

## Sovereign Flamacryl

An acrylic joint sealant, which in the event of a fire will swell to form a fire resistant insulating char that resists the passage of smoke and fire.

**Product Code**  
**30806177**

### Description

Sovereign Flamacryl is an acrylic joint sealant, which in the event of a fire will intumesce (swell) to form an insulating char that is fire resistant and will resist the passage of smoke and fire.

It cures to form a tough seal with movement joint accommodation of +/- 12.5%. Flamacryl is suitable for use in joints where an acoustic seal is required. Can be over painted when cured.

**Form Supplied:** Thixotropic paste

**Pack Sizes:** 310 ml tubes

**Colour Range:** White

**Contains:** Blend of acrylic polymer and intumescent agents.

### Properties

Sovereign Flamacryl is used for sealing expansion, contraction and construction joints where compartmentation and movement are factors; as a bedding sealing compound for locating fire resistant board systems; to seal gaps which occur between fire-rated building components and the surrounding structures i.e. window and door frames; and as a service penetration seal system for both cables and pipes.

### Certification

Independently tested to BS EN 1366-3: 2004 & BS EN 1366-4: 2006 achieving 4 hour integrity and insulation rating for a range of linear and penetration seals.

Also tested to BS EN ISO 140-3: 1995 Measurement of Airborne Sound Insulation of Building elements, where the sealant maintained the integrity of a plasterboard partition wall with a Sound Reduction Index of 55dB.

## PREPARATION

Surfaces must be clean, dry and free from oil, grease dust and loose material.

Prepare cartridge by cutting tip of seal above the thread. Replace nozzle, cut to form bead to suit joint width, then fit cartridge into gun at a 45° angle, wide enough to cover the gap being filled.

## USAGE

Ensure sealant makes contact with sides of joint, tooling if necessary using a wet spatula within 3 to 5 minutes of application.

**Use only in temperatures of 5°C and rising.**

## LIMITATIONS

Not for external use or at temperatures below 7°C.

## COVERAGE

12 metres for a 5 x 5mm bead

**Storage:** Between 5°C - 30°C.

**Shelf Life:** 12 months unopened.

## HEALTH & SAFETY

- ! Avoid skin and eye contact.
- ! Handle only when wearing protective clothing.
- ! Wash splashes from skin with soap and water, flush eyes with copious amounts of water and seek medical attention if irritation persists.
