Monobloc
shown with optional
6970 BPFS
bowl/pot filler

6773 PRDL
double inlet pedestal

Special Features

- ▲ FOR PROFESSIONAL OR COMMERCIAL CATERING USE
- ▲ DURABLE AND ROBUST DESIGN
- ▲ EASY LEVER OPERATION
- ▲ FLEXIBLE HOSE
- ▲ HIGH POLISH CHROME FINISH

Description

The pre-rinse spray units are designed for professional and commercial catering where robust design and durability are paramount. Designed for "pre-cleaning" of all kinds of equipment, the pre-rinse spray is available in three options: a single inlet/single supply, monobloc and double inlet pedestal. All options feature an easy grip lever control of the water flow. The spray gun has an insulated handle and flexible hose with spring protector. A gun hook is provided for safe stowage of the gun when not in use. The unit is supplied with a wall bracket to provide a sturdy installation.

The unit may be provided with an optional bowl/pot filler which is fitted in the riser tube. The filler, where supplied (see options below) has a 300 mm swivel spout and is operated using its own separate lever control. This option is illustrated (left) on model 6772PRDML.

Construction

The spray features high quality and robust parts manufactured from brass with a chrome plate finish.

Options

- ▲ -6970BPFS bowl/pot filler with 300 mm spout.

Dimensions

Dimensions are "typical": they may vary according to installation
 Typical overall height from deck mounting: 975 mm
 Overall length of hose from top of riser pipe to gun grip: 1110 mm
 Projection from riser pipe to gun when not hooked up: 375 mm
 Height of gun above deck mounting when not hooked up: 225 mm
