

A modern, minimalist bathroom with a grey and white color scheme. On the left is a walk-in shower with a glass door and a rainfall showerhead. In the center is a white vanity with a dark wood-grain cabinet and a white sink. To the right is a white freestanding bathtub. The floor is made of large grey tiles. A window on the right side of the room lets in natural light, and a small potted plant sits on the windowsill. The ceiling features exposed wooden beams and modern lighting fixtures.

The modular wedi system in a nutshell

... wedi®

The world of wedi systems

Integrated solutions for modular bathroom concepts

The wedi brand stands for innovative system solutions for the individual design of bathrooms and wet rooms. The globally active system provider with production sites in Germany and the USA, employs more than 500 people across the group and is represented in over 50 countries.

Everything started with the wedi building board, the basis of all system solutions. The family-owned company, founded in 1983, has continuously expanded and further developed its product range – into the modular wedi system. All wedi system components are equally suitable for new builds and renovations, are compatible with one another, tested, approved, and are 100% waterproof in the overall system - for long-lasting reliability with a manufacturer's warranty.

The range at a glance:

- Shower systems with point and linear drainage
- Building systems and design elements
- Seamless design surfaces
- System accessories for sealing, assembly etc.
- Individual spa & wellness elements
- Customised modular construction

wedi Fundo[®] shower systems

Flush-to-floor showers for the highest demands

Whether shower systems with point or linear drainage, with a classic shower element or a complete system including integrated drain technology: the vast range of the wedi Fundo series offers the right solution for the most challenging situations – a flush-to-floor shower tailored to your wishes – within one range that meets the highest demands of planners, fitters and builders equally.

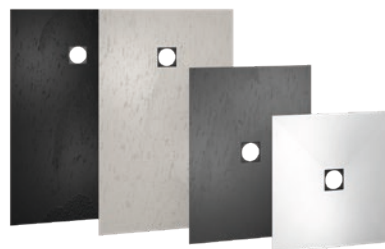

Functional shower elements with Top design

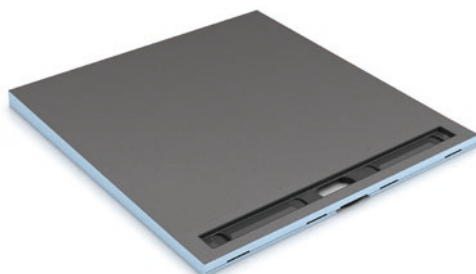

E.g. Fundo Plano

65 mm thick flush-to-floor shower element with integrated point drainage

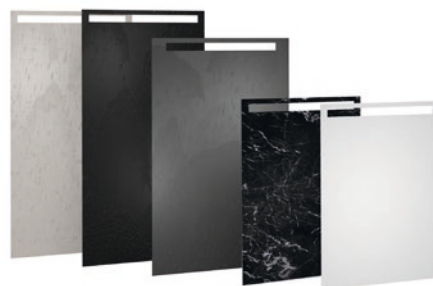

E.g. Fundo Top Plano

Seamless design surfaces – suitable for Fundo Plano shower elements

E.g. Fundo Riolito Neo

Floor-level shower element with close to the wall linear drainage and single-sided gradient

E.g. Fundo Top Riolito Neo

Seamless design surfaces – suitable for Fundo Riolito Neo shower elements

wedi design and shape

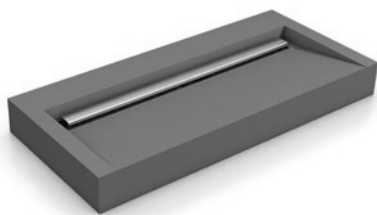

Design elements for bathroom & wellness areas

wedi design elements in a wide variety of shapes offer unlimited design possibilities. Whether benches of all types, loungers or plumbing and bathroom furniture – the wide variety of designs allow for the creation of stylish and modern bathroom and wellness facilities. As a seamless alternative to traditional tiling, the wedi Top Line offers panel type design surfaces for walls and matching design surfaces for Fundo shower elements and other wedi functional design elements such as niches or benches for example.

