The Ultimate Safety Materials Manufacturer

boplan.com[®]

BOPLAN

The Ultimate Safety Materials Manufacturer

Boplan designs, develops and manufactures durable and extremely effective safety barriers for demanding environments. The focus is on the protection of people, vehicles, buildings and infrastructure. We only use high-quality and extremely strong plastics, so the features of traditional raw materials become meaningless.

Boplan modular systems are the most innovative available on the market and are used to secure industrial buildings, warehouses, production halls, airports, drilling platforms and (petro)chemical sites. We offer a solution for any specific application.

Thanks to our passion for quality and sense of innovation, we have become one of the sector's leading companies. All products and systems are tested in advance to meet the highest standards.

OUR MISSION:

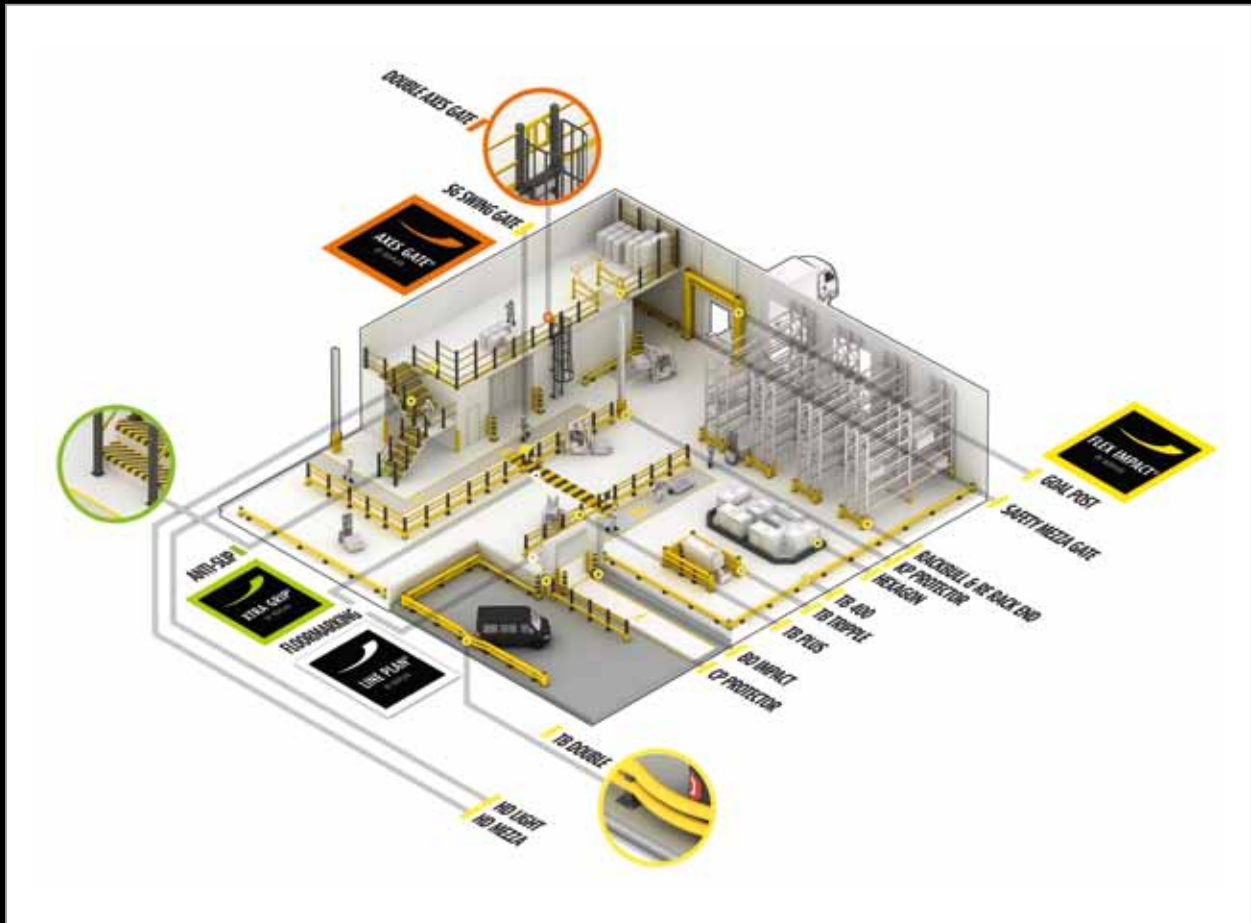

Boplan is committed to create extraordinary products and challenge existing standards in industrial safety! We do this through our talented and dedicated team, a constant drive for innovation, and a passion for exceeding our customer's expectations.

SOME OF OUR CUSTOMERS:

SHARED SPACE IS DANGEROUS SPACE

Erect barriers to separate traffic & pedestrians

It's easy to step over floor markings, not physical barriers. Tape markings are a good way to set traffic rules and should be used, but people tend to ignore them when convenient. Keeping foot and forklift traffic separated is one of the best ways to prevent devastating forklift accidents. It can be as simple as creating traffic lanes using LINE PLAN floor taping to indicate where workers should walk in moving through a facility. In critical high-danger, high-value areas, you may need a solid FLEX IMPACT® physical barrier. To better ensure forklift and foot traffic don't mix, install rails along those traffic demarcations to prevent a forklift from entering into the pedestrian lane and to keep pedestrians within confined boundaries and access points.

