

COOL-FIT 4.0

Pre-insulated system for industrial and commercial refrigeration

**Increased efficiency and safety for food and beverage production
and for the storage of food**

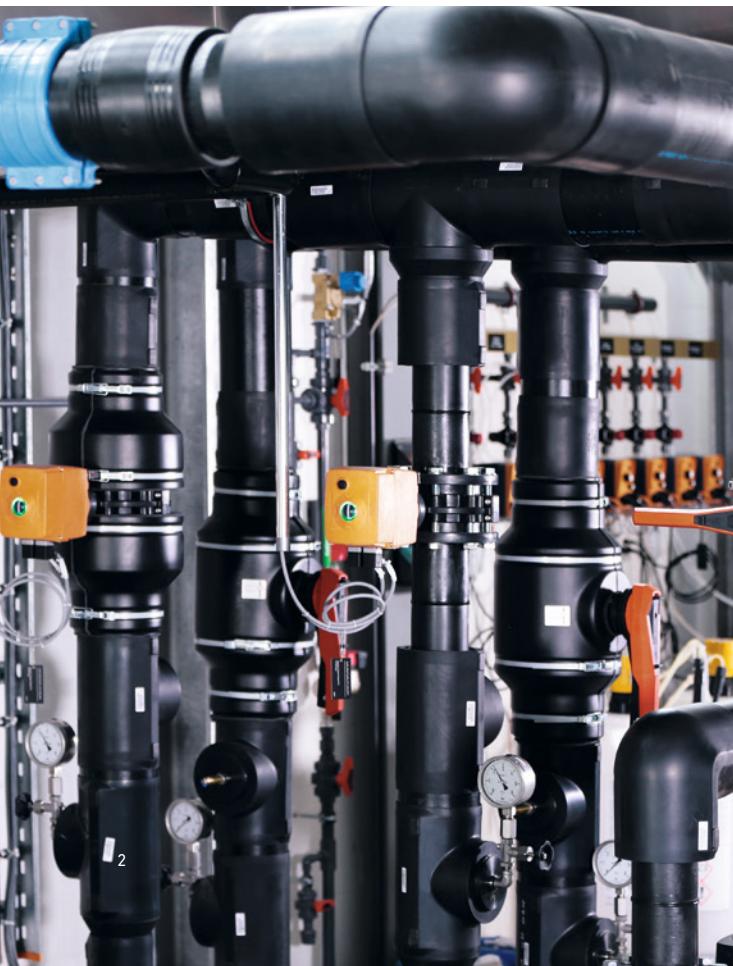

GF Piping Systems

Building the lifelines of the world

GF Piping Systems is the global specialist for the safe and reliable transportation of water, chemicals and gas. Customers in more than 100 countries implement our solutions to work more safely, efficiently and cost-effectively.

Your partner for modern plastic systems

Customers in more than 100 countries are already working with the plastic piping systems that GF Piping Systems introduced more than 60 years ago. They are maintenance-free, resistant to corrosive and aggressive media, and are extremely durable. Their low weight, compared to metal systems, reduces static and logistic requirements. An innovative design and modern jointing technology allows faster and easier installations. All this helps our customers to work more safely, efficiently and cost-effectively. Support throughout the transition from metal to plastic systems is a key focus for our specialists.

+ Maintenance-free plastic

Plastics are corrosion-free and maintenance-free. They have excellent chemical resistance and last as long as the system itself, which is more than 25 years.

+ Complete system solutions

Our portfolio of more than 60,000 products offers complete system solutions, meaning you get perfectly matched components from a single source.

+ Local support

GF Piping Systems specialists are located in 34 countries and are therefore always close at hand, meaning that advice and on-site practical assistance is never far away.

+ Partner in all project phases

The specialists from GF Piping Systems support you throughout all phases of your project – starting from the planning stage, right through to commissioning. This reduces both the time required and risks.

+ Many years of experience

GF Piping Systems is a division of Georg Fischer AG, based in Schaffhausen, Switzerland, which was established in 1802. You benefit from our many years of experience.

+GF+

Efficient cooling with COOL-FIT 4.0

Poor insulation and corroding piping in cooling systems are more than just a nuisance, they pose a hazard to production safety and product quality. Moreover, they cause unnecessarily high maintenance and energy costs. GF Piping Systems offers solutions to help you to optimise your cooling system from the ground up. These solutions ensure continuous production processes, reduce operational downtimes due to leakages and other corrosion damage, and cut your maintenance and operating costs.

The pre-insulated COOL-FIT 4.0 piping system for commercial and industrial refrigeration is particularly beneficial for food and beverage manufacturers and processors. On the following pages, you will find out more about safe and efficient cooling with COOL-FIT 4.0 and how this system can support you.

COOL-FIT

Safe, efficient cooling has never been so easy

COOL-FIT is the successful range of pre-insulated plastic piping systems from GF Piping Systems. It makes cooling applications more efficient than ever before – in all phases of your project. COOL-FIT simplifies planning and installation through superior design, pre-insulation, low weight and modern jointing technologies. COOL-FIT reduces costs through completely maintenance-free operation, energy efficiency, and longevity (more than 25 years). COOL-FIT is environmentally friendly, thanks to its low carbon dioxide emissions throughout the entire service life of the product. The specialists at GF Piping Systems support you in this during all project phases.

100% maintenance-free

The media pipe, insulation and jacket are made of plastic and therefore remain corrosion- and maintenance-free throughout the entire operating life of the system. This reduces expensive downtimes and lowers maintenance costs and personnel requirements.

100 % reliable

The especially smooth interior surfaces of the medium pipe, typical for plastic systems, prevent deposits. The result: no loss of pressure over the entire service life. COOL-FIT remains as efficient as on its first day of operation.

65% less weight

COOL-FIT is significantly lighter than traditional metal systems and therefore places lower structural demands on buildings and supporting structures. The use of heavy transport aids can be reduced at the construction site.

50 % faster installation

Factory pre-insulation eliminates the need for traditional insulation after the installation, which often requires a second team. You receive finished and permanently pre-insulated components, ready for immediate installation.

30 % higher energy efficiency

In combination, the low thermal conductivity of plastic and the highly efficient foam insulation increase the energy efficiency of your system. This helps you to save energy costs and makes your work more environmentally friendly.

COOL-FIT 4.0

Maximum safety and efficiency for your production

COOL-FIT 4.0 is cutting-edge technology for users with the highest demands for production and process safety and for the storage of food. The pre-insulated piping system helps food and beverage manufacturers and processors to work at the highest level of safety and efficiency and to reduce costs.

