## TRANSPARENCY PLUS SOUND INSULATION

Operable partition systems from DORMA Hüppe –  
a perfect combination of function and design

# FLEXIBLE SPATIAL UTILIZATION IN STEP WITH THE TIMES

Fast and convenient room size variability

## Glass for an atmosphere of wellbeing

A dance school is a place that provides positivity to people with a passion for music and movement. In contemporary interior design, glass is regarded as the number-one trend-setting material – it creates bright, atmospheric rooms that engender a real feel-good factor. Even when closed, operable partitions of glass create openness and generous spatial depth.

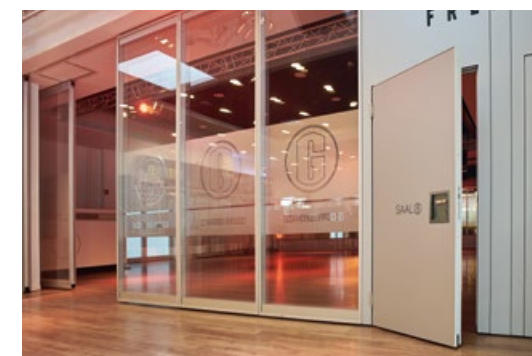

## Good sound insulation for parallel events

The DORMA Hüppe Variflex operable partition system with Variflex Glass panels is perfectly suited for dance schools and event centers, where good sound insulation combined with contemporary transparency is an essential requirement. Depending on the model selected, Variflex 88/100 will even achieve sound reduction indices of up to  $R_w$  59 dB\*, thus reliably preventing noise interference from one room to the other across the partition.

Here: a slow fox-trot for beginners; through there: salsa for improvers – all happening at the same time. And in the evenings, maybe a disco or prom with the whole floor opened up – all typical events encountered in the modern dance school wishing to offer its attendees a broad program with a variety of regular highlights and experiences. The intelligently designed movable wall systems from DORMA Hüppe make it easier for you to respond flexibly to the changing spatial requirements that result from offering such choice.

DORMAcoustic for good room acoustics

## The mirror – a must in any dance school

Mirrors in dance schools are indispensable for the participants to be able to observe and control their movements. The Variflex operable partition system offers mirror elements with edges ideally protected by an all-round profile.

For pleasant room acoustics, a combination of mirrors and sound-absorbing surfaces, such as partitions with DORMAcoustic panels, is recommended.

## Individually tailored movable wall solutions

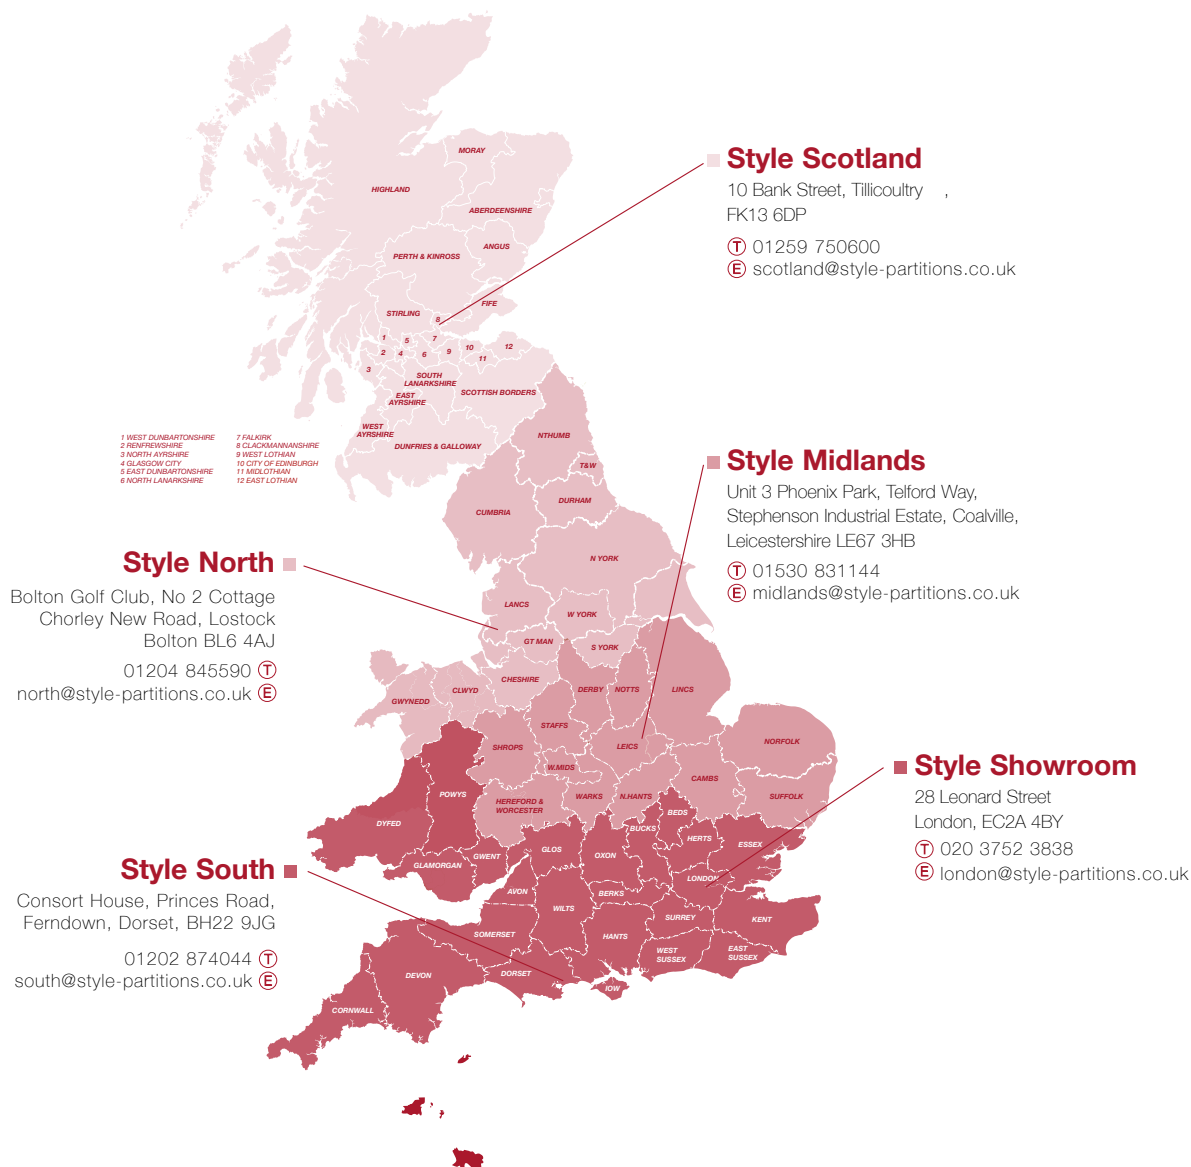

Looking for more scope in your spatial planning? Then take advantage of our free consultancy service – and find the perfect solution to match your requirements, your spatial conditions and your taste. Aside from planning and design, DORMA Hüppe also offers a professional after-sales service to ensure the sustainable, reliable operation of your room partition system. Talk to us! We are there for you.
