

Natural wood-wool  
boards **for walls  
and ceilings**

# FIBRO-KUSTIK

# ACOUSTIC COMFORT AND QUALITY OF LIFE

# FIBRO-KUSTIK

## THE +

- > **Wood wool of natural origin:**  
Renewable raw materials
- > **Ecological, sustainable and responsible:**  
The wood is PEFC or FSC certified
- > **Acoustic absorption up to class a:**  
( $\alpha_{w}$  0.90 - 1.0)
- > **Impact resistance (sports halls) and anti-rebound properties (shooting ranges):**  
According to EN 13964
- > **Good thermal performance:**  
In its DUO and TRIO versions (associated wood wool to mineral wool)
- > **High steam permeability**
- > **More than 64 colours to choose from**
- > **Optional:**
  - Customized personalized printing
  - PURE GENIUS air clean treatment

If the reverberation time of the sounds of an interior space is too long, you will quickly feel uncomfortable. The causes of this unpleasant effect come in general presence of hard and smooth surfaces (such as glass, concrete or even plaster), which are not sufficiently absorbent.

Inside a room, noise travels in all directions and waves hit the walls, absorbing each reflection: it is called the echo phenomenon. Achieving the acoustics of a room means controlling the reverberation time by choosing materials with efficient and suitable absorption coefficients.

Correcting the acoustics of a room means reducing the reverberation time and improving intelligibility of speech. Treating the acoustics of a noisy room means applying solutions with high absorbency (high absorption coefficient).

The ceiling generally offers the largest available area of a room, it is therefore the preferred solution for acoustic treatment. When it is not possible to install a complete acoustic ceiling, ceiling islands and / or wall element absorbents can also supplement the treatment.

### FIBRO-KUSTIK

Due to their open porosity structure, the **FIBRO-KUSTIK** ceiling tiles achieve very good values of sound absorption for different types of applications inside the building. The characteristic texture of wood wool panels offers, in addition, multiple creative possibilities.

Available in **4 variants:**

- **Fiber size:** 1 mm or 2 mm
- **Reaction to fire:** A2-s1, d0 or B-s1, d0

#### FIBRO-KUSTIK SOLO

Aesthetic and acoustic slabs:

- Thicknesses: 15, 25 or 35 mm.
- Formats: 600 x 600; 1200 x 600; 2000 x 600.
- Assembly system: demountable or not demountable.
- Sound absorption:  $\alpha_{w}$  up to 0.8.

#### FIBRO-KUSTIK DUO

Aesthetic slab with sound-absorption and thermal insulation performances:

- Thicknesses: 50, 75, 100, 125 and 150 mm.
- Formats: 1200 x 600 (thickness 50 only); 2000 x 600.
- Assembly system: not demountable.
- Sound absorption:  $\alpha_{w}$  up to class A (0.9-1).

#### FIBRO-KUSTIK TRIO

Aesthetic slab with sound-absorption and thermal insulation performances:

- Thicknesses: 35 and 50 mm.
- Formats: 1200 x 600; 2000 x 600.
- Assembly system: demountable or not demountable.
- Sound absorption:  $\alpha_{w}$  up to class A (0.9-1).

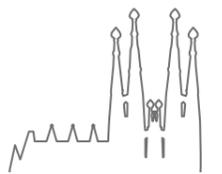

1 mm fiber size

2 mm fiber size

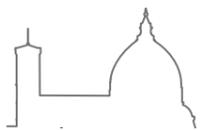

#### FIBRO-KUSTIK BARCELONA

Fire Rate Euroclass B-s1, d0 without flame propagation  
Superfine wood-wool (approx. 1 mm)

#### FIBRO-KUSTIK FLORENCE

Fire Rate Euroclass A2-s1, d0 non flammable  
Superfine wood-wool (approx. 1 mm)

#### FIBRO-KUSTIK BERLIN

Fire Rate Euroclass B-s, d0 without flame propagation  
Fine wood-wool (approx. 2 mm)

#### FIBRO-KUSTIK PARIS

Fire Rate Euroclass A2-s, d0 non flammable  
Fine wood-wool (approx. 2 mm)

# BOARD FORMATS

## 3 BOARDS DIMENSIONS

Adapted formats to all your architectural projects.

