

Mendip 
Stoves

**NEW COOKTOP
MODELS FOR
2025**

Mendip Stoves are created and constructed with thought and care. Design and quality are key in all our stoves. Each stove is tested for ease of use and durability, our designers have maintained each stove's own individual style to complement your fireplace or hearth. This combination of form and function make Mendip stoves a great choice. Each stove is named after a village in the beautiful Mendip hills in Somerset where we are based.

Quality Stoves

Mendip stoves are designed in Somerset with the express ideals to deliver quality and design to your home. Our stove designs are available in a range of sizes and shapes to suit your requirements. Mendip stoves have robust cast iron doors & grates. The burn chambers are lined with vermiculite to enhance the combustion characteristics.

Attention to the manufacturing detail means that we are able to offer an extended warranty against manufacturing defect of 5 years. Our stoves are all UK designed and the Woodland models are manufactured in our new factory in Somerset.

Burning Wood in a Smoke Control Area

Mendip stoves are tested for use as a wood burning stove in a smoke controlled area. Please check the symbol on each page to see if your specific choice is suitable for burning wood in a smoke control area.

Build and Certification

Mendip Stoves are manufactured by an established company with a history of stove production, assuring you that your stove was beautifully built by experienced craftsman using today's most cutting edge technology. Mendip Stoves are manufactured to exceed British standards with demand for quality at every stage from its heavy duty steel body to the ergonomically designed door handle, every detail has been meticulously considered.

The simple to operate air controls have been carefully considered so as not only to ensure the most efficient combustion possible but also to pass a continuous stream of air over the front glass helping to keep your view of the fire unimpeded. All Mendip stoves are UKCA and CE Marked. This means that your stove has been independently tested to exacting British and European standards for heating efficiency, safety and emissions.

PRODUCT INFORMATION

For an overview at a glance here are some symbols which give information about Mendip Stoves.

Designed to burn

The icons denote which fuel each stove is designed and tested to burn.

Gas Stove

Natural Gas and LPG appliance.

Electric Appliance

Closed Combustion

This stove is capable of burning with external air via a connection pipe.

3 flow air system

The Mendip stoves range has a 3 flow air system to provide an optimal level of combustion air where it is needed for the combustion process. This results in an especially clean and efficient combustion.

12mm Floor Plate Compatible

This stove is capable of being installed on a 12mm glass plate.

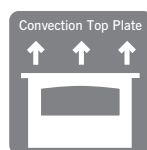

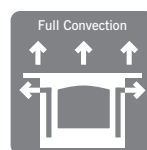

Construction

Model is manufactured from steel and fully welded construction.

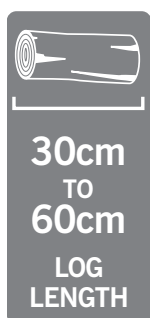

Cast Iron Door

Model fitted with Cast iron door.

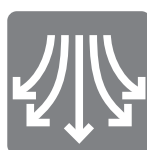

Convection stove

Mendip stoves are fitted with a convection top or full convection to give better heat distribution.

Log size

Mendip Stoves are designed for common lengths of logs 30cm to 60cm.

Air wash system

Model is fitted with an air wash system for cleaner glass.

Low VOC Paint

Eco Design

Eco design ready stoves are designed to reduce PM emissions by burning wood more efficiently and completely

Suitable for burning wood in a Smoke control area

Mendip stoves carrying the tick logo are approved for burning wood in a smoke control area. Special note should be taken to the manufacturers instructions on burning the stove in a smoke control area.

Eurostoves is a ISO 9001 registered company

ClearSkies is an objective & independent emissions and energy performance certification scheme of stoves and fireplaces.

CAST IRON OPTIONAL COOKTOP

THE WOODLAND LARGE DC

THE WOODLAND DC LOGSTORE CONVECTOR + (WITH OPTIONAL 8MM BASE)

Dual Control Model

The Woodland Dual Control (DC) Model features a dual-control air system, giving you precise control over the air entering the stove for efficient operation. It includes an air wash system to keep the glass clear. An optional cast iron cooktop is available, and if installed, a rear vertical flue adapter is recommended for optimal setup.

'Best Stove 2016'
Under 5 kW category
Hearth & Home Awards 2016

THE WOODLAND RANGE

The Woodland stove range features two models: the Woodland and the Woodland Large, both available with an optional Cooktop plate for convenient cooking. Designed for efficient wood burning, these stoves utilise an easy-to-use Dual Control system for optimal combustion, while the effective air wash system keeps the glass clean.

Manufactured and designed in Somerset, the Eco-design chamber employs tertiary air to enhance post-combustion, ensuring a cleaner burn and maximising heat energy from your fuel. With generously sized fireboxes, Woodland stoves easily accommodate standard 30cm cut logs.

