

# Flooring Profiles

Aluminium, Brass  
& Stainless Steel

## Special Finishes

A selection of C.A.T. flooring profiles are available with special finishes.

For information on the availability of a finish on a particular product please refer to the relevant product page in this catalogue. Should you require further assistance, please contact the C.A.T. sales office.

Finishes depicted in this catalogue are representative only and are subject to print interpretation. For accurate referencing, please request a sample from the C.A.T. sales office.

In 1999 we pioneered special finishes on brass thresholds in antique and chrome finishes and in 2016, developed our Designer Home Collection range of special finishes on aluminium profiles, for the residential and light commercial market.

We are constantly developing our range and finishes to provide our customers with a byword at C.A.T. Choice.

### Brass Finishes

Antique Brass and Antique Bronze finishes are a chemically applied process to Brass products and are hand finished with a variance from batch to batch. Antique finishes are not foot traffic - resistant and are designed to create an aged, unpolished effect.

Polished Brass

Satin Brass

Antique Brass

B155 is a variation of BC55 cover plate produced with a 3.5mm underside fold. It can accommodate minor height differences when installed on hard floorings. It is particularly useful when joining hard floorings such as stone or timber to carpet where the carpet has some compression allowance to be made.

B155 is a variation of BC55 cover plate produced with a 3.5mm underside fold. It can accommodate minor height differences when installed on hard floorings.

It is particularly useful when joining hard floorings such as stone or timber to carpet where the carpet has some compression allowance to be made.

## Stainless Steel Cover Plates And Flat Plates

S155 cover plate is produced with a 3.5mm underside fold. It can accommodate minor height differences when installed on hard floorings. It is particularly useful when joining hard floorings such as stone or timber to carpet where the carpet has some compression allowance to be made.  
Grade: 304L stainless steel.

**S155**

Finishes Available	Gauge	Stock Length	Screw Size	Length/Tube
Bright Stainless Steel	2mm	2.000m	8	6
Brushed Stainless Steel	2mm	2.000m	8	6

Flat plates can be used to identify the transition between two floorings and as an expansion plate offset fixed to one side of the flooring to allow movement. Other sizes available **TSO**.  
Grade: 304L stainless steel.

# Kliks™ Clip In Flooring Profiles System

Aluminium, Brass, Stainless Steel & uPVC

## Clip In Systems

In this section you will find information on flooring profiles with a system where the base is fixed to the subfloor prior to the flooring being laid, and finally the top profile being fitted into the base, finishing the installation.

### Kliks™ Primary Application: Commercial Environments

Comprising twin, ramp and end-stop profiles in a variety of metals and finishes.

Including:

- Brass
- Aluminium
- Chrome
- Antique
- Stainless Steel

Suitable with:

- Timber
- Stone
- Ceramics
- Carpet

Height adjustable uPVC bases.

### Kliks Slim™ Primary Application: High-End Residential and Light Commercial Environments

Comprising slim style twin, ramp and stop-end profiles in a variety of metals and finishes.

Including:

- Brass
- Aluminium
- Chrome
- Antique
- Stainless Steel

Suitable with:

- Laminates
- Stone
- Ceramics
- Carpet

Height adjustable uPVC bases.

### Kliks™ Spectrum Zip™ Primary Application: Commercial and Retail Environments

Formable into curves on site with uPVC bases.

Comprising twin, ramp and end-stop profiles in a wide selection of colours.

Suitable with:

- Timber
- Stone
- Ceramics
- Carpet

Height adjustable uPVC bases.

80% Recycled factory waste streams

# Kliks™ Spectrum Zip™ uPVC Clip In System

# Kliks™ Spectrum Zip™ uPVC Colour Option Clip In System Formable Profiles

**80% Recycled factory waste streams**

### Installation

Kliks profiles have been designed for simple installation. With versatile height adjustment and pre-drilled bases, the Spectrum Zip range is quick and easy to install.

### Stage 1:

Bases are secured to the sub-floor with adhesive\* and No.6 countersunk screws.

adhesive and screws

### Stage 2:

Once the base is firmly secured to the sub-floor, the flooring can be laid up to the base section.

### Stage 3:

The top section may then be fitted by hand or using a soft mallet if necessary.

### Formable On Site

The following table shows the minimum radii of Kliks Spectrum Zip curves when tops are fitted in a KB1 base at normal room temperature.

