Celutex™

Celutex™ is the original, lightweight, shiplap embossed PVC-UE building cladding board that provides a stylish and effective means to protect and decorate the exterior of luxury holiday homes, caravans and buildings - without the need for continual and costly maintenance and decoration.

It successfully imitates timber with authentic wood grain look-a-like features and can be installed using traditional wood installation skills, practices and tools.

Celutex™ is completely unaffected by damp, rot, decay, frost and is resistant to attack from insects.

Celutex™ is manufactured using Celuform's PVC-UE stabilisers guaranteed to give the best colour resistance. With the option of White, Sand, Cream, Light Grey, Light Blue shades, there is a comprehensive range of corners, edges and joint trims to ensure a smart finished look and the ability to buy a complete system from one supplier.

Patented Process

Celutex™ features and benefits

For use on all building types including Domestic, Commercial and Industrial - new build or refurbishment

Completely unaffected by damp, rot, decay, frost and insect attack and maintenance free

Lower thermal conductivity than timber, concrete, mineral fibre boards or brick (0.06 W/mK)

Can be installed using traditional wood installation skills, practices and tools

Incorporates all the features and benefits of Celuform Shiplap cladding and enhanced with the Celutex™ wood grain effect

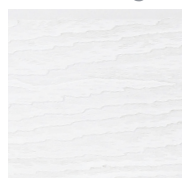

Up to five shades to enhance any installation

Unique wood grain effect brings all the benefits of timber with none of the maintenance drawbacks

Profiles, accessories and fixings adaptable to almost any configuration, colour matched for visual integrity

Available in single (150mm) and double (300mm) plank format for rapid installation.
