

**Bespoke
Engineered Solutions**

Overview

By inviting Kentec to work on your behalf to the specification and finish of your bespoke life safety solution, you are creating more than a customised product – you are creating a unique product which fits your user requirements. The process of personalising your solution can be pleasing and effortless with our experienced team supporting you.

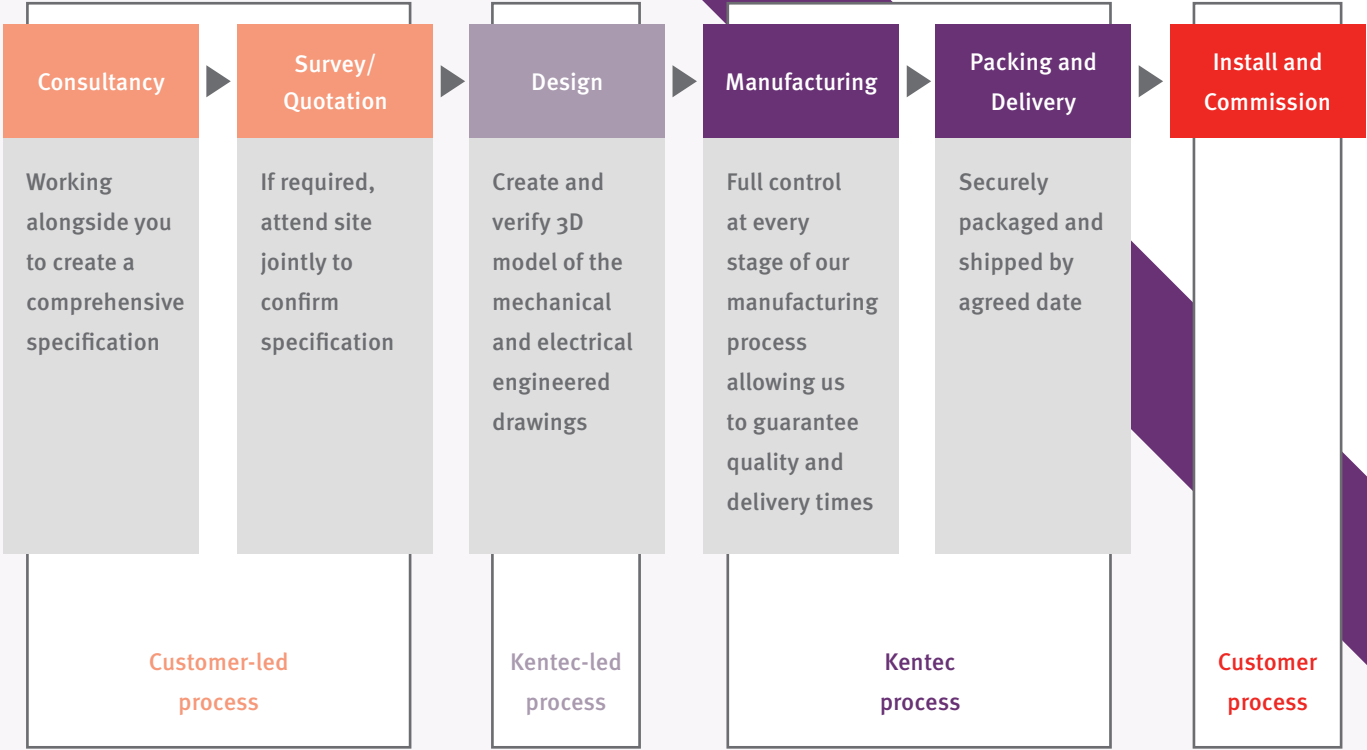

Kentec’s bespoke-engineered solutions team take complex fire safety briefs and design bespoke solutions that will accommodate site and your client’s specific needs.

Each solution is specifically designed by our highly skilled design team, using the latest 3D modelling technologies guaranteeing product fitment and quality assurance.

In-house manufacturing and networking capabilities, combined with the ease of integration and flexibility, means that your solution can be developed to meet your customers’ requirements.

With the ability to integrate third party products, including open and closed protocols, we can meet the most innovative and demanding challenges.

Design to Delivery
We work in partnership with you, to deliver a bespoke solution for your customer.

Our total solution enables us to retain control throughout the design, manufacturing and QA process, ensuring the highest levels of quality.

Bespoke Solutions Design and Manufacturing Process

With considerable expertise in this field, your bespoke-engineered product will be designed and built in accordance with your exact requirements as well as our strict ISO 9001 approved quality procedures.

We have full control at every stage, allowing us to provide industry-leading delivery times, combined with the highest quality.

- Typical Applications**
- > Smoke Damper Control Panels
 - > Sprinkler System Indicator Panels
 - > Pump Status Indicator Panels
 - > Fireman’s Control Switch Panels
 - > Addressable Interface Units (with or without integral PSU)
 - > Mimic Repeat Indicator Panels (Syncro Matrix Mimics at a size to suit your requirements)

Kentec can design and integrate protocols from other manufacturers into any bespoke solution to your specification.

Company Overview

Kentec Electronics is one of the world's leading life safety solutions manufacturers of conventional, analogue addressable fire detection and extinguishant control panels.

Founded in 1985, Kentec is an end-to-end manufacturer, with everything sold being made in the UK. It employs approximately 250 members of staff in its production facility, head office and research and development department.

In addition to design and manufacture, Kentec provides technical support specified to the local standards and customer requirements of over 90 countries worldwide. With a commitment to meeting the needs of individual national markets, Kentec has achieved a global reputation, resulting in its life safety systems being installed in numerous prestigious sites across the world.

Kentec manufactures products approved to EN54, EN12094, UL, FM, NFPA and marine classification societies.