Industrial and commercial refrigeration involves much more than just regulated temperatures. The focus is on production and process safety as well as the preservation of stored food. COOL-FIT 4.0 is the perfect solution for food and beverage manufacturers and processors.

COOL-FIT 4.0 is the pre-insulated piping system for secondary cooling with brine, glycol, ethanol and chilled water. It is ideal for temperatures ranging from –50 °C to 60 °C. COOL-FIT 4.0 is cutting-edge technology that benefits fruit and vegetable processors, slaughterhouses, breweries and supermarkets in particular. COOL-FIT 4.0 helps you to work with maximum efficiency and without disruption, while simultaneously reducing your maintenance and operating costs.

COOL-FIT 4.0 has the advantages of all COOL-FIT products compared to traditional metal systems:

- 100 % maintenance-free
- 100 % reliable
- 65 % less weight
- 50 % faster installation
- 30 % higher energy efficiency

In addition, COOL-FIT 4.0 offers further key benefits:

Connected within just a few minutes

COOL-FIT 4.0 allows for the simplest, safest and fastest possible installation – no unnecessary or complicated tasks. The system can be installed neatly and easily. Electrofusion permanently connects pipes, fittings and valves in just a few minutes.

COOL-FIT for the environment

COOL-FIT helps you to work in a more environmentally friendly and energy-efficient manner.

#9 overall ranking in the
4th Quarter of 2020
for Wall Streets Journals update
of the world's most sustainably
managed companies.

WSJ

Outdoor installation

COOL-FIT 4.0 can also be installed outdoors without any problems. All surfaces are sealed, weatherproof and UV-resistant. The sealing lip of the fittings surrounds the pipe and thus reliably protects the insulation from water and ice, ensuring a long service life.

Constant quality control

Thanks to the very few installation steps and the use of electrofusion as the jointing technology, COOL-FIT 4.0 enables a degree of control that was previously impossible. Installation errors are largely excluded from the outset, which ensures a system of the highest possible quality.

Clean and elegant system

Installing COOL-FIT 4.0 is safe and clean: no crumbling insulating foam, no sticky insulating tape or filling material, no open flame for closing the seals. The result is also aesthetically appealing, which is important for accessible plants and customer visits.

+ Carbon dioxide emission

+ Energy loss

COOL-FIT is on average 30 percent more energy efficient than metal piping systems that were subsequently insulated with rubber-based foam, in an otherwise identical installation.

COOL-FIT 4.0

Leading technology for easy installation and longevity

COOL-FIT 4.0 is the result of years of development by our engineers with the aim of making the system even easier and faster to install, yet at the same time, remaining as safe, reliable and durable as you expect from all GF Piping Systems solutions. Many crucial details contribute to this.

System properties

* All three materials are permanently connected.

COOL-FIT 4.0		
Materials *	Media pipe	PE100
	Insulation	GF HE foam, halogen-free, closed-pore
	Outer jacket	Pipe: HDPE, fitting: GF-HE
Dimensions		d32 mm (DN25) – d450 mm (DN450)
Jointing technology		Electrofusion joint
Pressure level	d32 – d110	PN 16 bar, SDR 11
	d160 – d450	PN 10 bar, SDR 17
Insulation	Thermal conductivity λ at 20°C	$\leq 0.022 \text{ W/mK}$ (d32 – d110), $\leq 0.026 \text{ W/mK}$ (d160 – d450)
	Density	$\geq 70 \text{ kg/m}^3$
	Foam cell size	max. $\varnothing 0.5 \text{ mm}$
	Thickness (nominal value)	40 mm
Temperature	Medium	-50 °C to 60 °C (ambient -30 °C to 55 °C)
Weight	Pipe d32 mm	1.39 kg/m
(without liquid)	Pipe d225 mm	16.42 kg/m
Environment	Resistance	Moisture- and vapor-proof
	Ozone Depletion Potential (ODP)	Zero
Standards	EN ISO 15494	Plastic piping systems for industrial applications – Metric series
	ISO 7	Fittings
	EN ISO 16135, EN ISO 16138	Industrial valves

Chemical resistance to cooling agents

COOL-FIT 4.0 can be used with various types of cooling agents, such as:

- Water
- Organic salt solutions
- Inorganic salt solutions
- Water-Glycol mixtures up to 50%
- Ice slurry

Refer to the GF Planning Fundamentals for more detailed information.

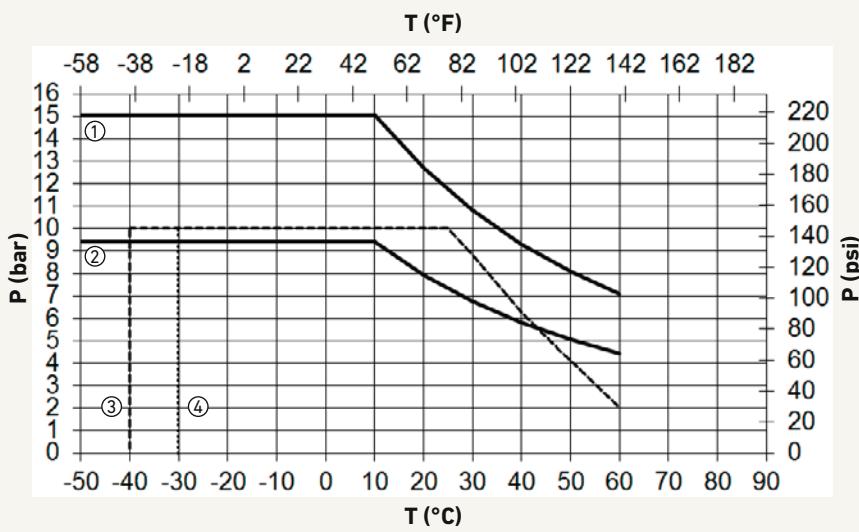

System components

Pressure / Temperature

Medium: Water

Minimum service life: 25 years

Note: With a water/glycol mixture ≤ 50%, the reduction factor for the pressure/temperature diagram 1.1 for pipes and fittings, and 1.7 for valves.

For PN16 or PN10 the safety factor is 1.25

P Operating pressure of the medium (bar, psi)
T Temperature of the medium (°C, °F)
C Safety factor

- ① COOL-FIT 4.0 pipe and fitting d32/D90 – d110/D180, C=1.6, SDR11
 ② COOL-FIT 4.0 pipe and fitting d160/D250 – d450/D630, C1.6, SDR17
 ③ COOL-FIT 4.0 ball valve PN10
 ④ COOL-FIT 4.0 butterfly valve PN10

+GF+

R-Values of COOL-FIT 4.0 pipe

COOL-FIT 4.0 is a pre-insulated plastic piping system designed for cooling applications.