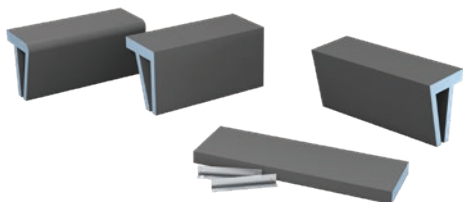

Modern bathroom equipment with Top design

E.g. wedi Sanbath floating washbasin
Floating washbasin with integrated linear drainage, available widths 500 - 1,300 mm

E.g. wedi Top Wall
Ready-to-install design surfaces for wall and surface design

E.g. wedi Sanoasa bench 3
Bench elements with straight, angled and rounded seat edge or with completely floating seat surface

E.g. wedi Sanoasa Top
Seamless and perfectly fitting design surfaces especially for the wedi Sanoasa bench 3 with rounded seat edge

wedi building systems

Only the best materials for the best systems

The wedi building board is the basis of wedi building systems and is available in various designs: in standard, XL and XXL format for floor/wall applications, as a grooved variant for round constructions and as preformed, functional elements e.g. for shelving and storage, for the cladding of pipe connections and toilet wall installations.

Practical components with Top design surfaces

E.g. wedi building board

The basis of the versatile wedi building system – 100% waterproof, extremely stable and directly tileable

E.g. wedi Sanwell wall element

Stable wall element with integrated niche – ideal for use as a shower partition

E.g. wedi Sanwell niches

Practical functional elements for additional storage for the shower and bath, available in various formats

