# Welsh Waste Regulations 2023

With an expected commencement date of the 1st of October 2023, the Waste (Amendments) (Wales) Regulations 2023 will introduce new separation and recycling requirements for all business, public and third sector premises in Wales.\* Are these upcoming regulations set to affect you?

The new regulations will propose three sets of separation requirements in connection with non-domestic premises. In essence, they are aiming for recyclable materials to be further segregated from normal materials in the same way that most householders currently do.

The aim is to change the way recyclable materials are collected and stored within the country and ultimately improve the quality and quantity of how waste is collected and separated. Alongside this, the Welsh Government has set a national target to recycle 70% of its waste by 2025 and eventually become a zero-waste nation by 2050\*.

## INDOOR RECYCLING BINS
