

## Turnkey installations

In addition to our simple wholesale supply ethos over the last eight years Elite Precast Concrete has also developed trading partnerships with a number of strategically placed and highly skilled contractors who can in turn offer anything from a simple off-load and install service (under a client's supervision) to a full turnkey installation as detailed overleaf...

# A typical turnkey installation

1. A site visit to carry out a detailed site survey and discussion of your requirements.
2. Full set of 3D layout drawings with accompanying stability and ground bearing calcs (completed by an independent consulting engineer backed up with full PI insurance).
3. Tension membrane or full steel roof structures included if required.
4. Full installation service carried out by fully trained operatives in compliance with all current and applicable HSE guidance.
5. 100 year design life warranty for the blocks is given as standard.

These services are available throughout the UK and Elite's construction partners are conveniently located such that there is usually one within two hours of your project.

For further information please don't hesitate to contact Elite Precast Concrete on 01952 588885 or email [sales@eliteprecast.co.uk](mailto:sales@eliteprecast.co.uk)