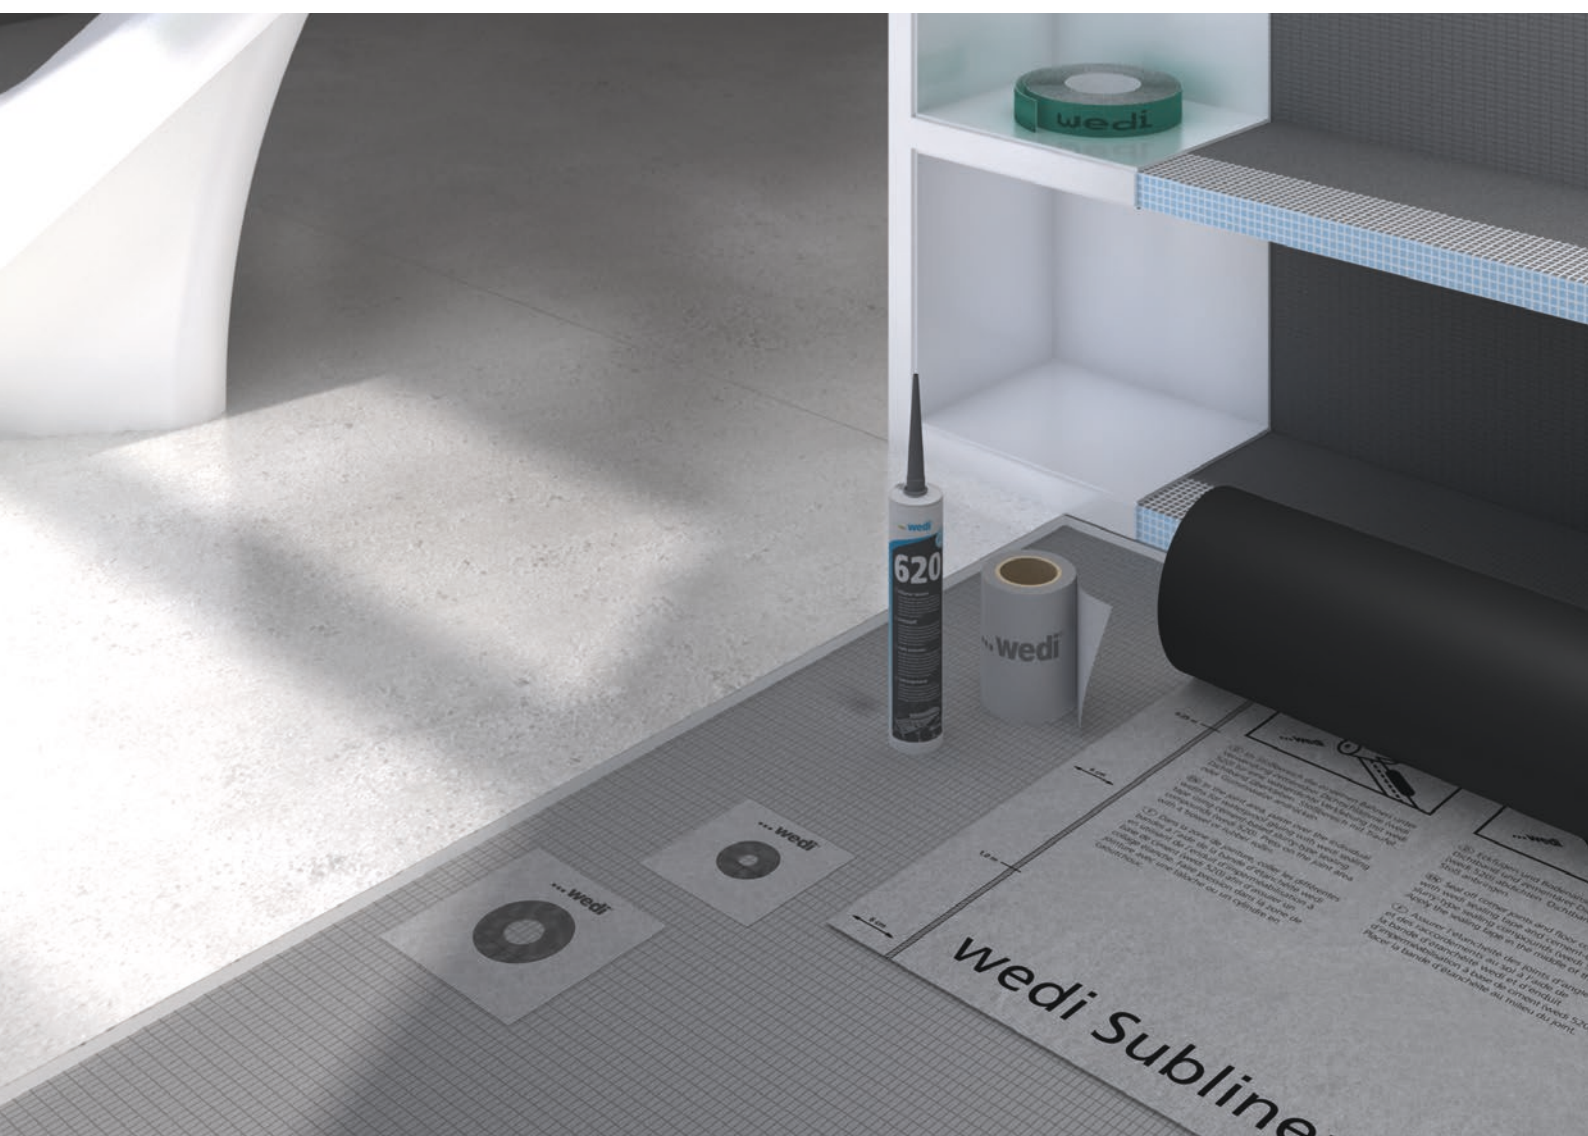

E.g. wedi Sanwell Top Niche

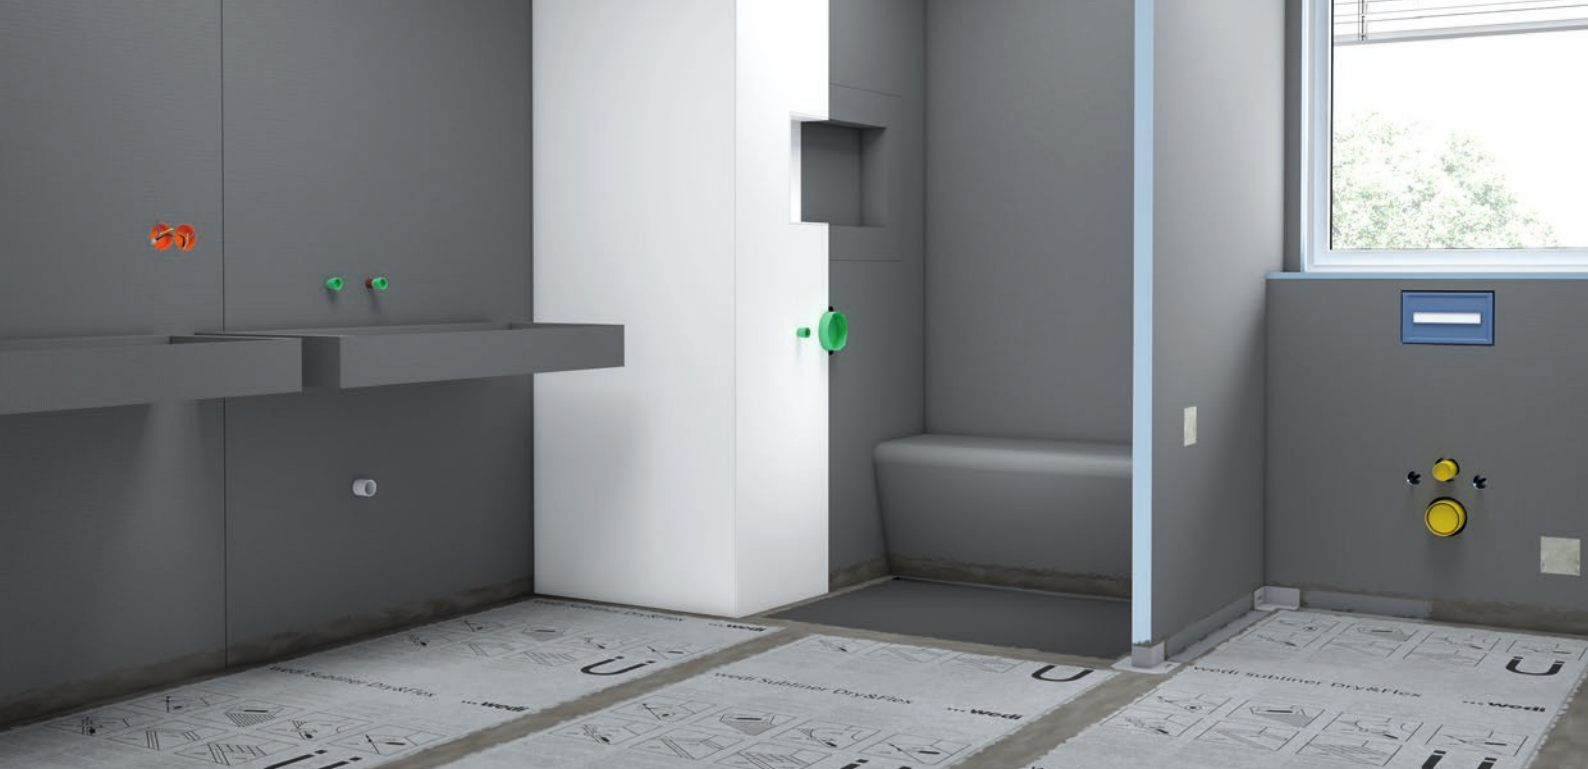

Ready-to-install design surfaces for wedi Sanwell niches and wall elements – precisely matching and seamless

wedi system accessories

Strength is in the details

Quick, high-quality with guaranteed reliability – the versatile range of accessories from wedi offers certified components of wedi sealing systems as well as practical system aids for adhesion and installation; from the tried and tested wedi 610 adhesive sealant through fleece-backed sealing membranes and corners to the comprehensive wedi Fundo sealing set - for all professional connections and joints in the shower.

The right tools for every application

E.g. wedi 610 adhesive sealant

Versatile single-component adhesive and sealant

E.g. wedi Subliner Dry & Flex

Flexible, crack-bridging sealing and decoupling membrane

E.g. wedi Fundo sealing set

Especially for waterproof connection of wedi Fundo shower elements to other non-system materials as well as adjacent wedi sealing systems

E.g. wedi Nonstep ProS

High-quality sound-absorbing non-woven fabric to reduce water-impact and footfall noise

wedi spa & wellness

Spa & wellness elements

The experienced wedi project team designs a wide variety of individual constructions, such as communal shower areas, swimming pools and whirlpools with various underwater elements such as seats or steps, as well as specially designed and equipped steam baths. Due to the completely free shaping of all elements, there are countless design possibilities.

