

THE MULTIPURPOSE LIFT

THE CIBES® A8000 GOODS, PASSENGER & STRETCHER LIFT

cibes

SMART MODULARITY

Thanks to our space-saving, modular concept, Cibes lift solutions have an exceptionally short manufacturing and installation time, compared to conventional lifts. Even high-capacity lifts, like the Cibes A8000, are delivered and installed much faster, and at a fraction of the cost.

With more than 70 years in the business, Cibes Lift is the oldest manufacturer of vertical platform lifts in the world. Let our experience guide you to the perfect lift solution!

POWERFUL & VERSATILE

The Cibes A8000 has a rated load of 1000 kg and is certified for the transportation of both goods and people. That fact makes the Cibes A8000 the perfect solution for a wide range of establishments, such as warehouses, offices, restaurants and department stores, but also schools, museums, religious buildings and carehomes.

ADD VALUE TO YOUR BUSINESS

Given that the Cibes A8000 works just as well as an accessibility solution as it does as a transport solution for stretchers, hospital beds and goods, this platform lift has the potential to add great value to your building.

In addition, the small footprint, low top height and reduced lift pit of only 130 mm, make the Cibes A8000 exceptionally fast and easy to install.

EFFICIENT USE OF SPACE

One of the great advantages of our platform lifts, is their efficient use of space. The platform constitutes almost 70% of the total footprint, which makes it possible to fit the Cibes A8000 in a much smaller space than other comparable lifts.

The large platform and extra-wide doors enable the Cibes A8000 to transport bulky goods, such as large pallets, big roll containers or even pallet trucks.

ROBUST & RELIABLE ELEGANCE

Thanks to the wide choice of different floor, glazing and colour options, the design of the Cibes A8000 can be adapted to blend in seamlessly with most architectural and decorative styles.

OPTIONS

To make the lift even more robust, the Cibes A8000 can be upgraded with raised edges on the platform, kick plates in stainless steel for the doors and hard-wearing aluminium chequer plate flooring.

To facilitate access, it is also possible to equip the Cibes A8000 with automatic door openers and large, remote call buttons, also known as elbow buttons.

LOCKING SYSTEMS

Various locking systems.

THE CIBES® A8000

While conventional lifts take weeks to install and require major construction work, the Cibes A8000 can be installed in less than a week and requires only minimal refurbishment. Our secret is our modular concept, which minimises the impact on your building and shortens the installation time.

Modular lift shaft

No need for a masonry shaft, a ready-made lift shaft of glass or steel panels is always included.

Reduced lift pit

A shallow lift pit of 130 mm is enough.

Top height

The 2300 mm top height fits easily under most ceilings.

Energy-saving LED technology

The ceiling and platform are illuminated by durable and energy-saving LED lights.

Screw-driven system

Reliable 100% electric screw-driven system, no hydraulics.

Machine room less

The machinery fits inside the shaft, no need for a separate machine room.

Customisable platform design

The platform design can be customised with different colours and floor options.

