Company *Overview*

Construction Specialties®

People.
Buildings.
Better.

Helping you build *big dreams.*

We start with a simple promise: to offer the highest-quality service, products, and expertise to help the building industry create amazing places. Since 1948, we've done this by taking a listen-first approach to understand what you really need. This has led us to develop innovative products that not only solve problems but also create new opportunities - helping you build better.

Our Mission:

Provide people with inspired building solutions.

Success
motivation
"If you can dream it, you ca
"It is our choices..that show what we
far more than our abilities."

Global company, *local service.*

From our humble beginnings in the United States more than 75 years ago, we have grown into a global organisation, delivering local customer service and technical expertise around the world.

In Europe, our offices in France, the UK, Germany, Italy and Spain - along with our agents in many other European countries - have played a key role in ***making buildings better*** across the region, remaining true to the spirit of our long-standing mission.

At our factory in France, we operate eight extrusion lines dedicated to Acrovyn Profiles, supported by two additional lines for Acrovyn Sheet - including a specialist line producing our innovative Acrovyn PVC-Free Sheet - supplying customers across Europe.

18

locations worldwide

Our facility in **Pacy-sur-Eure, France**, serves as the central manufacturing hub for the majority of Acrovyn products supplied across Europe.

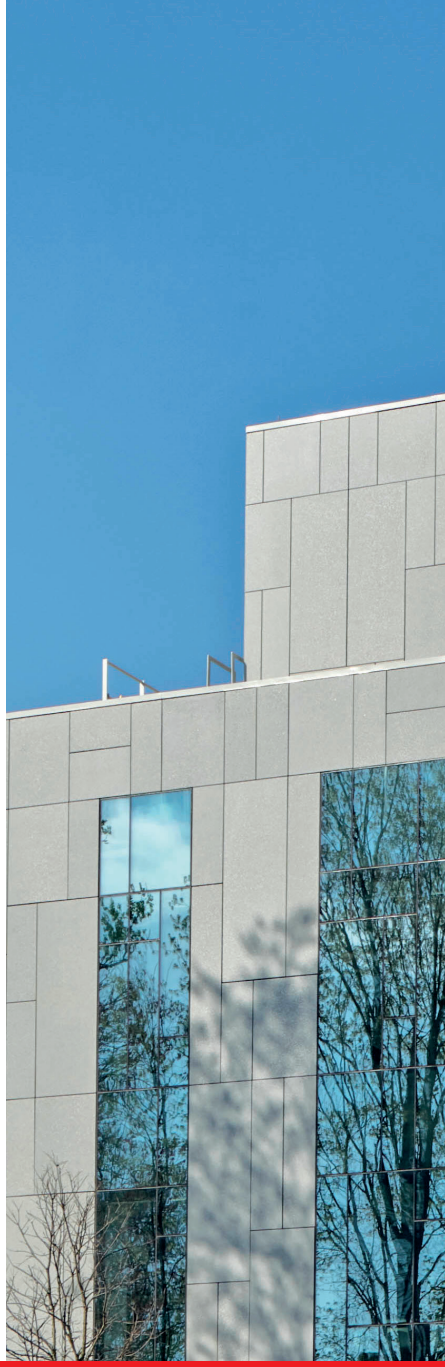

No matter where our products are manufactured or fabricated, they are all held to the same rigorous quality standards.

