Safety Components Guide

Specifying Kee Klamp® Components

Each fitting has a simple numerical code reference, which defines the type of fitting and the pipe size, or sizes, it is designed to receive. The first number, preceding the dash (-) identifies the type of Kee Klamp® fitting. A single digit, following the dash, defines tube size. Two single digits after the dash indicate that the fitting is designed to receive two sizes of tube.

Examples:

10-8 → Both sockets 'A' and 'B' designed to accept tube size 8

45-76 → Socket 'A' designed to accept tube size 7, Socket 'B' designed to accept tube size 6

10 → Kee Klamp® Fitting Type 10

45 → Kee Klamp® Fitting Type 45

Kee Klamp Fittings Size	Tube Diameter mm o/d	Nominal Bore in