ACCESS CONFIGURATIONS

1. Single entry

2. Adjacent

3. Open-through

STANDARDS AND CERTIFICATES

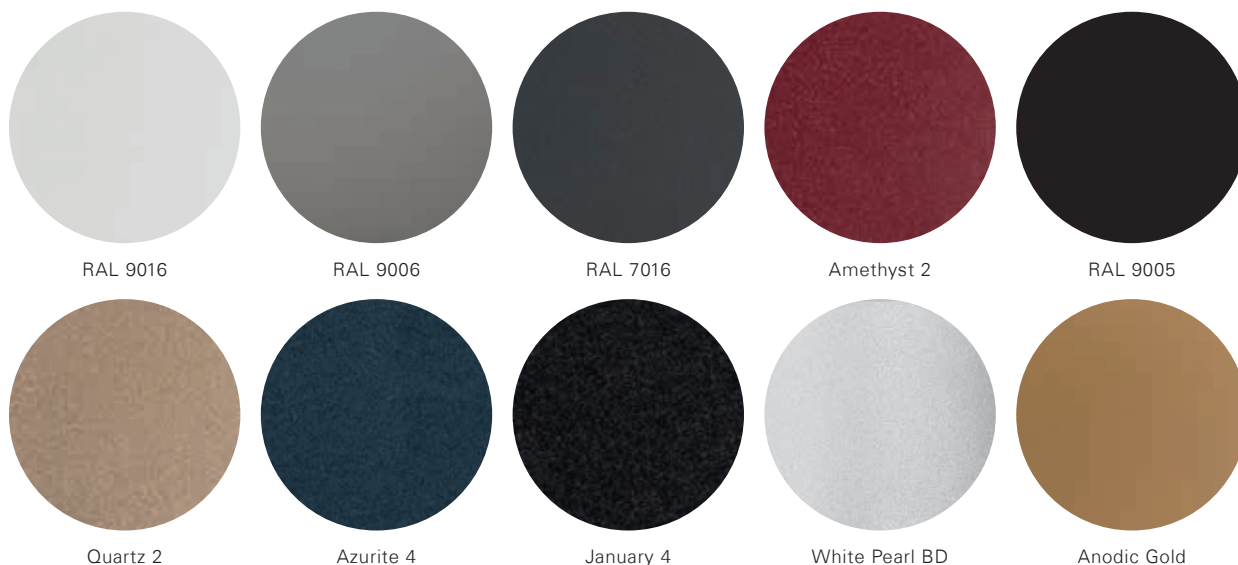

Energy Certificate: B with standard drive according to VDI 4707.

The Cibes A8000 is a CE type certified product and complies with the Machinery Directive 2006/42/EC and applicable parts of EN 81-41.

The control system of the Cibes A8000 attains Safety Integrity Level 3 (SIL3).

COLOUR OPTIONS

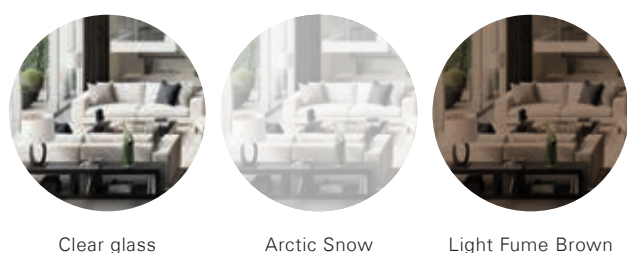

The Cibes A8000 is delivered in white RAL 9016 as standard, but is also available in the RAL or premium colour of your choice.

FLOOR OPTIONS

The black Altro Contrax safety floor is delivered as standard. In addition, we offer you the choice between several other safety floors, or resistant and durable aluminium chequer plate.

BUYING A LIFT – A STEP BY STEP GUIDE

Professional Advice

You can always book a free consultation with your local Cibes dealer to get the advice and support needed to find the best lift configuration for your lift project.

Design your lift

We offer you the freedom to create a lift design that will blend in with any building. The lift is available with a ready-made shaft in steel or glass (3 sides) and offers you a wide range of colour and floor options.

Order & quotation

Your Cibes dealer will provide you with a quotation and lift drawings. The price of the lift will depend on your choice of platform size, lift design and on the number of floors. As soon as you have approved the lift specification and drawings, your Cibes dealer will order the lift from our factory.

Delivery & installation

Your Cibes dealer will take care of the logistics, you just need to agree on the installation date. All our lifts are made in Sweden and the manufacturing time is generally between 8–10 weeks.

The Cibes Commitment

Your lift undergoes extensive testing and quality checks before leaving our factory and comes with a manufacturer warranty. Our strict environmental policy takes the full life cycle of your lift into account; from sourcing and manufacturing to energy consumption and recycling.

All Cibes lift models carry the CE mark and go through extensive testing and quality checks before leaving our factory. Our lifts are certified products that comply with European Safety Standard Machinery Directive 2006/42/EC. The brand Cibes Lift is owned by Cibes Lift Group AB ©. For more product details and information about the product and accessory selection, contact Cibes Lift Group AB. This product information is general and we reserve the right to modify product design and specifications. Minor deviations in colour reproduction can occur. © CIBES LIFT GROUP AB.
