries
- Laboratories
- Pharmaceutical manufacturing

## MEDIDUCT

### What the healthcare world has been waiting for!

We all know the dangers involved in the spread of hypervirulent infections such as MRSA, C-difficile, E.coli and others too many to mention.

MEDIDUCT is a revolutionary concept in hygienic control suitable for use not only in the healthcare sector but absolutely anywhere where hygiene is important.

### It is a complete package.

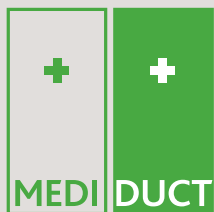

### It is a state-of-the-art hygienic hand preparation system.

The MEDIDUCT system allows you to wash your hands with handwash/soap and water or handrub, without touching any surfaces at all.

Not only that, the MEDIDUCT system is one seamless panel with no gaps to harbour harmful bacteria. New Polyrey Sanitized® compact grade anti-bacterial laminate can optimise standards of public health and hygiene. Its formulation incorporates silver salts which are a natural substance and ecologically friendly. Sanitized® is non-toxic, anti-allergenic, dermatologically tested and technically proven to inhibit germ development on the surface area and prevent the development of microbial and bacterial odour.

When refills are required, the whole system folds out from the wall and is refilled from behind by an operative using pre-sealed refills, thus reducing still further the likelihood of contamination.

This system is so versatile, you can choose which elements suit your requirements – from a simple soap dispenser to the complete package.

## The Aaztec solution...

**Talk to us about your vision for the facilities you would like and let us guide you through every step of the way.**

- We take the time to really understand your requirements
- We can advise on specification and design
- We site visit, measure up and discuss your needs
- We supply you with a no-nonsense quotation
- Once you have placed your order we create drawings for you
- We can supply only, supply and install or provide a complete 'Turnkey' package

Aaztec's expertise in supplying hand hygiene stations, washrooms, changing rooms, toilet and showering cubicles, vanity units, lockers and benches gives you the confidence to get on with other aspects of your business, knowing that Aaztec will take the stress out of your project.

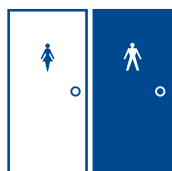

**Please discuss your requirements with a member of our team. Just ring 01423 326400 and let us help you complete your project to the satisfaction of all concerned.**

## Why choose Aaztec?

- ✓ Cost effective
- ✓ Quality product
- ✓ Design service
- ✓ Proven track record
- ✓ ISO9001
- ✓ CHAS approved
- ✓ Product sustainability
- ✓ Recycled product range
- ✓ Excellent after sales service
- ✓ Nationwide support
- ✓ Full service from single cubicle to a turnkey washroom solution
