Filler/Smoother

EASY FINISH

SUPER FINE SMOOTH FILLER

SUPER FINE SMOOTH FILLER

- For filling and finishing plasterboard joints
- Smoothing unwanted textured surfaces
- Repairing surface defects
- Super fine for a smooth finish
- Dries hard for a durable finish
- Easily sanded
- Minimal shrinkage
- Fast setting for early sanding

Surface Preparation
All surfaces must be clean, sound and dry prior to application, any loose or flaky material must be removed. Porous surfaces must be sealed using an appropriate sealer.

Mixing
Always use clean water, bucket and tools. The suggested mixing ratio for Easy Finish is 1 part water to 1.75 parts powder. Alternatively pour 4.5 litres of water per 7.5kg. Add Easy Finish to water and stir continuously until free from lumps. Allow to stand for 5 minutes and then mix again before use.

Application
Tapers and Jointers (hand application only)
Easy Finish is applied to the trough of the tapered edge joints. Centre the jointing tape over the joint and press down with a jointing knife, using sufficient pressure to free any trapped air bubbles. Leave enough Easy Finish under the tape to ensure good adhesion. Immediately after the tape has been fixed, apply a new layer of Easy Finish over the tape flush with the surface of the plasterboard, before the product begins to stiffen. After approximately 120 minutes, a finishing application should be applied to obtain complete elimination of tape edges. A moistened slurry sponge should be used to wipe away any surplus material from the edges of the joint, leaving a smooth finish.

Decorators and Builders
Use a caulker or a filler knife with Easy Finish to smooth over desired areas. Deeper indentations may need two applications. The product remains workable for 60 minutes. Sand to a smooth surface when dry.

Smoothing Unwanted Textures
Step 1
Apply sufficient mixed Easy Finish to cover the surface using a caulker or plasterers trowel. Do not apply to an area greater than $1m^2$ at a time and repeat this process until the ceiling/wall is completed.

Step 2
Return to the original area covered within 20-30 minutes to complete finishing by splashing the area using a wet paint brush and smoothing over using a caulker or plasterers trowel to achieve a smooth, flat finish.

Step 3
In most applications one coat of Easy Finish is sufficient, however where a second coat is required it should be applied immediately, using the same process, once the first coat is firm to touch.

Coverage
Approx. 100-120 linear metres per 15kg or 50-60 linear metres per 7.5kg of tapered edge plasterboard jointing.

Storage
The product must be stored in temperatures above 5°C and not exceeding 30°C, in a dry place.

Shelf Life
6 months in original unopened bags if stored in the conditions listed above.

Notes
Do not use in temperatures less than 3°C. Temperatures must also be above 3°C during drying time.
Clean any accidental splashes from floors etc. with warm water before drying.

Health & Safety
Please ensure that appropriate PPE is used when preparing, mixing and applying products. Always wash hands before consuming food and make sure that materials are kept safely out of reach of children and animals. Please dispose of packaging and waste responsibly and in accordance with local authority requirements. A full Safety Data Sheet relating to this product is available from www.brewers.co.uk.

Quality Assurance
All products are manufactured in a plant whose quality management system is certified/registered as being in conformity with BS EN ISO 9001, ISO 14001 and OHSAS 18001. Our products are guaranteed against defective materials and manufacture and will be replaced or money refunded if the goods do not comply with our promotional literature. We cannot however accept responsibility arising from the application or use of our products because we have no direct or continuous control over where and how our projects are used. All products are sold subject to our conditions of sales, copies of which may be obtained upon request.