If desired, recesses and feed-throughs can be incorporated at the factory, e.g. for on-site massage jets or lighting technology. This reduces labour and increases the quality of the installation.

Application Examples

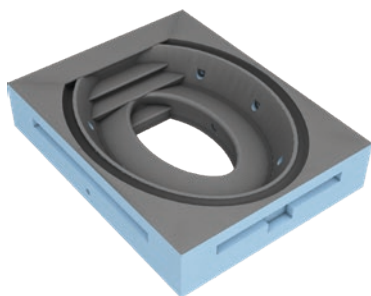

Communal Showers

Functional row of showers, either with standard or custom-made elements

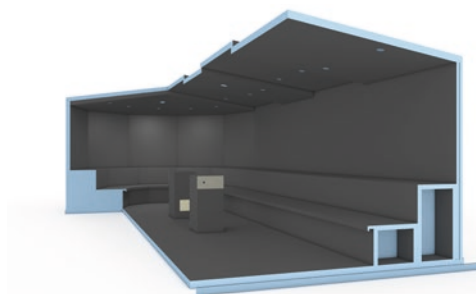

Swimming pools and Hot tubs

Custom-built and shaped pool constructions

Underwater Constructions

Various underwater constructions of all shapes and types, such as stairs and benches

Steam Rooms

Steam rooms are manufactured according to customer requirements freely selectable shape and equipment

wedi customised modular construction

Ready-to-assemble systems for smart room concepts

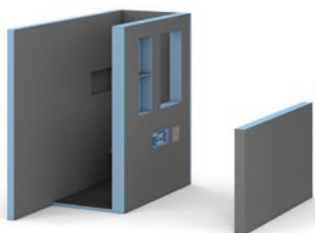

With its modular system components, wedi creates brand new opportunities for designing individual, on-trend bathrooms and wet rooms. Lightweight and at the same time enormously stable wedi modules allow for the realisation of almost anything from the floor to the ceiling and practically everything else in-between: free-standing or partially attached creative partitions, shower solutions, customised bathroom furniture or complete system solutions for spa and wellness areas for example.

All individually made module components are 100% watertight, loadbearing structures marked for easy assembly on site – easier, quicker and safer than any other conventional drywall designs. Each module is custom-made. The degree of prefabrication can be chosen freely: from factory-integrated electrical, cold and hot water lines through loadbearing reinforcements, cable ducts or empty pipes to fixed and finished technical components and fittings. All custom-made items are assembled in the wedi factory and subjected to a thorough test before delivery.

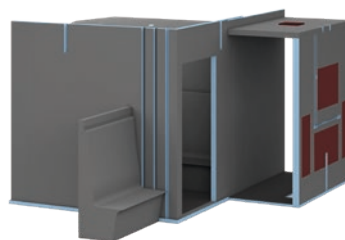

Application Examples

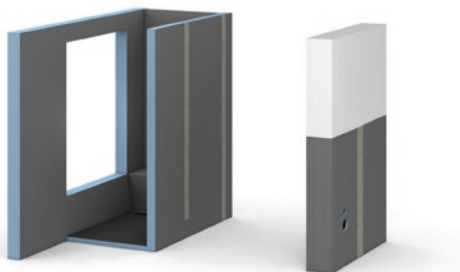

Modular shower and connected partition

Combination of connected modular wall, practical niches and technical preparation

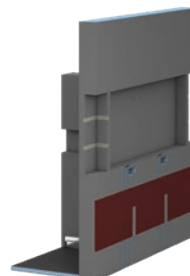

Steam room, bench and modular shower

Arrangement of a private wellness area with steam room, experience shower and foot basin

Modular shower and freestanding partition

Combination of freestanding elements and comfortable seating in the shower

Three-sided T-module

System solution for toilet, shower and washbasin incl. technical components and reinforcements