The COOL-FIT 4.0 R-values are based on measurements of thermal conductivity for the pre-insulated COOL-FIT 2.0 pipes, including materials of inner pipe, insulation and outer jacket are the same.

The determination of thermal conductivity at the pre-insulated COOL-FIT 4.0 pipes was carried out by the independent testing institute IMA (Materialforschung und Anwendungstechnik GmbH) in Dresden, Germany, following EN 15632-1, prEN 17414-1 and ISO 8497.

The calculation of areal thermal resistance R of the COOL-FIT pipe was performed according to ASTM C 335.

We hereby confirm the following R-values (COOL-FIT 4.0 pipes):

Dimension d/D (mm)	R-Value (m ² .K/w)
32/90	2.1
40/110	2.5
50/110	2.0
63/125	2.0
75/140	2.0
90/160	2.0
110/180	2.0
160/250	2.1
225/315	2.0
250/355	2.4
280/400	2.7
315/450	3.0
355/500	3.2
400/560	3.5
450/630	4.0

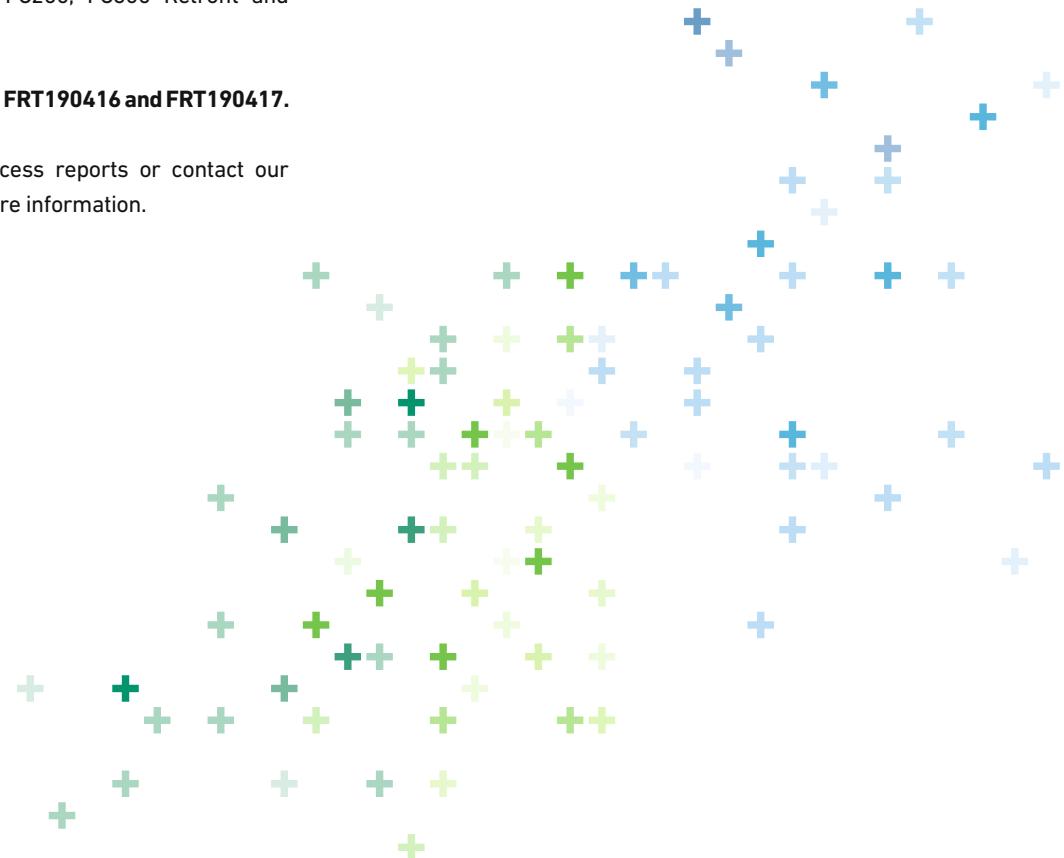

AS 1530.4 Fire Resistance Testing

FRL ratings available for all COOL-FIT 4.0 pipe d32 up to d250mm for concrete slab, plasterboard wall and speedpanel.

Testing and assessment conducted using Promat PROMASEAL FC100, FC150, FC250, FC300 Retrofit and HILITI Retrofit collars.

Report Numbers: FAS190295, FRT190416 and FRT190417.

Visit www.gfps.com.au to access reports or contact our customer service team for more information.

Pre-Fabrication

Adapting our business, to improve yours.

Pre-Fabrication & Customisation

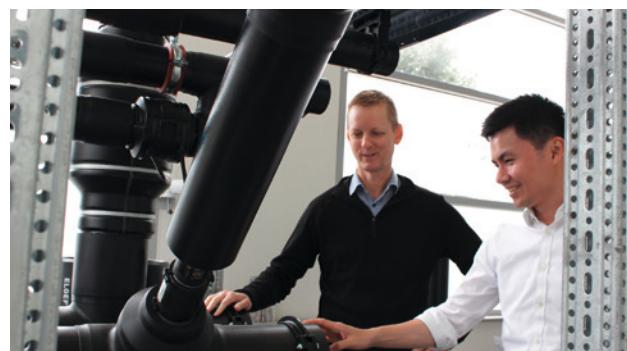

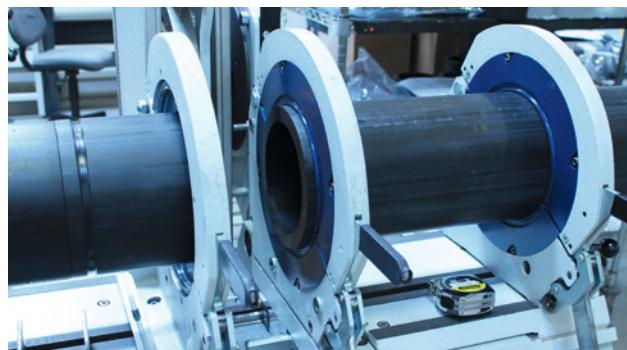

GF Piping Systems can offer you support throughout your project, helping you bring your ideas and concepts to life. Take advantage of our experts and their extensive range of specialised plastic fabrication equipment for customised solutions, tailored made for your specifications. We combined our global footprint with more than 50+ years' of experience working with thermoplastic products, with our local knowledge of the market and our customers' needs to meet their requirements.

