QUICK SLIDE

More than a decade ago, Quickslide were pioneers in developing a window system that offered PVCu sliding such windows.

Since then, additional and alternative products have been released into the market. Most notably aluminium Bi-Folding Doors. Quickslide saw this as a natural evolution and expansion to their existing product range, so in conjunction with 'Smart Systems' Quickslide are proud to offer the 'Visifold 1000' Bi-Folding Door system.

The Quickslide Bi-Folding Door range is fabricated on a dedicated 100,000ft site in Brighouse, West Yorkshire.

Made in Britain

Why Choose Quickslide?

Every single door is manufactured to the exact size and colour combination you require. No set or standard sizes, just what you want, when you want it.

With an online ordering facility allowing you to design and order your doors any time, any day. No salesmen, cold calling or waiting.

Our staff have been trained on every aspect of these products and are able to offer advice on specification, installation and configuration as well as answering any other queries you may have.

Our dedicated website is packed full of information. Try it for yourself – www.quickslide.co.uk

Bring the **Outside, Inside**

By opening entire façades in your home and making the most out of an attractive garden. These beautifully designed, versatile doors are suitable wherever you want to transform your home; living room, bedroom, kitchen, conservatory, the choice is yours.

Stainless Steel Rollers

The modern aesthetics of our bi-folding door will add a touch of finesse to any external aspect of your home. When closed, our bi-folding doors complement your home with a striking glass façade using attractive curved profile that is pleasing to the eye. Fold the sashes back to give a stunning opening that draws the exterior ambience into the comfort of your home.

Curved Sashes

Our bi-folding doors come with all the assurances you would expect from a quality designed product. The aluminium profiles give strength and durability to ensure a structurally sound product that requires minimal maintenance and delivers reliable performance over a lifetime of use.

Intermediate Handle

Gliding on stainless steel rollers allowing unrestricted thoroughfares and the maximum use of space and light. The signature smooth contours and curved clean lines create an attractive aesthetic that will complement any home, whatever your taste or style.

Security for Your Home

One of the most important considerations when purchasing new windows or doors is security. Rest assured that Quickslide have included some of the most effective locking systems available on modern bi-folding doors.

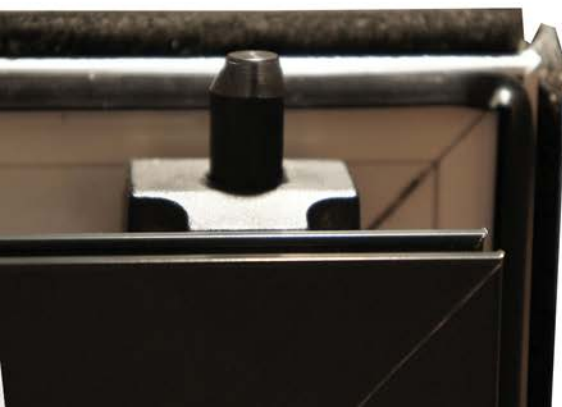

Multi-Point Locking System

The locking system which is applied to all independently opening traffic doors has been accredited with 'Secured by Design' status. It is a multi-point locking system much the same as you would find on a modern composite or PVCu door.

High Security, Anti-Snap Locking Cylinders

In addition to the high security locking system included, we are also able to offer anti-snap locking cylinders to further increase the security of your door. All locking cylinders fitted to your door will be 'keyed alike' meaning that one key will operate all of the cylinders (if applicable). This will apply to both standard and high security locking cylinders.

Shoot-Bolt System

The emphasis on security is continued throughout the rest of the door as well. The intermediate doors that also open will carry a shoot-bolt locking system which engages to the top and bottom of the frame to ensure that these doors are also completely secure.

12

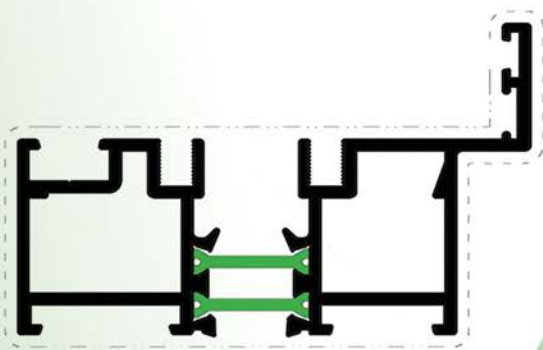

Developed to Achieve Exceptional Thermal Performance

These Initiatives Include;

Weather testing to BS6375 Part 1. The doors include multiple rigid rubber seals and draught excluders to ensure that you get nothing but sunlight passing through your doors.

The Visofold aluminium profile system utilises the latest polyamide thermal barrier technology. This advanced profile technology creates a thermal transmittance barrier between the cold outside and the warm inside keeping your home warm and comfortable even in the coldest weather.

Glass specification is one of the key choices which will affect the products thermal performance as it generally accounts for 80% of the surface area of the product. Each door set carries 28mm double glazed units incorporating Low E toughened safety glass manufactured and tested in accordance with British Standards.

Cross Section

Modern and **Aesthetically Pleasing**

Integral blinds are designed to offer a modern, aesthetically pleasing and no hassle alternative to curtains and internally hung blinds.

With the blinds hermetically sealed inside the glass unit, it means that you never have to worry about getting your duster out again!

The blinds come with a facility to slide up and down and tilt to reduce light if needed. This is achieved using magnets located on the outer casing of the blind which you simply slide up and down to operate the different facilities.

The blinds are available in 16 different colours and you are also able to specify different colours for the outer casing and the fans giving you the opportunity to have something totally unique.

This beautiful addition acts as the perfect accessory to our stunning bi-folding doors giving you absolute control of shading, privacy and temperature.

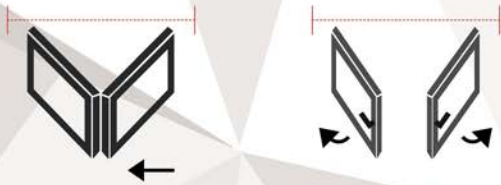

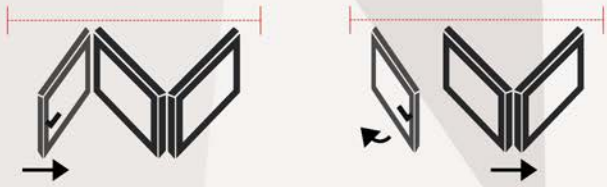

Configuring Doors to Suit Every Home

Note: All door styles can open inside or outside and be either left or right handing.

Standard Colours

Our aluminium bi-folding doors are available in an array of 'off the shelf' standard powder coat colours and finishes. Included in this, you can also specify a dual-colour meaning that you can have any combination of the standard colours inside and outside.

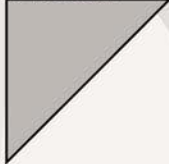

RAL Colours

As well as our standard colour choices, we are also delighted to be able to offer a bespoke colouring service too. For a complete list of available colours, please refer to our online bi-folding door pricing facility. As with the standard colour, the RAL colours can also be supplied in dual colour finishes.

Sensations Colours

This unique textured finish is achieved by the inclusion of an acrylic powder included in the powder coating process. One of the key advantages of this particular finish compared to a normal powder coat aside from the aesthetics is that it is much more durable and resilient than the standard coating. Once again even these finishes are available in a dual-colour.
