Duragrain surface finish

Final decor coating with high-strength protective paint

The highly scratch-resistant and UV-resistant decor printing guarantees a permanently beautiful door style. The 24 decors are detailed, natural and colourfast.

Duragrain doors are generally supplied in Grey white, RAL 9002, on the inside of the door. When the door is opened, a thin Grey white stripe can be seen between the sections on the outside.

Side frames and fascia panels are delivered in Woodgrain, Traffic white RAL 9016 as standard. Optionally, you can obtain lintel and frame fascias in a colour matching the decor.

The colours and surfaces shown are subject to the limitations of the printing process and cannot be regarded as binding. Please consult with your local Hörmann specialised dealer.

Door leaf design

- 1 42-mm-thick, double-skinned LPU steel sections with PU infill
- 2 Surface hot-galvanized on the interior and exterior
- 3 Sections primed on the interior and exterior in Grey white, RAL 9002
- 4 UV-resistant decor printing on the priming of the outside of the sections ensures a natural, colourfast decor appearance
- 5 Scratch-resistant Duragrain final coating permanently protects the decor exterior from effects of the environment, helping the door remain beautiful for many years
