

FLIP

Ground level protection

FLIP

Ground level protection

Our latest product FLIP™ offers full ground level protection up to ankle height.

FLIP™, available in different lengths, covers all angles thanks to its flexible and modular design with connection pieces. The innovative and robust I-shaped rail and thick-walled connection pieces absorb impacts up to 3000 Joules on both rails and posts. FLIP™ is quick and easy to install and can be combined with other Boplan traffic barrier systems for maximum safety.

APPLICATIONS / TYPICAL ENVIRONMENTS

- ▶ Can be combined with other Boplan traffic barrier systems (eg: TB400 / TB400 Plus / HP Plus ...)
- ▶ Wheelguide for pallet trucks or trolleys in busy traffic lanes
- ▶ Absorb impacts low to the floor
- ▶ Protection of sensitive walls (refrigerator walls / decorative walls / sandwich panels)
- ▶ Protection of machines and infrastructure
- ▶ Cost-efficient rack end
- ▶ Indoor and outdoor (-10°C +40°C)
- ▶ Food approved (compliant to food contact regulation)

▲ Highly visible wall protection

▲ Any corner configuration possible

▲ Create safety zone around machines

◀ Seamless protection along factory wall

◀ Protection of sandwich panel walls
