

SMART THERMOSTAT (230V)

The OMNIE HOME Smart thermostat provides full programmable functions, either 7-day Monday to Sunday, 5-2 for weekdays and weekends, day by day or manual control, designed to be multi-functional, simple to install, can operate either directly or via the optional OMNIE App.

This stylish, discreet thermostat has a simple back-plate that can be screwed to a wall or comes with a self adhesive pad. Once fixed, the thermostat attaches to the back-plate via a magnetic mount. Each thermostat is wired back to our OMNIE Touch Wiring Centre, however alternatively it can connect wirelessly to the OMNIE Home Wireless Wiring Centre via the Gateway (the thermostat still needs localized 230v power).

Each thermostat has the facility to add a single remote sensor, floor or air. The floor sensor can be activated to limit the floor temperature where this is required or as an air sensor, allowing the thermostat to be located away from wet areas like bathrooms and en-suites.

SPECIFICATIONS

Power Supply	AC 230V
Temperature Range	5-40°C
Display Temperature Accuracy	0.5 or 0.1°C
Control Algorithm	ITLC SPAN (±0.25°C/±0.5°C)
S1-S2 Input (multifunctional input)	Floor temperature or Air temperature
Output Control	COM-NO (volt free)
Max current	3(1) Amp
Communication Protocol	Zigbee 2,4GHz
Mounting	Flush mounting (47mm in wall back box)
Working Temperature	0-45°C
IP Protection Class	IP30
Dimensions (Width x Height x Depth)	86mm x 86mm x 10mm
Width after mounting in wall-box	10mm
Works with Alexa	Yes