Manufacturing

We are here for your peace-of-mind, providing your project with completed flanged spool assemblies from a single source that can simply be bolted together on-site using in-house technicians, thereby saving the time and expense of hiring certified contractors and renting welding equipment.

Fabrication Capabilities

- Fabricated Tees and Sweep Bends up to 800 mm
- Butt Welding: 63 mm – 800 mm
- Electrofusion Welding: 20mm – 1,200 mm
- Saddle Welding
- System Assembly
- Spool and Header Manufacturing
- Extrusion Welding
- Rooftop Water Distribution Modules
- High Point Vents (HPV) and Low Point Drains (LPD) for Coal Seam Gas
- Hydrostatic Pressure Testing
- Signet Assemblies Remote Devices
- Many more ...

Reduced production costs

During the manufacturing and processing of food and beverages, reliable cooling is essential for production that is both faultlessly hygienic and economically efficient. COOL-FIT 4.0 eliminates the risk of downtimes caused by corrosion damage in the cooling system and helps to comply with increasing environmental regulations. COOL-FIT 4.0 is ideal for conversion of secondary cooling systems and connection to existing systems.

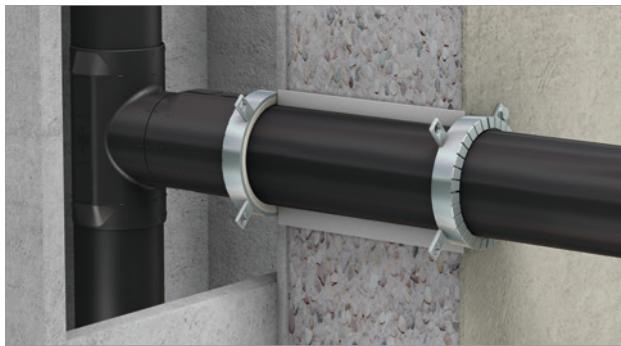

Easy transitions to metal systems

The COOL-FIT 4.0 adapter fittings enable simple and fast transition to metal systems, valves, end devices and chillers, allowing for effortless connection of adjacent systems.

Pre-insulated electrofusion fittings

The range of COOL-FIT 4.0 fittings includes pre-insulated elbows, tees, couplers and reducers. Electrofusion ensures secure joints within just a few minutes, with integrated quality control.

Certified fire protection collars

Often, food and beverage production take places across several compact production areas. In the event of a fire, the fire protection collars reliably seal them off from each other for up to 120 minutes.

Proven fixed point solutions

The fixed point solutions from GF Piping Systems can be welded easily onto the outer jacket. They ensure professional, tension-free installation of COOL-FIT 4.0, even under difficult fitting conditions.