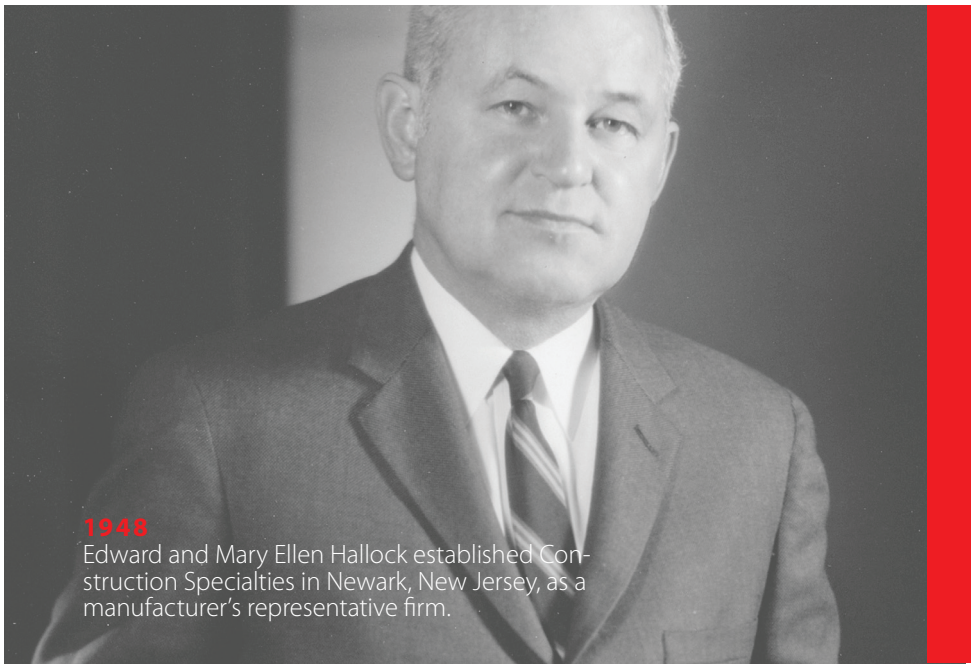

Our operations in France, Germany and the UK are certified to **ISO 9001**, ensuring consistent excellence across every aspect of our production and service.

bsi ISO 9001 Quality Management Systems CERTIFIED

Leading *with excellence.*

We're always challenging ourselves to meet your highest expectations. So when existing solutions don't quite fit your needs, we're ready to work with you to develop new ones to suit your projects. It's an approach that has helped set the standard across the industry, and can help you realise a world of possibilities.

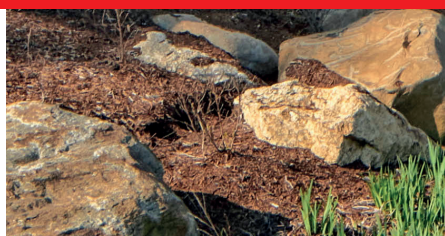

1948
Edward and Mary Ellen Hallock established Construction Specialties in Newark, New Jersey, as a manufacturer's representative firm.

A legacy *of innovation.*

We believe that 'better' is achieved through shared opportunities.

Construction Specialties is a leader in architectural product problem-solving because we embrace our customers' complex challenges and turn them into world-class solutions. Many of our innovations were developed in direct response to these challenges - and have since become recognised industry standards.

Today, CS is a global leader across many of our product categories, and throughout our 75-year history we have held nearly 500 patents, reflecting our ongoing commitment to innovation and excellence.

1950s

- Developed the industry's first extruded aluminium louvre.
- Introduced Sun Control solutions to the architectural community.

1960s

- Introduced Acrovyn® Wall Protection.
- Launched a range of architectural Expansion Joint Covers designed to accommodate all types of building movement.

1970s

- Introduced Pedigrid® and Pedimat® architectural entrance grids and mats, designed to stop dirt at the door.

1980s

- Introduced Acrovyn® Wall Covering product line to coordinate with our durable Acrovyn handrails & corner guards.
- Developed the first Expansion Joint Fire Barrier, preventing the chimney effect of fires travelling through expansion joints.

1990s

- Introduced America's first range of rain defence louvres, capable of stopping up to 110 km/h wind-driven rain.
- Developed the first manufacturer-owned wind-driven test chamber in the U.S., allowing us to analyse new louvre designs under real-world conditions.
- Created the industry's first full-scale seismic expansion joint test table to replicate real-world conditions and ensure our systems perform as intended.

2000s

- Launched Perform & Bold Line Louvres, giving architects the flexibility to either blend louvres into the façade or make a bold design statement.
- Introduced Acrovyn® Bactericide solutions, helping to combat HAIs in hospitals and care environments.
- Introduced a range of PVC-Free wall protection products, including Acrovyn by Design - a bespoke wall protection solution.

Our commitment *to the environment.*

People. Buildings. Better. These three words guide our mission to deliver inspired building solutions for a smarter built environment, and shape our approach to sustainability.

Our journey towards more responsible manufacturing began as early as 1991, with a major milestone marked by the introduction of PVC-free Acrovyn® - a significant step in reducing environmental impact without compromising on durability or performance.

Today, we continue to advance sustainable practices across our global operations, creating solutions that support a better, more responsible built environment for everyone.

Solutions from *the outside in.*

A beautiful building is just the beginning.

Our goal is to work alongside you to transform your project into a vibrant space, meaningful space that enhances the experience of its occupants – whether that means protection from the elements, creating a striking visual statement, or anything in between.

Together, let's create something truly memorable.

