INTELLIGENT FABRICS FOR SOLAR PROTECTION

www.mermet.co.uk
01989 750910
info@mermet.co.uk

WHO ARE WE ?

📍 We are **designer and manufacturer of high performance technical fabrics** to equip all types of blinds. Today, solar protection is a key element in eco-efficient building design (LEED®, BREEAM®, HEQ™, LOW-ENERGY BUILDING certifications).

By controlling the effect the sun exerts on buildings, Mermet fabrics have a dual effect:

- on energy consumption by reducing the use of artificial lighting, heating and air conditioning.
- on comfort and well-being of users: glare control, temperature control in winter/summer, aesthetics... 📍

Present
IN OVER
60 COUNTRIES

730 PRODUCTS

More than **3,800,000** m²
OF SOLAR PROTECTION
FABRIC SOLD EACH YEAR

MANUFACTURED IN
FRANCE

We offer numerous **insulating fabric solutions, for external and internal application, from transparency to total darkness**, that offer genuine functional and aesthetic added value to any architectural project.

MERMET s'illustre aussi dans des projets résidentiels...

MERMET distinguishes itself in the field of residential projects...

OUR TOOLS

You have a project and need advice in order to pick the right fabric for your particular requirements ?

We provide you functional tools and tailor-made services.

www.mermet.co.uk

FIND IN 3 CLICKS

THE FABRIC BEST SUITED to your project

- A search engine with performances criteria
- Many documents for download
- All products information available
- A library of references

Service +

- Calculation of solar factor g_{tot} (glazing + blind)
- Spectral values and thermal & optical factors available on request
- Specification sheet
- A4 samples and prototypes
- Training on fabrics functionality

Collection Mermet

It offers a **wide choice of fabrics** for external and internal application, from transparency to total darkness, for thermal and optical comfort.

To receive brochures from the collection, **contact us**.