Your benefits

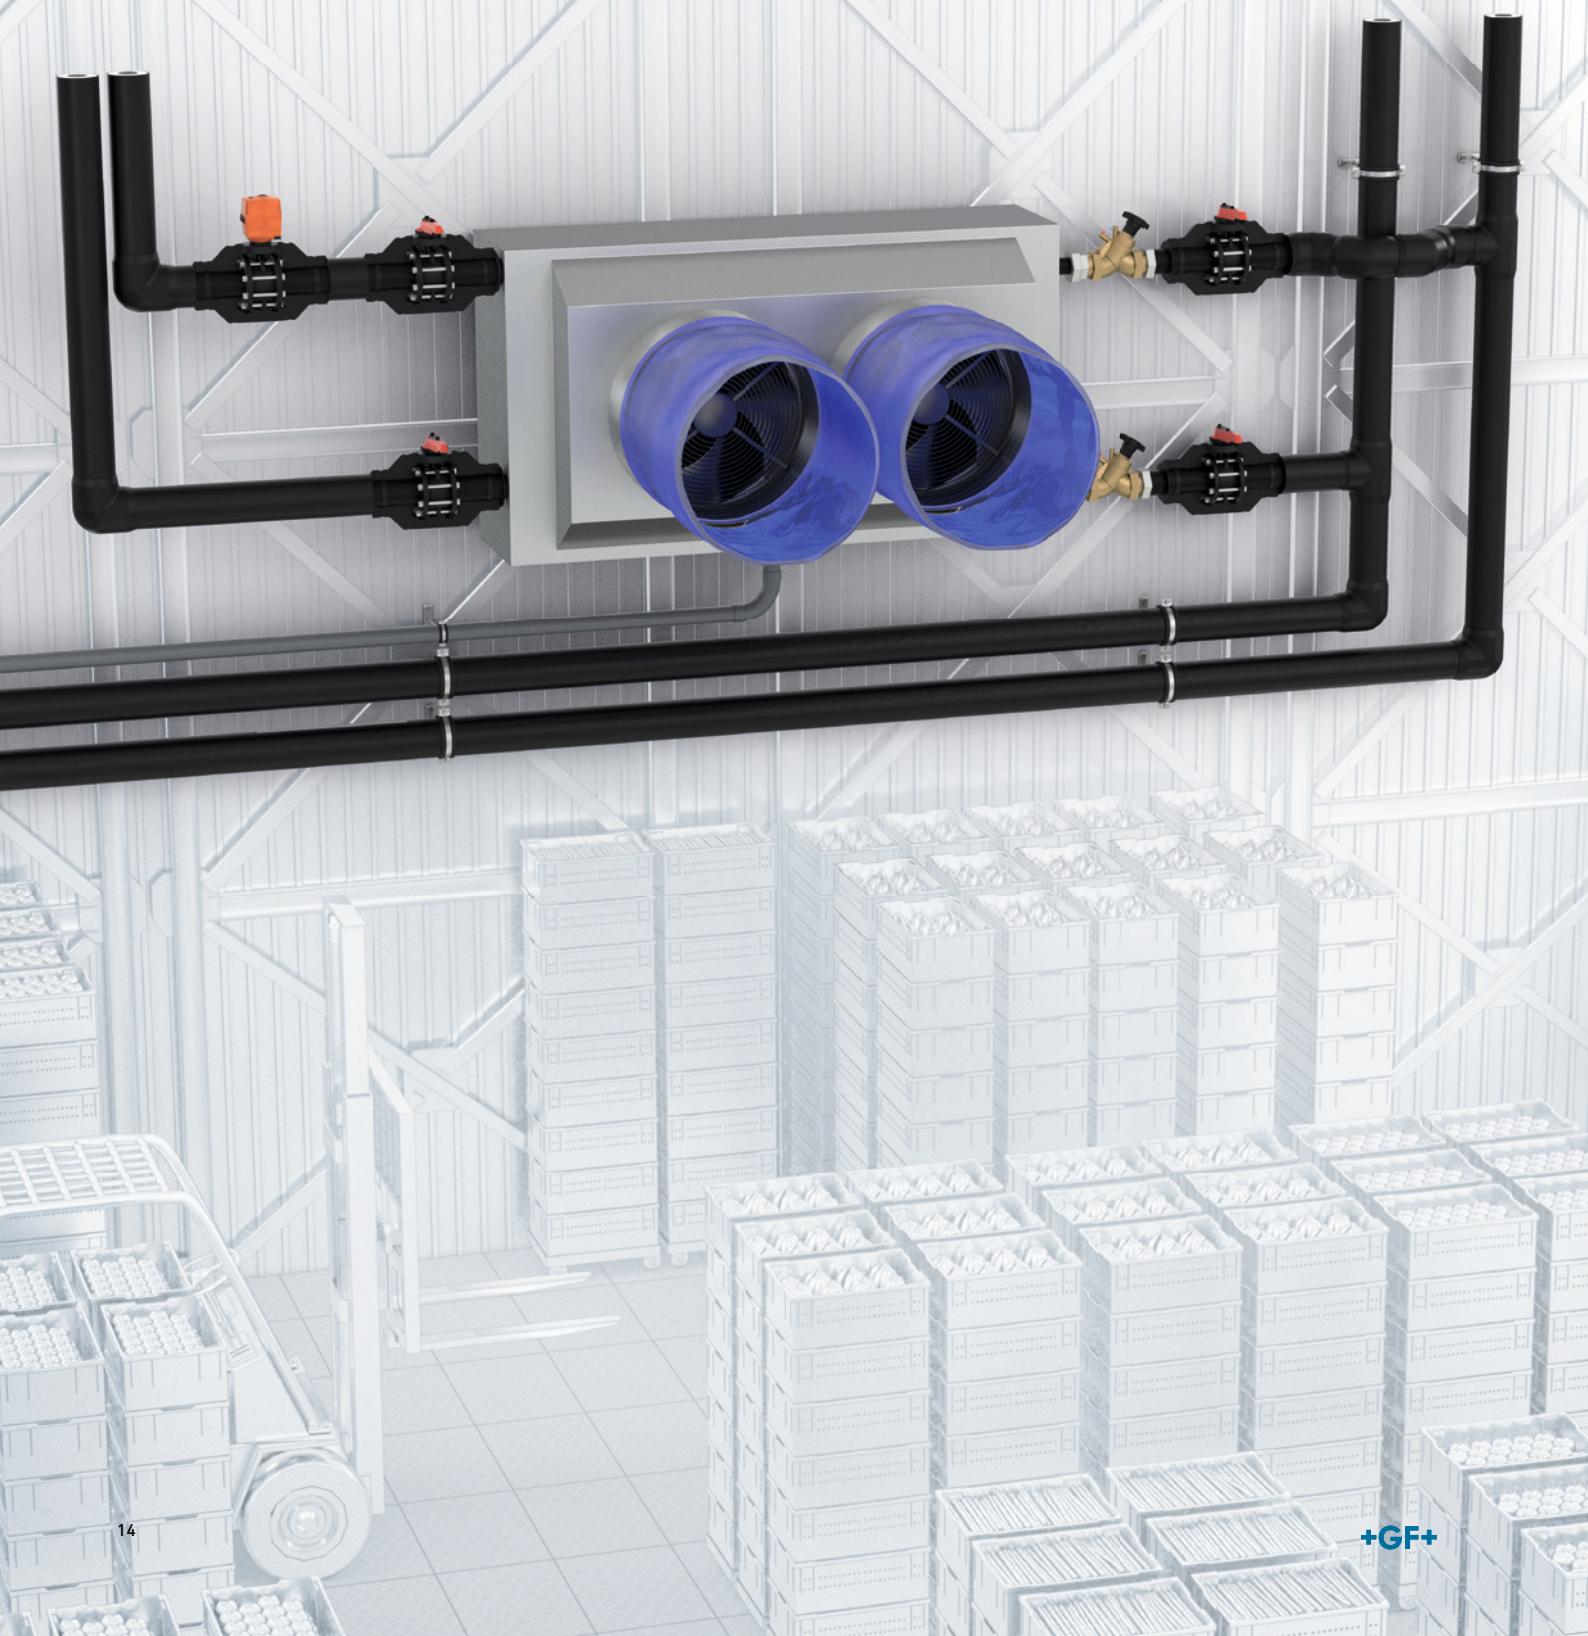

- **Highest degree of protection from production downtime and loss of goods caused by corrosion damage**
- **Ideal for conversion to secondary cooling to meet environmental regulations**
- **Fast installation and commissioning with pre-insulation and electrofusion**
- **Support throughout all project phases provided by local specialists from GF Piping Systems**

Cold Stores

Safety throughout the cold chain

In cold stores, the reliability of the system determines the preservation of the stock and thus the economic base of the company. COOL-FIT 4.0, as a high-quality plastic system, eliminates the risk of interruptions in the cold chain and product losses due to corrosion. The system can also be installed outdoors, if required. The outstanding insulation properties of COOL-FIT 4.0 make it possible to reduce cooling costs and to work more profitably.

Pre-insulated pipes for fast installation

In cold stores, long, straight pipe sections are common due to their often considerable size. The pre-insulation of COOL-FIT 4.0 supports fast installation, with all pipes stripped at both ends at the factory.

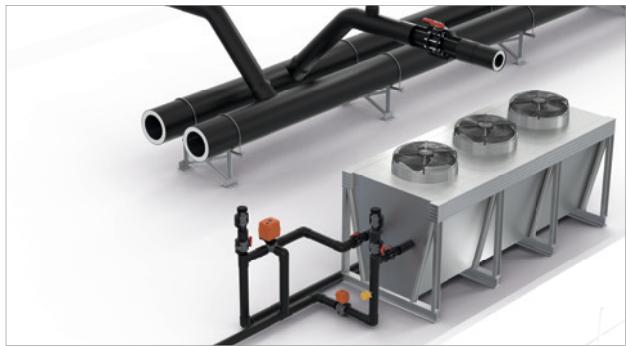

Uncomplicated flange connections

Connection to existing metal systems is made straightforward with the use of flange connections. The COOL-FIT 4.0 range includes the appropriate flange adaptor, which is precisely encased by the insulation shells.

Pre-insulated butterfly valves

In addition to ball valves, butterfly valves are among the most frequently used valves in cold stores. They are pre-insulated in the COOL-FIT 4.0 system, just like all other system components. They are available from d110 to d225 as standard.