ARCHITECTURAL LOUVRES

Function and form in balance

Helping buildings to breathe, louvres are essential to successful design - letting air in while keeping wind-driven rain and other elements out. They also add architectural interest to a façade while meeting demanding performance requirements. Whether your project needs protection for HVAC equipment, sound attenuation, blast resistance or simply reliable ventilation, we offer a louvre solution to meet every specification.

Learn more about our solutions for:

RAIN DEFENCE	Prevent wind-driven rain entry
VENTILATION	Maximise airflow performance where some water entry is acceptable
SCREENING	Conceal equipment or other visually distracting building elements
ACOUSTICS	Effectively manage and reduce noise transfer

We rigorously test our louvres to ensure dependable performance. In addition to independent testing to the European EN 13030 standard, 15 of our models sold in Europe are now certified by the **Air Movement and Control Association (AMCA)** under their **Certified Ratings Program**.

AIRFOIL SOLAR SHADING

Enhancing comfort with sun control

Our brise soleil system helps create comfortable, productive environments by reducing interior heat and glare. External sunshades are highly effective, cutting heat gain by up to 85% and allowing occupants to sit comfortably near windows. Alongside improving comfort, solar shading delivers a clean, consistent aesthetic that enhances and protects building façades.

Explore our solar shading options:

CANTILEVERED SHADING	Supported via outriggers.
FACADE SHADING	Supported via birdmouth brackets or direct end fixings, with blades installed horizontally or vertically.
SKYLIGHT SHADING	Installed above roof openings.
LIGHTED SHADING	Airfoil Lux incorporates LED lighting along the front of the blades for both shading and architectural illumination.

EXPANSION JOINT COVERS

Movement, mastered

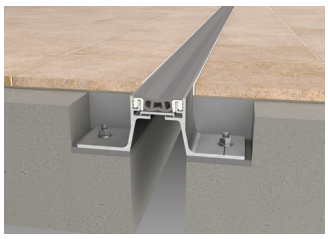

For more than 50 years, we've supported specifiers, contractors, and end users in solving complex structural building-movement challenges. From early design input and product selection to installation guidance, we help you avoid costly mistakes at every stage.

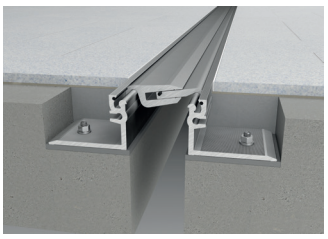

Our comprehensive expansion joint cover range includes solutions for interior floors, walls, and ceilings, as well as specialist covers for roofs, parking structures, and stadiums. Designed for durability, functionality, and aesthetics, our products meet the demands of any project.

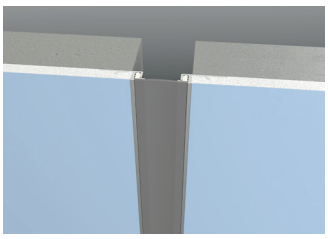

Learn more about our joint cover solutions:

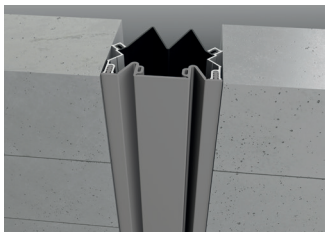

INTERIORS	Floor, wall, and ceiling joint covers
EXTERIORS	Joint covers for façades, roofs, and floors, including traffic-grade systems for car parks
ACCESSORIES	Fire, moisture, and acoustic barriers

ACROVYN WALL PROTECTION SHEET

Walls that stand out

Acrovyn® Sheet provides a robust, durable finish for interior walls and other surfaces exposed to daily wear, tear, and impact damage. It helps maintain a clean, welcoming, and professional appearance, even in the busiest environments.

For truly distinctive interiors, Acrovyn by Design allows artwork, branding, and bespoke imagery to be embedded behind a clear, impact-resistant, PVC-Free sheet. From calming biophilic scenes that support healing to woodgrain patterns and custom graphics, our bespoke wall coverings bring identity, creativity, and life into any space - while still offering exceptional protection.

Our solutions include:

TEXTURED SHEET	Durable and impact-resistant, our textured sheet protects walls while enhancing interior décor. Available in a wide range of colours in both PVC-Free and PVC options, as well as decorative finishes.
ACROVYN BACTERICIDE	Designed to help combat HAIs, Acrovyn Bactericide is proven to kill bacteria on contact. Available in textured or smooth variants, it offers long-term, built-in protection.
SMOOTH SHEET	Ideal for hygiene-critical environments, our smooth sheet provides a durable, easy-to-clean surface. Unlike tiles, it won't crack under impact and is suitable for steam cleaning.
ACROVYN BY DESIGN	Transform your interiors with bespoke imagery protected behind our PVC-Free sheet. A favourite amongst designers and building owners, it combines striking visuals with long-lasting performance.

