technical@profabaccess.com

Lockable 'loft hatch' ceiling access panel designed to provide access between 50 mm wide timber truss, joisted plasterboard or plaster ceilings, where access to the loft space is required.

Profab Access' ALTA 3000 Series range of 'loft hatch' metal ceiling access panels are designed and manufactured to provide quick and easy installation with a discreet appearance when finished.

» BENEFITS

- Clean, discreet design with flush metal door
- Fast and simple to install, lockable
- Fully adjustable hinges for ease of installation and fit
- Rubber, compressible draught seals to all sides
- Etch primed for decorating on site, to match adjacent finishes
- Single door (SD) configuration
- Fully recyclable at end of life

» TYPICAL DOOR CONFIGURATIONS

Construction

- Available from stock in sizes 631 x 542 mm and 746 x 542 mm
- 1.2 mm frame with door rebate and 0.9 mm door in electro-galvanised mild steel
- Fully welded rigid frame holds a flush metal door through adjustable hinges to one side
- Adjustable hinges maintain a 2 mm gap between the door and the frame
- Rubber foam, compressible draught seals to all sides
- Single door (SD) configuration only
- Picture frame (PF) profile
- Lockable with budget lock (BL) – T-bar key included and supplied with white plastic bung
- Door opens downwards towards the user
- Removable door during installation or if damage occurs
- Fully powder coated matt RAL 9010, suitable for finishing on site
- CNC manufactured in the UK to ISO 9001:2015 and 14001:2015

Performance

- 23 dB acoustic shielded as standard
- All panels are for internal use and only in areas of normal humidity

Options

- Picture frame (PF) to suit finishing requirements
- Security lock (SL) option – key included with chrome escutcheon to door face
- Other RAL paint colours and textures available
- Only limited modifications are available with this product

» STOCK SIZES AND WEIGHTS

Our ALTA 3000 FSeries 'loft hatch' access panels are available in sizes for a single door (SD):

Dimension X (mm)	Dimension Y (mm)	Weight (Kgs)
631	542	8.5
746	542	9.8

Size Specification

- All dimensions are in mm
- All doors hinge along dimension Y
- All panels are single doors (SD)
- X and Y dimensions are outside rear frame
- Overall frame depth is 80 mm
- Structural opening required for installation is (X+5mm) x (Y+5mm)
- Clear available access when installed with door in the open position is (X-65mm) x (Y-35mm)

All of our 'loft hatch' access panels are designed and manufactured to order in our UK factory, to meet your individual project requirements.

» FRAME PROFILES

Choice of frame profiles to suit application:

PF: PICTURE FRAME

A visible, flush faced frame ideal for ceilings where the panel is being installed for retro fitting and within finished areas

BF: BEADED FRAME

A simulated dry wall edge bead profile ideal for ceilings where the panel is being installed prior to any tape and jointing or skim-coat plastering.

» MULTI-POINT LOCKING OPTIONS

BL

SL

BL: BUDGET LOCK

Operated with an 8 mm T-bar key to unlatch and pull the door leaf open. Locking assembly engages horizontally in one direction.

SL: SECURITY LOCK

A single point locking mechanism with a quarter-turn camlock operated by a castellated key.

» INSTALLATION

Apertures should ideally be formed between the timber trusses and joists if at 600 mm centres, with cross-trimmers fixed to suit the selected panel. Suitable frame packing should be used at fixing points to ensure the frame remains square.

Loft ladder installations are possible with this product, please contact technical@profabaccess.com for further advice.

» OPERATION

When installation is not combined with a loft ladder, safe and suitable steps should be taken to comfortably reach the key operated 'loft hatch' door.
