

GRP CANOPIES

The finishing touch for any doorway.

Glass Reinforced Plastic (GRP), is a matrix of woven glassfibre sheets layered and set within resin. For housebuilding projects where there is no scope for brick, block or structural canopies, our GRP solutions can be the perfect solution.

Lightweight and easy to install, our non-structural canopies make the perfect finishing touch to an outer doorway, and are available in a number of different sizes and specifications.

GRP canopies are low-maintenance and available off-the-shelf with short turnaround times on delivery. They are versatile for many different architectural styles, and prove popular with our many national housebuilder clients.

**DESIGNED, BUILT AND SUPPLIED TO MEET YOUR SPECIFIC NEEDS.