To deal with dangerous, high traffic crossings and further protect workers, install FLEX IMPACT® or AXES GATE safety gates at all crossing points. This helps workers to stop, look, and listen for forklift traffic before crossing a forklift traffic lane. Install FLEX IMPACT barriers where work stations and forklift traffic are in close proximity so that work stations are isolated from forklift traffic lanes. Restrict forklift traffic near and around time clocks,

break rooms, cafeterias and primary exits – reroute forklift patterns if needed, as these are locations where workers congregate and forklift awareness is lowered as they rush to and from these locations.

Finally, install RACKBULL® rack protectors and protective FLEX IMPACT® barriers at rack ends to prevent forklifts from hitting storage racks and potentially taking down an entire row of racking. Such incidents happen frequently enough that you should give careful thought to protecting the value of products and parts stored on those racks.

FLEX IMPACT®

Modular crash protection made from flexible polymer

FLEX IMPACT® is an extensive modular array of safety systems that have been specifically designed to create a safe work environment in an economically responsible way. If you consider security in the workspace a high priority, you will need to do your utmost to ensure optimal protection of personnel, machines, property, buildings and infrastructure.

APPLICATIONS

- Protection of people, vehicles/forklifts, buildings, machines, infrastructures, conveyor belts
- Impact protection
- Rack protection
- Fall protection
- Physical separation of traffic & pedestrians
- Secure parkings, warehouses, production halls, airports, (petro-)chemical plants
- Etc.

► Rack-end - RackBull / rack protection

► TB Plus / loading dock fall protection

► TB Triple Super / machine protection

► TB 400 / conveyor belt protection

► TB Plus / fire equipment protection

► KP Universal - KP 150 / column protection

BENEFITS

- Active memory
- Long lifespan + low maintenance = cost saving
- Lightweight compared to steel
- Strength equivalent to steel
- Easy to use modular design
- No repaint
- No floor damage, high impact absorption & deflection
- Optimal visibility
- No corrosion
- Chemical resistant
- Fire retardant
- Anti-static
- UV resistant
- Recyclable & low ecological footprint
- Tested & approved
- Etc.

AXES GATE

Industrial safety gate for robust fall protection

The industrial safety gates in the AXES GATE series were the very first Boplan product. In many sectors, falling from a considerable height is a real possibility. The consequences of such falls can be catastrophic: serious injury, long-term disability and in the worst case even death. Personal suffering generally cannot be compensated by damage claims.

APPLICATIONS

- Ladders with safety cages
- Fire escapes
- Work platforms
- Silos
- Drilling platforms and the petrochemical industry
- Access to machines & ladders
- Integration in existing handrail systems (such as Flex Impact)
- Etc.

► Double Axes Gate / no sharp edges

► Double Axes Gate / protect ladder opening

► Double Axes Gate / work platform protection

► Double Axes Gate / silo protection

► Double Axes Gate / off-shore platform

► Double Axes Gate / fall protection on height

BENEFITS

- Extensively tested and declared safe
- Automatic closure with adjustable closure force
- 1 Axes Gate opens in in 2 directions
- Chemical and UV resistant, anti-static and fireproof
- Extremely long lifespan
- 2 types in different lengths
- Easy installation
- Optimal visibility – Safety Yellow
- Safe and cost effective
- No sharp edges, safe for the hands
- Impact absorption & deflection
- Conform EN 14122-3 & 14122-4 standards
- No repaint
- No maintenance

XTRA GRIP

Wear-free anti-skid solutions to prevent falling and slipping

Prevent skidding and falling with a reliable anti-skid solution. With XTRA GRIP, we offer various anti-skid solutions for fall and skid prevention in the workspace and in public buildings. Falls due to slippage is still the number-two cause of all workplace accidents workspace and in public-access spaces and buildings.

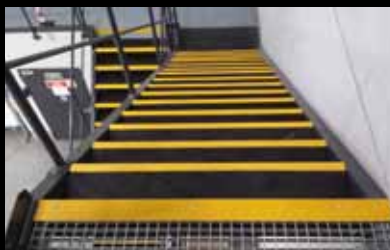

APPLICATIONS

- Stairs
- Landings
- Working platforms
- Access to machinery
- Walkways
- Loading ramps
- Access ramps
- Duck boards
- Industrial floors
- Etc.

► Xtra Grip Boards / industrial floors

► Xtra Grip Stairsteps / working platforms

► Xtra Grip Stairsteps / stairs

► Xtra Grip Profiles / access to machinery

► Xtra Grip Plates, Stairsteps and Profiles

► Xtra Grip Boards / loading ramps

BENEFITS

- Safe
- Durable
- Corrosion resistant
- Easy to clean
- Lightweight
- No down time
- Easy installation
- Long lifespan
- Excellent outdoor weatherability
- Resistant to most chemicals
- Etc.

LINE PLAN

Indestructible floor markings with an undeniably professional look

LINE PLAN offers a superior system for floor markings, line markings and pictograms that spectacularly surpasses all other marking systems on the market.

APPLICATIONS

- Walkways
- Work zones
- Traffic zones
- Warehouse floors
- Fire escapes
- Emergency exits
- Etc.

► Marking Tape / shipping zone

► Marking Tape / work zone

► Marking Tape / inspection area

► Marking Tape Center / emergency exit

► Marking Tape L - T / receiving zone

► Marking Tape Center - Sign / walkway

BENEFITS

- Multiple colors, shapes & widths
- Low cost solution
- Forklift resistant
- Every type of surface
- Beveled edges
- Glow in the dark
- Recessed adhesive
- Durable
- Easy to clean
- Smooth top surface
- No paint, No down time
- Long lifespan
- Etc.