The Woodland model showcases a wide viewing glass that brings the fire to life, creating a striking focal point in your home. Constructed from quality steel with a durable cast-iron door, there's a Woodland size to fit your needs.

Additionally, these stoves have low distances to combustible materials, making them an excellent choice for both timber-framed and traditionally constructed houses. Experience the perfect blend of warmth and style with the Woodland stove range, designed to enhance any living space.

Now available with an optional black handle.

WOODLAND LOG-STORE ELECTRIC

WOODLAND ELECTRIC

Pairing up with market leader Ilekto, Mendip Stoves are proud to introduce the new Woodland Electric MK2. Crafted with an unwavering commitment to aesthetics, we've seamlessly translated the timeless appeal of the original woodburning stove into the realm of electric fires.

Envision a captivating atmosphere in any room, where the hallmark features of the Woodland Electric shine. A sizeable glass frontage and an expansive fire chamber come together to conjure a delightful ambience.

The Woodland Electric is adorned with a lifelike log set, perfectly suited for those seeking the charm of a traditional woodburning stove without the installation constraints.

Control takes a graceful form through an intuitive remote, allowing you to effortlessly manipulate flame speed, select from an array of flame and bed colours, and even amplify the vibrancy of these hues, all from the comfort of your armchair. Tailor its warmth through programmable timers or by establishing a minimum room temperature.

Available with a choice of black or silver handle.

ASHCOTT

THE ASHCOTT RANGE

The Ashcott and Ashcott wide stoves have a deeply contoured cast iron door, slim convection top plate and sculptured cast iron legs. The door has a magnetic mechanism for easier closing. The stoves compact design is a perfect blend of classic and contemporary styling. The fire is captured through the large ceramic glass window and the stove is finished with a stainless-steel handle and air control knob.

The Ashcott Wide has a broader stance but is narrower than the standard Ashcott, the wide model is fitted with a catalyst to minimise emissions. Ashcott's have slick vermiculite lining which ensure efficient combustion. Each model is available with a pedestal (Ashcott only) and or Logstore options. Both Eco design ready models provide 5.0kW of heat and have a direct external air connection as standard.

LOXTON 3 COOKTOP LOG-STORE IN ENCLOSURE

THE LOXTON 3 COOKTOP

The Loxton 3 is a charming small stove that balances efficiency and functionality. With its cast iron cooking plate, it invites delightful rustic cooking while providing warmth and comfort to your space. An extended pan resting plate adds to its convenience.

Ideal for small rooms, the Loxton 3 features a special enclosure designed for timber buildings. It is available in both standard and log store models, ensuring versatility to meet your needs. The easy-to-open push/pull handle and sturdy cast iron door enhance user-friendliness.

The stove's effective air wash system keeps the glass clear, offering an unobstructed view of the fire and enhancing the cosy atmosphere.

Additionally, cooktops are available on the Loxton, Churchill, and Woodland 5 and 8kW models, providing even more cooking options. The Loxton 3 is the perfect choice for those seeking a cute and efficient stove that combines style with practicality. The Mendip Loxton 3 Cooktop won the 2024 "Best Stove Award" for combining traditional aesthetics, modern eco-friendliness, and cooking versatility.

LOXTON 5 DC

New Dual Control Model

The Loxton 5 & 8 Dual Control (DC) Model features a dual-control air system for precise management of air intake, ensuring efficient combustion and operation. The integrated air wash system helps keep the glass clear for better visibility. An optional cast iron cooktop can be added, and when installed, a rear vertical flue adapter is recommended for an optimal flue configuration.

LOXTON 8 DC

THE LOXTON RANGE

The Loxton range offers outputs from 3 to 8kW, allowing you to match the stove's output to your room size. Built for efficiency, the Loxton uses advanced combustion techniques to burn wood cleanly and efficiently. The Dual Control (DC) models enhance the Loxton design with a cast iron door, a turn-to-open handle, and a larger glass area, making them ideal for both contemporary and traditional homes.

The pre-heated secondary air wash keeps the glass clear while supplying hot air to the fire for better combustion.

An optional cast iron cooktop is available, and when installed, a rear vertical flue adapter is recommended for optimal setup, allowing you to warm a kettle.

Additionally, the model features an external air connection via an 80mm pipe for all combustion air, enhancing performance in airtight homes. Its clean design, large glass window, and user-friendly dual control air system make airflow adjustment simple and efficient.

LOXTON 5 DC LOGSTORE (WITH OPTIONAL 8MM BASE)

New Dual Control Model

The Loxton 5 Logstore DC incorporates our new dual control air system, where you are given greater control over the air entering the stove. This allows you to operate your stove as precisely and efficiently as possible, whilst keeping the glass clear with an impressive air wash system.

