

ACO. creating
the future of drainage

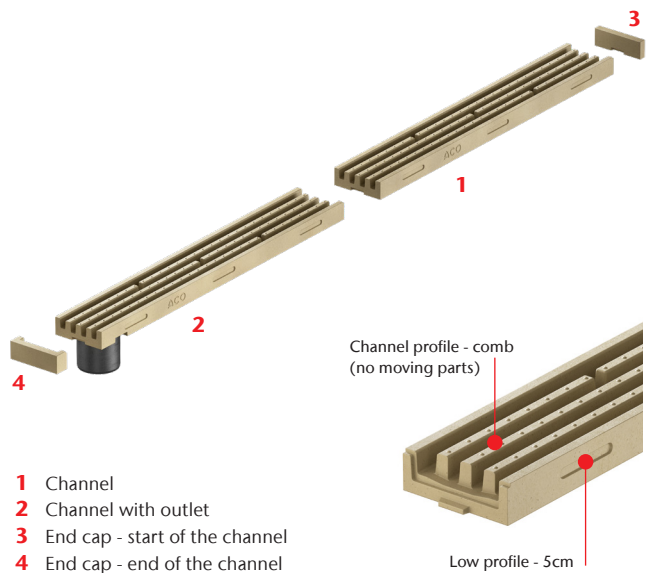

ACO Multislot

ACO Multislot channels are designed specifically to meet the drainage demands of multi-storey and underground car parks.

This low profile channel design is manufactured from corrosion-resistant polymer concrete and has no moveable parts, which reduces overall noise. Accessible and easy to inspect sealing groove make this the ideal channel for these demanding locations, which require robust high-performance solutions.

Benefits

- Polymer concrete system, easy to seal
- Corrosion resistant system
- Fast and easy assembly
- No moving parts that can cause noise
- ACO Multislot is available in three colours (natural, grey, black)
- Recommended solution for concrete and asphalt surfaces

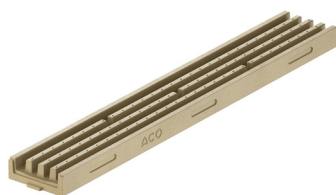

- 1 Channel
- 2 Channel with outlet
- 3 End cap - start of the channel
- 4 End cap - end of the channel

Applications

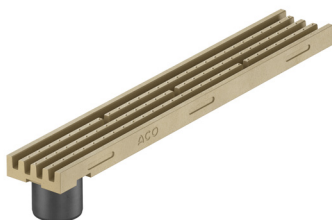

- Underground, mid and top tiers of multi-level car parks

System Overview

- Maximum load class: C 250
- Channel material: polymer concrete
- Channel profile - comb
- Channel type: no slope
- Edges: Polymer concrete

Channel 1m natural

Channel 1m with outlet natural

End cap for the start of the channel

End cap for the end of the channel

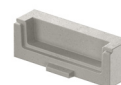

Channel 1m grey

Channel 1m with outlet grey

End cap for the start of the channel

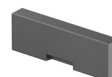

End cap for the end of the channel

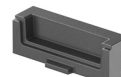

Channel 1m black

Channel 1m with outlet black

End cap for the start of the channel

End cap for the end of the channel

ACO Multislot outlet with double clamping flange
