

Colours & Coatings

High Performance
Facade Finishes

Introduction

Colour is an essential part of our built environment – incorporating colour into a building façade can create an immediate visual and emotional impact, it has a notable influence on our impressions and our behaviours.

This edition of the Paroc Panel Facades Colour Book is designed as an introduction to our extensive PPC range (polyester powder coating) for inspiration and for technical information. PPC is applied in our world class facility in the UK within metres of the fabrication facility. The line is Qualicoat approved, this is an assurance that defines the minimum requirements for plant and equipment, coating materials and the finished cassettes.

Our standard colours are available in a variety of gloss levels, from matt to high gloss and are all available as Class 1 with most also available as super durable Class 2.

Powder coating on aluminium can replicate the appearance of other materials, giving texture and tone as well as colour, turn to our ‘Inspired by’ section for more information.

All associated system accessories can be finished in the same range to compliment and complete the facade.

For sample colour swatches, or to speak to a representative, please do email panelinfo@parocpanels.com

All our aluminium rainscreen cassettes including Dri-Design and Shingle are suitable for powder coating. For more details about the range please see www.parocpanels.com
