My Sense

MySense

BENEFITS

- Wi-fi connected through your wireless router without any additional hub
- Remotely-controlled by any mobile device with the MySense free APP
- Full colour user friendly, highly intuitive LCD touch screen with easy to read customisable display
- Discreet extra-flat occupancy detector, dual occupancy detection.
- Auto-programmable with dual optimisation feature
- Permanent settings back-up in case of power failure
- Eco-Design innovation pack, comfort, performance and energy savings

Made in France	Low energy consumption	10 years Warranty	Maintenance Free	Eco Friendly controls	PDI Technology
Real Time energy usage	Presence Detection	Open Window detection	Easy accessible advanced start up Control	Fully compliant with acoustic & visual Legislation	Child protection & rental lock functions

Wi-Fi

Smart Radiator

Cost Efficiency	Energy Efficiency	Can be remotely controlled	2 patented wall-mounting brackets	Help for the visually impaired

iSense Wi-Fi Electric Radiator is fully compliant with Eco-Design Lot 20 Energy Efficiency legislation.
With a combination of style, innovation and the latest technology, the new iSense range will propel your electric heating system into the digital age!

Think Smart... Be Smart!

Features

Touch screen

- Fully controllable revolutionary LCD touchscreen thermostat programmer
- State of the art electronic thermostat accurate to +/ - 0.1° C
- Built-in Wi-Fi with intuitive and easy to use app based data analysis software
- Open window detection sensor
- Presence detection with wide range motion sensor
- Weekly Timer Control programmable within the minute
- Auto, Boost, Comfort, Eco, Frost protection, Holiday mode
- Auto-programming with Self Learning process
- Dual optimisation feature
- Energy tariff optimisation
- Real time energy consumption monitoring
- 7 pre-set and customisable programming options
- Geolocation-weather forecast check to heat your home more efficiently and automatically turning the heating on/off when leaving or returning home
- 4 Pre-Set Heating Environments (Commercial, Domestic, Housing, Hotel).

Technical Specifications

- Patented automatic lock, easy and quick to install, anti-tilt wall-mounting brackets
- Robust, double insulated Class II anti leakage heating element
- Double coated aluminium body, epoxy paint
- Fully complying with E.N. 60335-1 Acoustic & Visual signals
- Child Protection & rental PIN Lock functions
- Drilling template supplied
- Proportional Integral Derivative control, activated by a Triac with OTA for remote software updates
- Double overheating protection
- NF Electricity Performance *** , IP24, Class II.
- 10 Years Warranty on the aluminium body - 2 years on the electronics
