ELITE
PRECAST CONCRETE

# Creating safer spaces with **EV Containment Walling**

## Applications

- Contain and separate EVs from surrounding vehicles and assets
- Provide a robust physical barrier against vehicle impact
- Limit the spread of heat during an EV battery thermal event
- Protect adjacent infrastructure, buildings and operational areas
- Create dedicated quarantine and isolation areas
- Improve site resilience with a permanent, low-maintenance solution

## Benefits

- Class A1 Fire Resistant
- High strength concrete
- Fast installation
- Flexible design
- Minimal maintenance
- Simple to build
- Robust and Durable
- Available from stock

JOSCAR REGISTERED · Constructionline Gold Member · RISQS VERIFIED · Achilles TransQ Global MEMBER · bsi. KITEMARK · bsi. KITEMARK · Achilles UVDB AUDITED · Achilles UVDB QUALIFIED · mpa essential materials sustainable solutions · CE · CLASS A1 FIRE RESISTANT

# EV Containment Walling

Elite EV Containment & Protection Walling provides a robust, durable and rapidly installed solution designed to help protect people, vehicles, buildings and critical infrastructure in EV environments.

Manufactured in the UK, our precast concrete walling can be configured around individual site layouts and risk assessments — from dedicated EV quarantine areas to permanent protection.

- **EV charging hubs and forecourts**
- **Multi-storey and surface car parks**
- **Fleet depots and logistics centres**
- **Vehicle repair garages and workshops**
- **Car storage and auction facilities**
- **EV quarantine and isolation areas**

## Two proven walling systems

### Legato® Interlocking Blocks

A high-strength modular walling system offering exceptional durability with fast, straightforward installation.

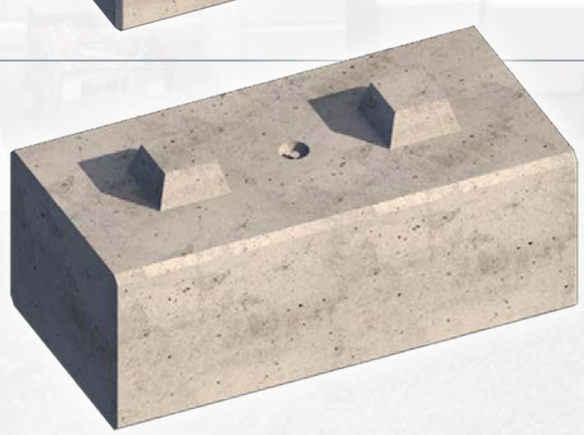

The interlocking design makes Legato® particularly suitable where a robust, adaptable solution is required without the programme associated with conventional in-situ wall construction.

### Duo™ Interlocking Blocks

Duo™ blocks provide a simple, robust and flexible solution for creating EV quarantine and containment areas.

Widely used for storage bay construction, the modular blocks allow practical containment layouts to be created quickly and adapted to suit the operational requirements of the site.