ACROVYN DOOR PROTECTION

Tough protection. Smart choice.

Interior doors are exposed to constant impact and daily wear, often leading to damage that requires ongoing maintenance or even full replacement. Traditional wood veneer and high-pressure laminate finishes simply can't match the resilience of Acrovyn® - a long-lasting, highly durable material trusted to protect doors in thousands of facilities worldwide.

Tailored to your needs, our protection solutions safeguard door faces, edges and frames at full or partial height. With a wide range of standard colours and finishes, Acrovyn® not only protects your doors but also enhances the overall appearance of your interior spaces.

Explore our door protection options:

MADE IN FRANCE

ACROVYN WALL PROTECTION PROFILES

Flawless protection for every condition

c-sgroup.co.uk/29

Our wall protection profiles complement Acrovyn Sheet, adding impact resistance where it's needed most. In high-traffic areas where equipment, carts, or beds can damage walls and corners, effective protection reduces maintenance costs and disruption.

The range includes durable corner and wall profiles in a variety of shapes, sizes, colours, and materials - including Acrovyn PVC-Free, Acrovyn PVC, stainless steel, and EPDM rubber - providing suitable options for both front- and back-of-house spaces.

Our solutions include:

HANDRAILS	Provide comfortable grip and strong mobility support in corridors. Available in a range of materials, with some models designed for continuous runs on staircases.
CORNER GUARDS	Durable protection for vulnerable corners, available in multiple materials and finishes to meet performance needs and budgets.
HAND/CRASH RAILS	Ideal for areas prone to impact damage while still providing pedestrian support. Offered in a variety of styles and mounting options.
CRASH RAILS	Designed to protect corridor, waiting room and lobby walls from impact in high-traffic environments.
BED HEAD PROTECTORS	Commonly used in care settings to prevent damage to walls and wall-mounted equipment. Can also help personalise and enhance patient spaces.

** Applies to a wide selection of our wall protection profiles.*

PEDISYSTEMS ENTRANCE MATTING

Good first impressions start at the entrance

Keeping your building safe, clean and welcoming takes more than a simple door mat. A well-designed entrance flooring system reduces slip hazards, captures dirt and moisture, improves indoor air quality and protects interior floor finishes - lowering maintenance costs over the life of the building.

Make a strong first impression with the right flooring solution. Our range offers options for exceptional performance, aesthetic appeal or both, helping you create an entrance that looks good, works hard and sets a tone for every visitor.

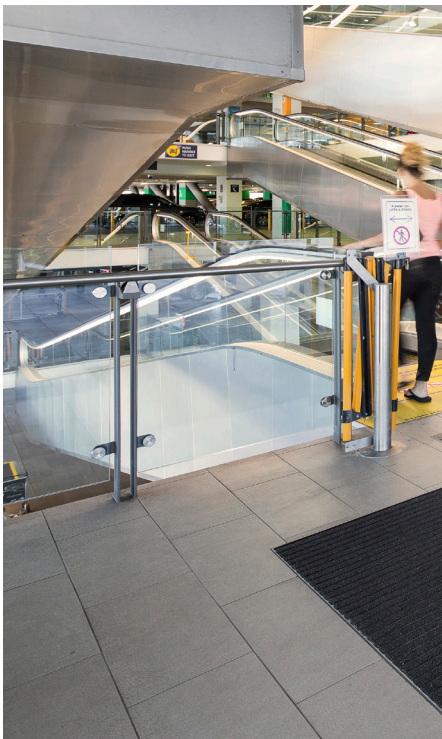

Our solutions include:

ALUMINIUM GRID AND MAT SYSTEMS	A range of solutions for all entrance types, available in different heights and styles, with a choice of insert types and colours.
REVERSIBLE MAT SYSTEMS	Robust aluminium matting featuring vinyl or carpet inserts, available in 12 mm or 18 mm thicknesses.
STAINLESS STEEL GRIDS	Constructed from hard-wearing grade 304 stainless steel for excellent durability, and available with or without carpet inserts.
INTERLOCKING TILE SYSTEM	Manufactured from a recyclable, UV-resistant rubber/vinyl compound. Tiles are easy to install and can incorporate carpet inserts.
CLEAN-OFF CARPET TILES / ROLLS	Ideal for offices and less frequently used entrances. These heavy-duty carpets can also be used to create a dry-off zone in busy entrances areas.