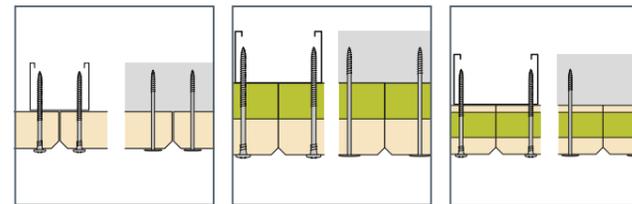

Every version is available in 3 dimensions.

other sizes available on request

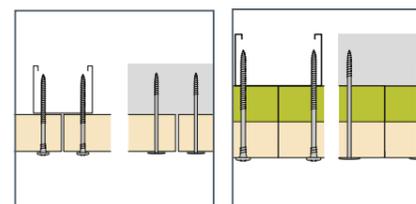

# EDGE PROFILES

## STANDARD EDGE PROFILES AND FIXING METHODS

### SMALL BEVELED EDGES

BEVELED EDGES ON ALL 4 VISIBLE SIDES.  
DIRECTLY MOUNTED, NOT DEMOUNTABLE.

### STRAIGHT EDGE

DIRECTLY MOUNTED, NOT DEMOUNTABLE.

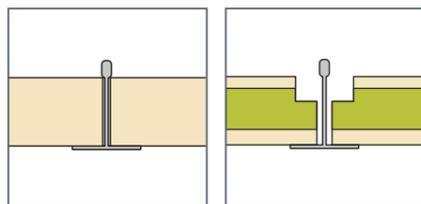

# EDGE PROFILES

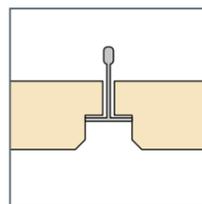

# ANCILLARIES

## PROFILES ON REQUEST

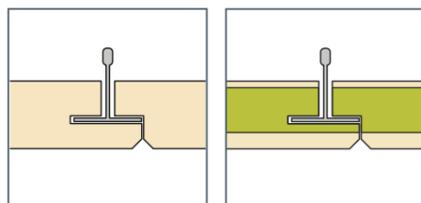

Depending on the inspirations, you can combine edges and installation. **Fibro-Kustik** ceiling tiles can be installed using: Visible T-frame, hidden T-frame, or mechanical fastenings.

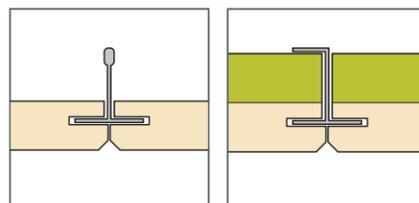

**STRAIGHT EDGE**  
INLAY MOUNTING, DEMOUNTABLE.

**RABBET EDGES ON 4 SIDES**  
BEVELED EDGES ON ALL 4 VISIBLE SIDES.  
INLAY MOUNTING, DEMOUNTABLE.

**NOTCH ON 2 SIDES**  
BEVELED EDGES ON ALL 4 VISIBLE SIDES.  
CONCEALED MOUNTING, DEMOUNTABLE.

**NOTCH ON 2 SIDES**  
BEVELED EDGES ON ALL 4 VISIBLE SIDES.  
CONCEALED MOUNTING, NOT DEMOUNTABLE.

Acoustic tiles can be mounted directly on metal frames traditional with CD type profiles or fixed to the wooden structure with fast fixing screws anti-rust treated. **Soprema** offers white or light beige coloured screws, adapted to natural or white colored tiles. Moreover, **Fibro-Kustik** tiles can be inserted in suspended ceiling standard frames.

### EVDF SCREWS

Quick-fit screws with rust protection for fixing panels to a wooden structure.

Board thickness	Screw length	Colours	Screws / box
15 mm	45 mm	Light beige White	100 units
25 mm	45 mm		
35 mm	65 mm		

### DDS SCREWS

Rust-protected steel screw with special thread. For direct fixing to **Fibro-Kustik DUO** tiles on concrete support. Ø 6 mm drilling and a Ø 25 mm head.