Safe even when installed outdoors

In order to use production areas efficiently, it is often necessary to relocate part of the installation outdoors, such as on the roof. No problem for COOL-FIT 4.0: the system is watertight, weatherproof and resistant to UV radiation.

Your benefits

- **Highest degree of protection against system failures by means of corrosion-free plastic components**
- **Safe outdoor installation (e.g. on the roof) without any additional protective elements**
- **Fast installation and commissioning with pre-insulation and electrofusion**
- **Support throughout all project phases provided by local specialists from GF Piping Systems**

Breweries

Corrosion-free production

Corrosion resistance is particularly important in breweries, because to the constant use of water and liquid primary products. COOL-FIT 4.0, as a pre-insulated plastic system, is ideal for this use, especially for control and conditioning the fermentation. The installation in historical production buildings and irregularly shaped storage cellars can be challenging. Our local specialists are available to support you during each project phase.

Electrical valves with pre-insulation

In addition to butterfly valves, the COOL-FIT 4.0 range includes ball valves, operated manually or electrically. They are pre-insulated, as is the entire system, and are therefore as quick and easy to install as all the other components.

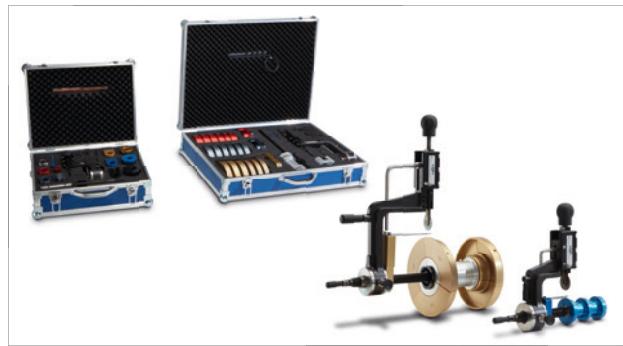

Flexible hoses for the tanks

Fermentation tanks often have no clearly defined angles on their slightly irregular arched undersides, making it difficult to install normal fittings. Here, pre-insulated flexible hoses ensure a secure connection.

Installation fittings for sensors

Sensors for measuring pressure, temperature and other variables can be easily integrated with installation fittings. The sensors are screwed in, drilling is not necessary. This method reduces the risk of leakage.

Range of tools and training

The tools from GF Piping Systems enable the installer to achieve a fast and high-quality installation of COOL-FIT 4.0. Our local specialists also provide support with training sessions, if required.

Your benefits

- **Cost reduction thanks to a corrosion-free, and thus maintenance-free, piping system**
- **Flexibility during system planning thanks to a wide range of pre-insulated components**
- **Fast installation and commissioning with pre-insulation and electrofusion**
- **Support throughout all project phases provided by local specialists from GF Piping Systems**

Installation

Joined in minutes by electrofusion

The COOL-FIT 4.0 pipes, fittings and valves can be connected neatly, easily and within just a few minutes by electrofusion. On this page you can find the most important processing steps and the technical differences among the dimension ranges d32 - d225 and d250 - d450.

Diameter d32 – d225

Features & Processing steps nominal

- The pipes are already stripped and peeled on delivery
- A sealing lip seals the insulations from each other
- All fittings are available as an electrofusion version

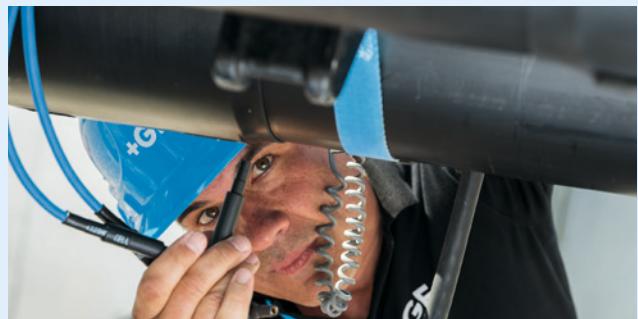

Clean the fusion zones of the fitting and pipe using a clean cloth.

Place the mounting aid on the fitting. Stretch the sealing lip pressing the handles together.

Slide the ends of the pipe into the fitting as far as the marking. Then remove the mounting aid.

Connect the welding cables to the welding contacts of the fitting and weld according to the instruction manual.

One of the most significant benefits of COOL-FIT 4.0 is the clean, simple and fast installation by electrofusion. Even plumbers without any training in welding find it easy to install COOL-FIT 4.0 and check the quality of the installation.

For installation videos:

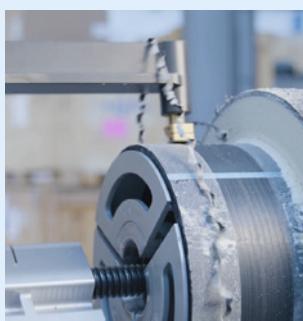

gfps.com/au

Diameter d250 – d450

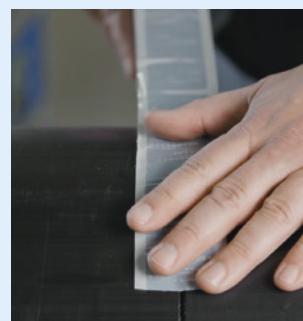

Features & Processing steps nominal

- Pipes and fittings must be peeled before installation
- Insulations are sealed from each other with a sealing tape and shrink sleeves
- Spigot fitting (type B) connected with electrofusion coupler (type A)

Peel the ends of the pipe and fitting type B and clean the fusion zones of the fitting and pipe using a clean cloth.

Slide-on the shrink sleeves and push the pipe ends up to the stop into the electrofusion coupler.

