FIRE RATED SOLUTIONS

PRODUCT OVERVIEW

Our steel fire rated doors are custom-built to provide outstanding fire resistance where building safety is essential. Designed to maintain compartmentation and protect escape routes, each doorset is fully tested as a complete assembly - including door leaf, frame, seals and hardware - to ensure dependable compliance in real-world conditions.

Our broad product range offers between 30 to 240 minutes fire resistance, meeting stringent UK and European standards for fire integrity and, where required, insulation performance.

With extensive configuration options including glazing, louvres, vision panels and advanced locking and access control systems, our steel fire doors provide a long lasting, versatile solution to suit your requirements.

APPLICATIONS

Our fire rated doors are specifically designed for internal and external use in commercial or industrial premises where compartmentation and safe evacuation routes are critical.

Ranging from light commercial properties such as warehouses, plant rooms and service areas, through to education environments, healthcare facilities and data and transport infrastructure, our doors provide a suitable solution for each and every project.

KEY BENEFITS

Proven Protection

- Third party tested to recognised UK and European standards, our steel fire-rated doors are certified for integrity and, where specified, insulation.
- Certification options range from 30 to 120 minutes, with each doorset engineered to restrict fire spread for the stated time period, safeguarding people and property.
- In addition, INNA-DOR and GLAS-DOR are available smoke tested to BS EN 1634-3.

Versatility

- Fire rated INNA-DOR and OUTA-DOR solutions can be configured as a fire exit with panic hardware compliant to BS EN 1125 or BS EN 179.
- OUTA-DOR THERM combines a thermal performance of 1.5W/(m^2K) with 60 minutes fire resistance on request.
- Our TUFF-DOR 2.1 and SECUR-DOR 2.1 certified security doors can be fire rated for up to 60 minutes on request (certain specifications only).

Durability

- Impact resistant – whether that's from knocks, vandalism, or wear and tear.
- All fire rated solutions (excluding GLAS-DOR) are manufactured from Magnelis® steel for exceptional strength and unrivalled corrosion protection.
- Up to 10 years warranty.

ROBUST

PROTECTING
PEOPLE & PROPERTY

If you require dependable fire protection without compromising on durability or design, our complete range of internal and external doorset options meets the demands of any commercial or industrial project.

Many solutions are available as single or double doorsets, featuring over panels, side panels, vision panels, and/or louvres as required – please contact us to discuss your requirements.