Board thickness	Screw length	Colours	Screws / box
50 mm	75 mm	Light beige White	100 units
75 mm	100 mm		
100 mm	125 mm		
125 mm	150 mm		
150 mm	175 mm		

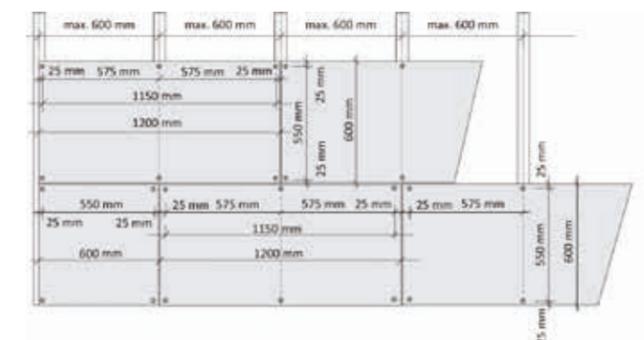

## Mechanical fixing recommendations with EVDF / DDS screw

### SCREWING IN STEPS OF:

- 600 mm for 1200 mm panels length.
- 500 mm for 2000 mm panels length.

### NUMBER OF SCREWS PER PANEL:

- Min. 8 screws per 2000 x 600 panel.
- Min. 6 screws per panel of 1200 x 600.

# FIBRO-KUSTIK SOLO

Decorative and acoustic ceiling tiles based on spruce wood wool (1 mm. or 2 mm. wide fiber), cement and marble powder binder.  
Eco-responsible material, which combines architectural aesthetics and acoustic performance.  
The wood used comes from sustainably managed forests (PEFC™ or FSC™ certifications).  
A wide choice of formats, edges, colours, suitable for all projects.

## Domain of Application

Acoustic ceilings in residential and non-residential construction, e.g. commercial, industrial and public buildings, offices, schools, sports halls, and garages.

## FIBRO-KUSTIK SOLO

### Barcelona

Woodfiber acoustic board according to EN 13168, Euroclass B-s1, d0.  
Superfine wood fiber (approx. 1 mm)

OTHER TEST DATA AND CERTIFICATES AVAILABLE ON REQUEST

# FIBRO-KUSTIK DUO

Decorative and acoustic ceiling tile based on spruce wood wool (1 mm wide fiber), cement and marble powder binder.  
Eco-responsible material, which combines architectural aesthetics and acoustic performance. The wood used comes from sustainably managed forests (PEFC™ or FSC™ certifications). A wide choice of formats, edges, colours, suitable for all projects.

## Domain of Application

Rooms and areas requiring control of reverberation and improved intelligibility.

### Indoor concealed and inlay mounting

Private and collective premises in all types of buildings: residential building, public buildings such as hospitals, school premises, hotels, leisure (theatres, concert halls), industrial premises, etc.

### Outdoor inlay mounting

Horizontal structures under shelter such as courtyards, awnings, undersides of overhanging roofs, etc.

## FIBRO-KUSTIK DUO

### Barcelona

Thermal and acoustic ceiling tile composed of a woodfiber ceiling tile and a mineral wool panel.

Super fine wood wool (approx. 1 mm).  
Reaction to fire B-s1, d0.

# COLOURS COLLECTION

## NATURAL COLOUR

FIBRO-KUSTIK panels can be supplied in natural essence color presenting uneven nuances and tones like those of the natural raw materials used, wood and cement.

## LIGHT IVORY COLOUR RAL 1015

A light paint of LIGHT IVORY colour, wood colour like, is used to give a uniformity appearance to the panels without altering the acoustic performance.

## A palette of more than 64 colours

As acoustics fit into existing spaces and require an aesthetic response, we offer a wide range of colours. An almost unlimited palette of colours is available - you can choose almost any colour from the common colour systems. A palette of 64 design decors is applicable to all tiles, thicknesses and formats. The colours used are highly breathable water-borne paints.

NATURAL or with 1 Homogenization layer