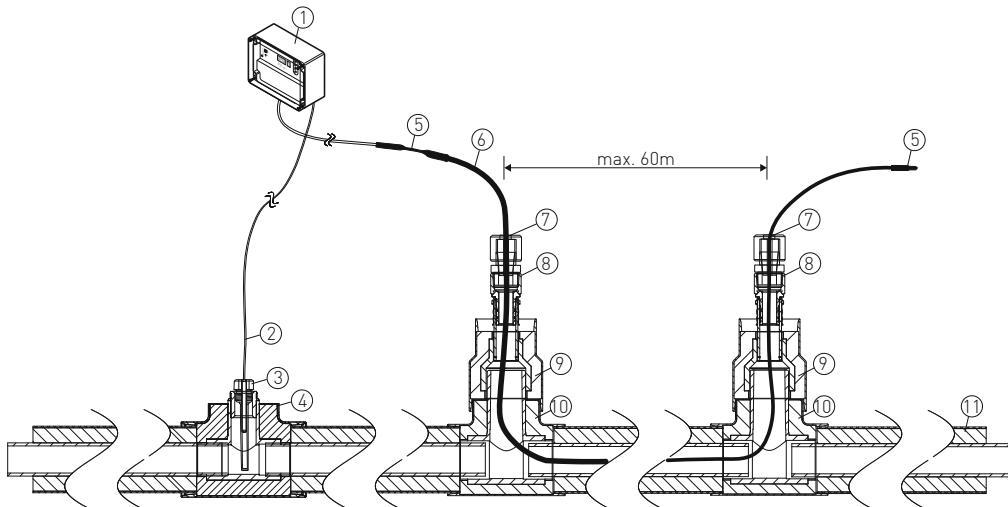

Connect the welding cables to the welding contacts of the fitting and weld according to the instruction manual.

Seal the jointing face between the fitting and pipe with sealing tape and shrink sleeves.

COOL-FIT 4.0

Heat Tracing

The heat-tracing system for COOL-FIT 4.0 offers an effective solution for the freeze protection of COOL-FIT lines. The self-regulating heating cable in combination with the insulation of the COOL-FIT 4.0 pipe system prevents the cooling pipe from freezing.

No.	Designation	No.	Designation	No.	Designation
1	Thermostat	5	Cold lead connection and end seal kit	9	COOL-FIT 4.0 reducer to d32
2	Temperature sensor PT 100	6	Heating cable	10	COOL-FIT 4.0 T90°
3	Immersion sleeve for PT sensor	7	Cable glands 3/4" male thread R	11	COOL-FIT 4.0 pipe
4	COOL-FIT 4.0 installation fitting 1/2" Rp	8	Adaptor fitting d32-3/4" female thread Rp		

Function

The COOL-FIT heat-tracing system uses a self-regulating heat-tracing cable installed inside the pipe. This efficiently protects the medium from freezing directly and without heat loss through the pipe wall insulation.

The entry and exit of the cable into the COOL-FIT system is performed via cable glands, which are connected to the COOL-FIT system via metallic thread transitions. The thermostat with surface sensor enables efficient control directly via the media temperature.

The temperature sensor is installed via COOL-FIT installation fittings using a suitable immersion sleeve.

With the COOL-FIT 4.0 heat tracing, reliable frost protection down to -30°C ambient temperature is provided across all COOL-FIT 4.0 dimensions from d32 - d450.

Self-regulating technology

The self-regulating technology automatically adjusts the heating output at each point to the ambient temperature. It never overheats even when overlapped.

How can COOL-FIT 4.0 help you?

+ Support from GF specialists

COOL-FIT 4.0 is a technically superior system. And it is more than the sum of its components, because it is supplemented by service from GF Piping Systems in all phases of your project – starting from the planning stage, right through to commissioning. You can find our local specialists in 34 countries, meaning they are always close at hand. This also allows for personal discussions at your company, as well as at the construction site during the installation phase.

With GF Piping Systems at your side, you can always count on having a competent contact person. This includes assistance with the necessary calculations, especially if you have little experience with plastic systems, as well as product selection, installation and final quality inspection.

+ Next steps

- Consultation with your GF Piping Systems specialists
- Consultation on the benefits of COOL-FIT 4.0 for you
- Information on reference applications
- Assistance with product selection and making calculations
- Support throughout all project phases

COOLING Tool-Box

The cooling calculation tool from GF Piping Systems supports the dimensioning and design of the secondary circuit. The cooling calculation tool includes the following calculation functions:

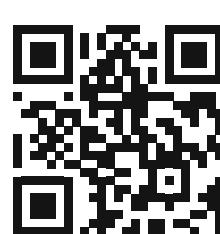

- Expansion / contraction
- Length of the flexible sections
- Energy saving
- Surface temperatures
- Pipe dimensioning
- Pressure losses
- Dew point, including insulation strength
- Bracket spacing
- Freezing time
- Weight comparison
- CO₂ footprint

- Impact resistant. Colour: black
- With threaded branch for sensors (i.e temperature, pressure)
- A: Electrofusion Fitting with integrated sealing lip, for a water and vapour tight sealing
- B: Spigot Fitting with free end (separate electrofusion fitting needed for joining)

Flanged Connections

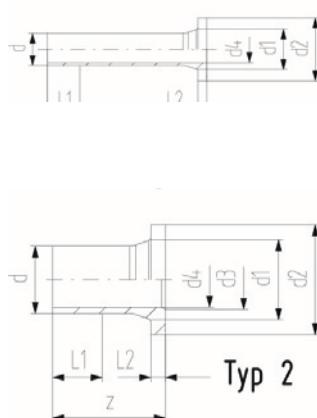

COOL-FIT 2.0/4.0 Flange Adaptor

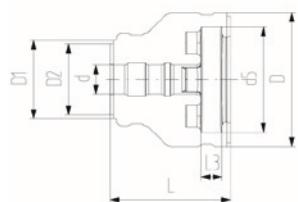

- PE100 SDR 11 PN16, metric
- Suitable for flange connections to metric (from d110 also to ANSI/ASME B16.5)
- Gasket: Profile flange gasket NBR No. 45 44 07, EPDM No. 48 44 07
- Type 1 without chamfer, Type 2 with chamfer
- Separate Fittings Type A needed for joining

Model:

Backing ring and gasket not included

Profile Flange Gasket, metric EPDM

Model:

- For all metric GF Flange Adaptors
 - Hardness: 70° Shore EPDM, 75° Shore FKM
 - EPDM: approved acc. to DVGW Water W 270, KTW recommendation
 - Centreing on the inner diameter of the screw crown
 - Material steel insert: carbon steel
 - Rubber-steel body combined with rubber profile cord ring up to d630
 - Rubber-steel body ideal for big dimensions (d710 - d1000)
- di FA are the suitable inner diameters of flanges adaptors

COOL-FIT 4.0 Flexible Hoses

COOL-FIT 4.0 Flex hose

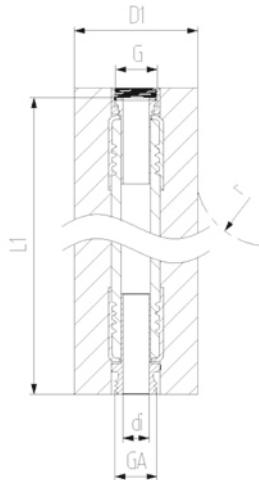

Model:

