

IRM Bristol Ltd Provides LCN Door Closers to Bath University, 10 West Building

LCN 1260 Series Door Closers, installed in partnership with IRM Bristol Ltd at Bath University, have proved such a long term success that their specification continued into the new '10 West Building'. Over 150 closers were installed to fire and life safety doors at the facility which opened formally in July 2016. This latest building provides space for the expansion of the University's Dept. of Psychology, a new home for the Institute for Policy Research and also a dedicated Postgraduate Study Space on its upper floors.

The LCN 1260 Series combines the best features from the previous 1070 and 1370 series into a single versatile and economical cast iron closer, with dual mounting capability.

The LCN 1260 Series is adjustable through spring sizes 1-5 and mounts to the most common commercial footprint.

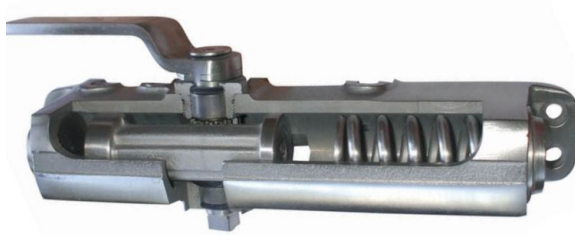

The LCN 1260 Series also features a complete line of regular and extra duty arms and LCN's peel-n-stick installation templates.

- Hinge (Pull Side) Mounting
- Top Jamb (Push Side) Mounting
- Stop Face (Push Side) Mounting

1260 Series

UK Fire Certification in accordance with
BS EN 1634-1:2014 (timber) - 120 mins.

EN 1154: 1996 + A1: 2002/AC:2006

CE Certification applies to all applications.

Other recent projects at Bath University include the £23m - 4 East South Building featuring a further 89 off 1260 Series door closers. This building provides research and teaching space for the Faculty of Engineering & Design as well as housing a cutting edge computing data centre.

Relcross Sales and Marketing Director Stuart McMaster said 'We are delighted to have supplied door closers for Bath University via IRM Bristol Ltd. The durability and reliability of our LCN closers make them ideal for projects like this and I confidently predict they will provide many years of trouble free service.'