LOXTON LOGSTORES

The Loxton Logstore models feature a sturdy cast iron door and adds height and presence, making it perfect for freestanding installations. It mirrors the contemporary design and build quality of the standard Loxton models, while also providing a convenient log storage area. Built with efficiency in mind, the Loxton Logstore incorporates advanced techniques to ensure clean and efficient wood burning.

The pre-heated secondary air wash keeps the glass clear while supplying hot air to the fire for better combustion.

An optional cast iron cooktop is available, and when installed, a rear vertical flue adapter is recommended for optimal setup, allowing you to warm a kettle.

Additionally, the model features an external air connection via an 80mm pipe for all combustion air, enhancing performance in airtight homes. Its clean design, large glass window, and user-friendly dual control air system make airflow adjustment simple and efficient.

CHURCHILL 5 DC

New Dual Control Model

The Churchill 5 DC incorporates our new dual control air system, where you are given greater control over the air entering the stove. This allows you to operate your stove as precisely and efficiently as possible, whilst keeping the glass clear with an impressive air wash system.

CHURCHILL 5 CONVECTION LOGSTORE

CHURCHILL 8 LOGSTORE DC

CHURCHILL RANGE

Churchill convection stoves have gently curved side panels to give a distinctively different look. Convection stove panels provide improved heat distribution by transferring heat to the room more effectively and efficiently than their radiant counterpart. The distance to combustible materials is lower than in a standard radiant stove as well, and, therefore, more suited to timber-framed buildings and open plan areas.

The Churchill Convection Logstore is a stylishly tall contemporary stove range with outputs from 5kW to 8kW.

These efficient stoves utilise the latest combustion technology with an effective airwash and tertiary ports to aid secondary combustion. The raised fire chamber enables easy reloading of your stove and an excellent view of the fire from your living room chair. The store area below the firebox is suitable for storing your days fuel thus giving added convenience to the daily task of restocking wood. Their simple but sophisticated air control systems are designed to seamlessly mix primary, secondary and tertiary air to give the best possible combustion. Churchill models are designed with an external air connection allowing combustion air to come from outside.

Eco RATING

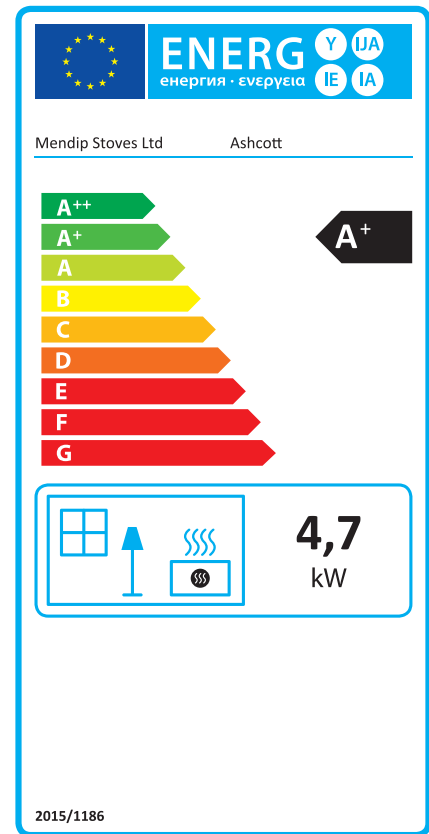

Ecodesign is the European-wide programme to lower emissions. It came into force in 2022. Mendip Stoves have created new stoves that will meet the lower emission limits set out in the new standard now, so you can be comfortable that your new stove is one of the cleanest burning in the market today.

ClearSkies is an objective & independent emissions and energy performance certification scheme of stoves and fireplaces.

Mendip Stoves are all Eco-Design and designed to reduce emissions by burning wood more efficiently and completely.

90% LESS
PARTICULATES

All Ecodesign Ready Stoves in the Mendip Stoves range have at least 90% less particulates than an open fire.

1 - 2
SPLIT LOGS
PER HOUR

Ecodesign Ready Stoves in the Mendip Range, burn wood more cleanly and effectively meaning you only need 1-2 split logs an hour for a 5kW stove.

Ecodesign Ready Stoves are 60% more efficient than an open fire.

Mendip Stoves on average are 30% cleaner than the Ecodesign Standard.

**Celebrating
20 years.**

Mendip Stoves are part of Eurostove Ltd

5 Year Extended Warranty

Mendip Stoves have a two year warranty which can be extended to a 5 Year Warranty when your stove is bought and installed by a registered retailer and installer (terms and conditions apply). The extended Warranty covers the steel body & door castings but does not cover damage caused by faulty operation such as overheating of the stove. The Guarantee does not cover replacement consumable parts such as glass, grates, ropes seals or firebricks. Stoves purchased from a non-registered retailer are covered by a 12 month warranty.

Gas and Electric stoves have a one year warranty on gas and electrical parts.

For full information please consult our website.
