Astralux 3000

roller blind systems

The Astralux 3000 roller blind system provides an extremely wide range of blind options for virtually any type of vertical glazing. As with all Astralux products the systems are designed for use in commercial, education, healthcare and leisure environments providing ease of operation, low maintenance and durability.

DESCRIPTION

These roller blind systems consist of an aluminium or steel barrel onto which the specified fabric is securely fastened. A range of headboxes, fascias, side channels, bottom bar options and operating methods are available as standard.

Astralux 3000

roller blind systems

The Astralux 3000 roller blind system is available in an extensive range of flame retardant fabrics including:

- Anti-microbial
- Black-out
- Dim-out
- Glare control
- Energy saving
- Heat reflective
- Metallised
- Screen

CONTROL OPTIONS

- Spring operation with slow rise so blind retracts at a constant speed
- Side chain where blind is raised or lowered by a continuous chain located on one side of the blind
- Gearbox operation with fixed or removable handle to prevent unauthorised use
- Motorised - hard wired, radio controlled and BMS systems

PRODUCT OPTIONS

- Powder coated hardware to match glazing frames or decor
- Side guide wires to prevent excessive movement of the blind
- Fascia and cassette systems to conceal roller barrel for a neater appearance
- Side channels to guide the blind and permit natural ventilation
- Shaped blinds
- Linked operation so one operating mechanism controls a number of blinds
- Pre-set stop position to ensure all blinds line up for elevational consistency
- Screen printing on fabrics

Side guide wires

Headbox cassette to conceal roller

Chain tension device

CHILD SAFETY

- All Astralux products operated by cords or chains will be supplied with BS EN 13120:2009+A1:2014 compliant safety devices where required
- There are also inherently child safe operating options available with all Astralux products
