## *Solid/Glazed System 75/100Ls*

The components are designed as accessories for a demountable, non-load-bearing, lightweight, performance office partitioning system. The partition thickness of the system is based on nominal 75mm and 100mm, with all extruded aluminium profiles available polyester powder coated to a range of colours
(some profiles ex-stock in RAL9010, 9005 and 7016).

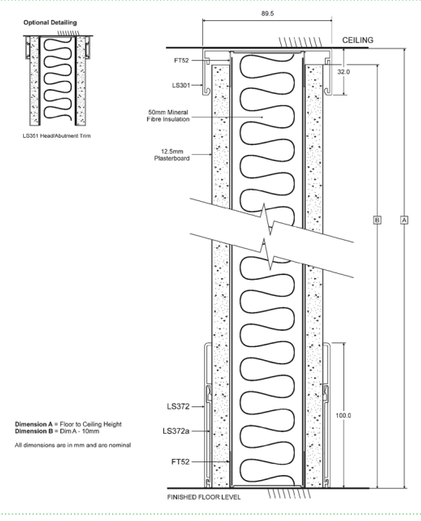

System Ls75/100 is based upon a nominal 1200mm module and is constructed with a framework of 50mm wide galvanised stud faced with a single layer of 12.5mm plasterboard each side or on both sides with 2 layers of 12.5mm plasterboard. The cavity within the system can be used to incorporate insulation material to enhance the acoustic performance. The components available permit construction of the system to provide fire performance to 30 minutes.

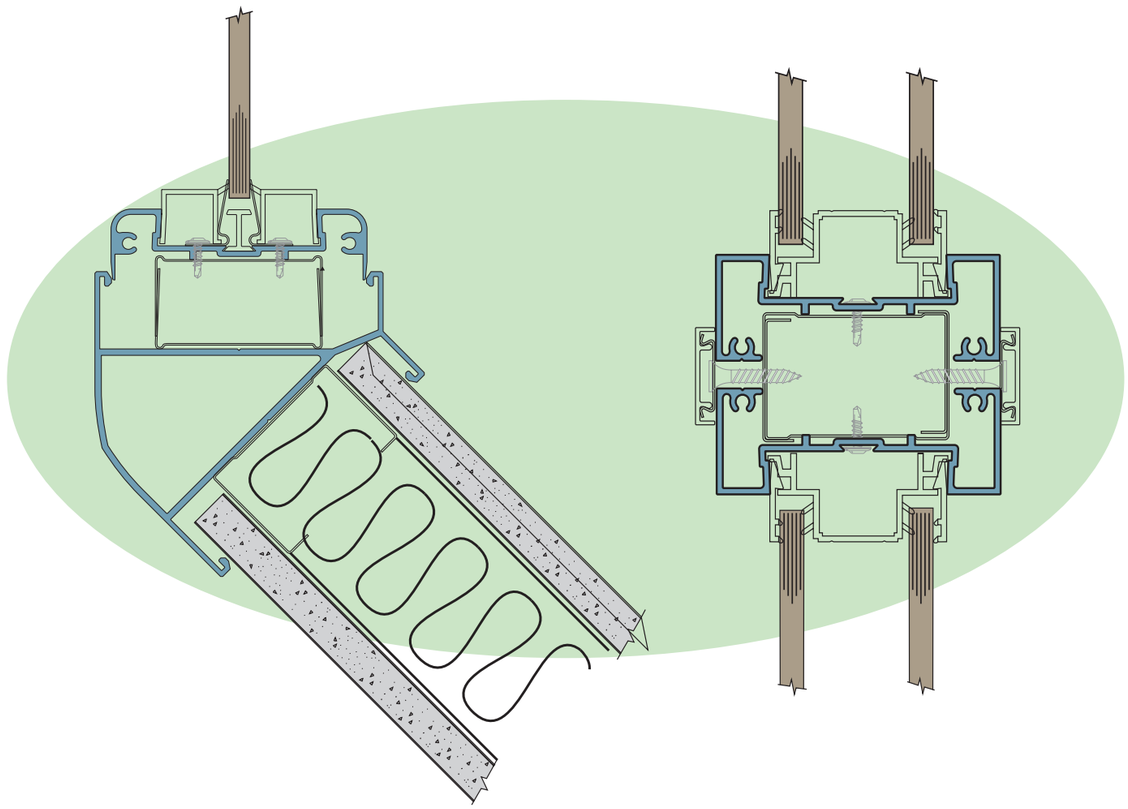

***Aluminium Partition System***

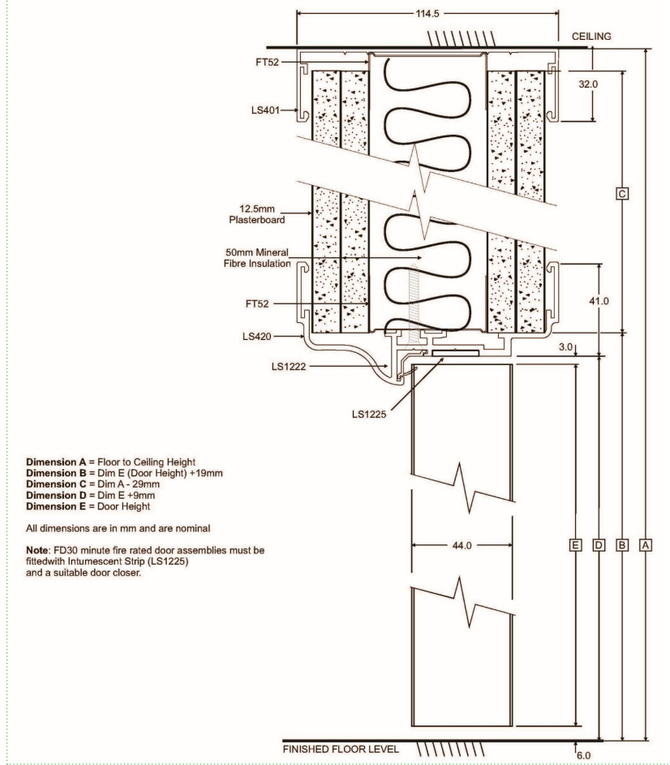

75MM SOLID MODULE: ELEVATION

100MM DOOR MODULE - SOLID ABOVE ELEVATION

**Dimension A** = Floor to Ceiling Height
**Dimension B** = Dim E (Door Height) +19mm
**Dimension C** = Dim A - 29mm
**Dimension D** = Dim E +9mm
**Dimension E** = Door Height

All dimensions are in mm and are nominal

**Note**: FD30 minute fire rated door assemblies must be fittedwith Intumescent Strip (LS1225) and a suitable door closer.