Profile	Radius (m)	Tail Position
KSP5 Zip	1.5m	
KSP7 Zip	1.5m	
KSP6 Zip KSP73 Zip	1.5m	tail of ramp on the outer edge of circle
KSP6 Zip KSP73 Zip	1.7m	tail of ramp on the inside of circle
KSP2 Zip	1.5m	tail of ramp on the outer edge of circle
KSP3 Zip	1.7m	

### Maintenance

PVC flooring profiles should be cleaned with a mild detergent with water and a damp - not wet - cloth, ensuring that the profile is wiped dry before allowing traffic to return to the area.

**Polishes and industrial cleaning agents should not be used on PVC flooring profiles.**

\*C.A.T. recommend the use of STYCCO FLEX by F. Ball and Co Ltd, subject to following their product technical data sheet, safety data sheet and installation guidelines, available in full from: [www.f-ball.com](http://www.f-ball.com)

### Installation Environment

Care should be taken that the profiles are not fitted or stored, prior to fitting, in extreme conditions of cold or warmth.

The ideal conditions for fitting are with temperatures in the range of 15°C to 25°C. Allowing a period of acclimatisation will assist in achieving a satisfactory result.

Ensure when fitting the tops into the bases, the profile section is not heated with hot air guns/hot water which can lead to material being inadvertently stretched whilst being fitted into position.

If the profiles are stretched during installation they will, over time, revert to their original size, leaving gaps at the joints and ends.

### Joints

The base profiles joints should be staggered with a minimum overlap of 150mm. Wherever possible, position the joints away from the main traffic areas.

When using the profiles in curved situations, it is recommended that an adhesive fix be also applied into the base (50mm along) at the joints.

## Kliks™ Spectrum Zip™ uPVC Colour Option Clip in Flooring Profiles System

Typical Applications

Carpet to ceramic and timber. Timber to timber.

Spectrum Zip is curvable on site when installed with uPVC bases.

# Perimeter Trims & Floor Edging Trims

Aluminium, Brass,  
Stainless Steel & uPVC

## Perimeter Trims

### Powder Coat Finishes

Increasing our range of special finishes, C.A.T. can now provide aluminium perimeter trims in a powder coat finish.

The facility is subject to minimum order quantities dependent upon colour specification.

When considering powder coat finishes, please consider the project and where the products are to be installed. C.A.T. would not advise powder coating on floor profiles where high footfall is anticipated and consider low footfall environments the most suitable for this finish.

Powder coat is a type of coating that is applied as a free-flowing, dry powder. The coating is typically applied electrostatically and is cured under heat to allow it to flow and form a 'skin' which is a hard finish that is tougher than conventional paint.

# Aluminium Angles & Tag Trim™ Formable Angles

## Angles and Tag Trim™ Formable Angles

A fine line between a straight floor and a great floor.  
For over 25 years.

### General

The Angles section of this guide has angles in Aluminium, Brass, Stainless Steel and PVC.

Angles create a defining line between floor coverings from 4.5mm to 25mm in height.

### For Straight Runs

Standard angles are supplied with pre-punched bases for adhesive fixing.

### For Curved Runs

Tag Trim angles have pre-drilled fixing tags at 80mm centres for forming curves on site.

The minimum radius to which Tag Trim angles can be formed is depicted with this symbol above which is shown against each angle:

## Tag Trim™ Formable Stainless Steel Angles For Curves

This symbol denotes minimum radius to which the profile can be formed. Tag Trim profiles can be formed on site to allow freedom of design where curved details are required in flooring. Bases with tags at 80mm centres for ease of curving. For mechanical fixing, use screw size 6. Grade: 304L Stainless Steel.

# Reflex™

# Movement Joints

Aluminium, Brass

## Reflex™ Movement Joints

### General

Reflex profiles are a range of expansion and movement joints which are designed for use with all hard flooring, eliminating cracking and protecting edges against erosion. Reflex has good acid and alkali resistance and has good stain resistance properties. The joints will readily compress by 20% helping to eliminate cracking and de-lamination of the floor finish caused by building movement or thermal expansion and contraction.

### Installation Guide

Movement joints should be provided in accordance with BS5385-3:1989, clauses 19 and 23.6 for floors. Movement joints should be fitted around the perimeter of the floor and where floor tiles abut fixed machinery and structural fixtures such as columns, bases, etc.

Immediate movement joints should be incorporated in large floor areas as described in BS5385-3:1989, clauses 19 and 23.6.

### Stock Lengths

Brass and Aluminium 2.715m x 6 = 16.29m packed