- EPDM flexible hose with stainless steel protection
- Adaptors stainless steel 1.4404 / 316L
- Pre-Insulation made from EPDM foam with outer jacket impact resistant and tearproof
- With loose union nut G on one end and male thread GA on the other

Note:

d63 available as of beginning 2021

COOL-FIT 4.0 Valves

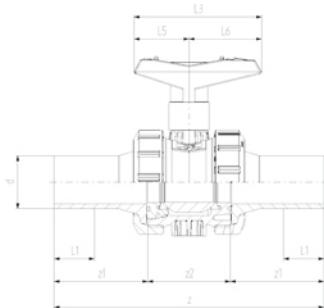

COOL-FIT 4.0 Ball valve type 546, hand-operated

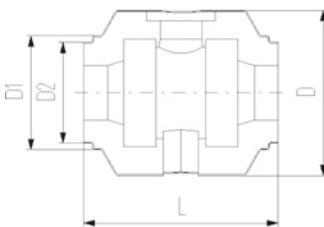

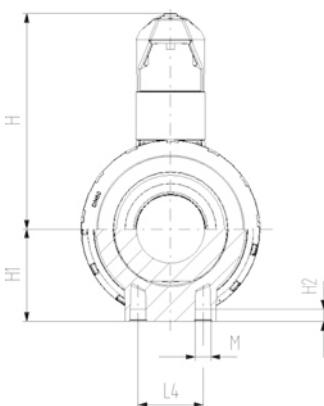

Model:

- Material: ABS with spigot PE100 SDR11, metric
- Ball seals PTFE
- Integrated stainless steel mounting inserts
- Including insulation half shells
- Separate Fittings type A needed for joining

COOL-FIT 4.0 Ball valve type 179, electric

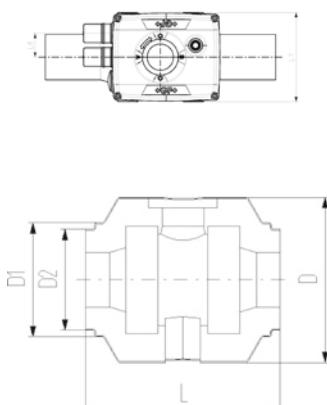

Model:

- Material: ABS with spigot PE100 SDR11, metric
- Ball seals PTFE
- Integrated stainless steel mounting inserts
- Voltage 100-230V, 50-60Hz
- Factory set control range 90°
- Heating element, position feedback (Open/Close/ Middle)
- Including insulation half shells
- Separate Fittings type A needed for joining

COOL-FIT 4.0 Fixed point

Model:

- The product consists of two components namely electrofusion tapes and pipe brackets.
- Electrofusion welded tape as permanent connection to transmit the forces that occur in the pipe to the fixed point.
- The delivered pipe brackets are needed to deliver welding pressure during installation and give stability during operation.
- For welding, use an MSA2.x, MSA4.x, MSA 250, 300, 350, 400 or commercially available 220 V fusion machines.
- If you use an MSA fusion machine from GF Piping Systems, use the 799 350 339 adapter or the 790 156 032 y-cable set.
- Please take note of the maximum allowed forces for this version in the table below.
- Fixed point brackets and cross braces have to be calculated and obtained by the installer. They are not included in the fixed point set from GF.**

Pipe bracket spacing

The pipe bracket spacing have been determined for conveying water on the basis of a specific deflection of the pipe between two clamps considered acceptable.

The pipe bracket spacing for COOL-FIT 4.0 pipe is always consistent independent of pressure and temperature.

L Pipe bracket spacing

Pipe bracket intervals L for COOL-FIT 4.0

COOL-FIT 4.0 Heat tracing

Self regulating heating cable

Model:

- For pipe freeze protection
- Cut to length on site
- Suitable for in-pipe applications (inside the medium)
- Zero maintenance after installation and commissioning
- No risk of overheating due to self-regulating technology
- Cables featuring self-regulating technology. The heat output automatically adjusts depending on the local temperature at every point along its length. It never overheats even when overlapping

Surface sensing programmable thermostat with alarm relay

- The surface sensing thermostat is designed to provide user friendly measurement and control for heating cables. The thermostat has a 25 A control relay (that can be arranged to be volt free) and a 2 A volt free SPDT alarm relay. Parameter and eventual alarm conditions are shown on the digital display and settings can be programmed easily, even without power supply. The thermostat is supplied with a Pt100 sensor. This sensor has a 3 m long silicone extension cable giving freedom to locate the electronics remote from the sensor. Two M25 entries allow for the power cable and heating cable to be connected directly into the unit.

MSA 2.1 Automatic Electrofusion Unit with protocols retrieval

The MSA 2.1 automatic electro fusion unit combines light weight and high efficiency, thanks to its inverter technology and furthermore provides fusion documentation in PDF. The unit is extremely fast and simple, with three basic operations required to operator: connect, scan, start the fusion. It is robust, safe and ergonomic.

All is meant to simplify the job: the barcode scanner, for long distance reading, the cooling system to joint in series, the icon system, to keep the interaction between user and machine intuitive. The entire welding process is controlled and regulated with energy output compensation depending on ambient temperature and the indication of cooling time.

The unit has 1000 protocols permanently stored in the internal memory. The user can copy the fusion reports in an USB stick to print them out in PDF format.

Scope of delivery includes: transport box, angle adapters (4.0 mm and 4.7 mm), operating instructions, START/STOP badge and USB memory stick with PC applications.

Technical Data:

- Operating temperature: -20°C to +50°C
- Mains voltage and frequency: 230V (190V - 265V), 50-60Hz
- Fusion voltage: 8-42 V (48 V)
- Fusion data input mode: bar code, manual
- Fusion current: 90 A (max)
- Suggested power generators: 3.5 kVA
- USB Port: Type A
- Protection factor: Class 1 / IP 65
- Mains cable: 4 m / Fusion cable: 4 m
- Weight: ca. 11.9 kg
- Display: Graphical LCD, adjustable contrast
- Independent from languages

COOL-FIT 4.0 Clamps and installation aids

Double clamp with universal link

- Recommended for the installation of fittings ELGEF Plus and ecoFIT d40 - 200 and d160 - 630mm
- Recommended for the installation of fittings COOL-FIT d32/D75 - d140/D200 and d160/D250 - d450/D630
- The clamping allows installation without tension and avoids movement during fusion and cooling time
- The centrally located adjustable universal link allows installation of electrofusion couplers, elbows and reducers
- Works above, below and alongside the joint
- Adaptor for use with Tee-pieces available (see accessories)
