**CIBES TWO
UPGRADE KITS**

**CLASSIC &
CIBES AIR**

UPGRADE YOUR LIFT TO THE LATEST STANDARDS

Over time materials get worn, lift standards change and design trends evolve. Regardless if you want to extend the life cycle of your lift, enhance the level of comfort and safety, or just update your lift with a new and fresh design, you should check out our upgrade kits.

HOW TO ORDER AN UPGRADE KIT

1.

Contact Cibes

The first step is to send a request to your local Cibes representative. We have a worldwide network of distribution and local agencies in 20 countries. If you do not find a local Cibes representative in your country, please contact us at www.cibeslift.com.

2.

Quotation

Once we have received your request, your local Cibes representative will provide you with a detailed quotation for the chosen upgrade kit. Your quotation is valid for 3 months.

3.

Order

If you are happy with the quotation, your local Cibes representative will send you an order confirmation, which needs your approval. As soon as we receive your order approval, the manufacturing of your upgrade kit can start.

4.

Delivery & Installation

Our upgrade kits are manufactured in our factory in Sweden. As soon as your upgrade kit is ready, we will arrange the transport to your chosen address and your local Cibes representative will help you install the upgrade kit.

We take care of the transport arrangements. You and your local Cibes representative only need to agree on the place of delivery and installation date.

The delivery time of your upgrade kit depends on the lead time at our factory and where in the world you live. Contact your local Cibes representative for more information.

CLASSIC UPGRADE KITS

The classic upgrade kits offer you the freedom to make your own selection.

1. Safety bar
The top safety bar, placed at the top of the platform control panel, stops the lift at the slightest touch. Delivered in natural, anodised aluminium.

2. Handrail
The handrail is an important comfort and safety feature of the platform design. Delivered in natural, anodised aluminium.

3. Platform cladding
The platform cladding is divided in 3 parts: 2 cover plates on either side, with a service hatch in the middle. Delivered in grey RAL 9006 as standard, in any RAL or premium colour as an option.

4. Flooring
We offer you the choice between 10 hardwearing and anti-slip resistant safety floors. Delivered in black as standard, or in 9 other colours as an option.

5. Call button (door)
Water resistant call button in stainless steel. The face plate is delivered in natural, anodised aluminium as standard, in any RAL or premium colour as an option.

5. Touchscreen call button (door)
The touchscreen call button has an elegant, contemporary design, which includes an integrated level indicator. Suitable for indoor lifts only.

6. Overlay/text (control panel)
Replacing the control panel overlay is a great way to brush up the look of your lift. We offer you the possibility to get a tailored design of the overlay, as long as the mandatory information is included.

7. Control panel
The control panel with the classic 2006 design is delivered in natural, anodised aluminium. The control panel is available in a pre-CiCon and a CiCon version.

8. Folding seat
The folding seat is delivered in solid wood and chromed steel and can take a load of max 150 kg. The seat provides flexible comfort and is available for lift types A5000 and A8000.

9. Floor level indicator (pre-CiCon)
Level indicator compatible with lifts with the old control system. The level indicator can be placed on the doors and on the platform.

9. Floor level indicator (CiCon)
Level indicator compatible with lifts with the CiCon control system introduced in 2017. The level indicator can be placed on the doors and on the platform.

10. Cover plate (under platform)
The cover plate under the platform gives the lift a clean and elegant look. Delivered in white RAL 9016 as standard, in any RAL or premium colour as an option.

11. Cover plate for the pit floor
The cover plate for the pit floor gives the lift a clean and elegant look. Delivered in white RAL 9016 as standard, in any RAL colour or premium colour as an option.

12. Safety edges
The safety edges, placed around the platform floor, stop the lift at the slightest touch. Delivered in grey.

13. Shaft panels
Steel panels in white as standard, RAL or premium colour as an option. Glass panel frames in natural, anodised aluminium as standard, RAL or premium colour as an option.

14. Fire drive
The fire drive is an important safety feature. It sends the platform to the pre-programmed landing of your choice, if the fire alarm is activated.

15. Automatic shaft light
The automatic shaft light is a smart and energy-saving feature, which automatically turns off the lights after a preset delay.

COMPOSE YOUR KIT

You have the freedom to compose your own unique upgrade kit.

If you do not find the lift parts you are looking for in our proposed kits, just contact your local Cibes representative and we will sort something out!

THE CIBES AIR UPGRADE KIT

Upgrade the vertical part of the platform to our brand new Cibes Air .
Our latest platform lift, the Cibes Air, combines timeless Scandinavian design,
intuitive function and natural materials to offer you a unique experience where
form and function work together in perfect harmony.

The Cibes Air has a unique, ergonomic handrail with integrated destination buttons. Simply lean on the handrail to travel.

The emergency stop and alarm button of the Cibes Air have a discreet, and elegant design, created exclusively by and for Cibes.

CIBES AIR WOOD

Cibes Air Wood is a sophisticated mix of wood for the back panel and velvety smooth black, white or beige DecoLegno® for the front panel.

To get an overview of the available options, please visit www.cibeslift.com.

OAK

BAMBOO

CIBES AIR TEXTILE

Cibes Air Textile is a playful combination of natural fabric for the back panel and powder coated metal for the front panel.

To get an overview of the available options, please visit www.cibeslift.com.

LINEN

WOOL

CIBES AIR METAL

Delivered with a black back panel and a white front panel as standard, the Cibes Air Metal design offers you great freedom to create your own unique colour combination.

To get an overview of the available options, please visit www.cibeslift.com.

RAL 9005

RAL 9016

The front panel of the Cibes Air includes a 7" display with a level indicator, covered with elegant mirror glass.

COMPATIBILITY OF UPGRADE KITS

The compatibility of our different upgrade kits with your lift depends on the lift model and version of the control system. The manufacturing periods mentioned below are approximate. For information about the upgrade possibilities for your specific lift, please contact your Cibes representative.

All Cibes lift models carry the CE mark and go through extensive testing and quality checks before leaving our factory. Our lifts are certified products that comply with European quality standards, Machinery Directive 2006/42/EC and EN 81-41. This product information is general and we reserve the right to modify product design and specifications. Deviations in colour reproduction may occur. For critical colour matches, physical painted colour samples are recommended. The brand Cibes is owned by © Cibes Lift Group AB.
