

Stone finishes

Eurobrick can source both natural and manufactured stone products, with slips cut to order. Stone slips can be used for entire projects or to add architectural features such as quoins and feature bands.

Our panel systems can be adapted to accommodate stone slips in three standard course heights. For full details, please refer to our Stone Installation Instructions. Alternatively, stone finishes can also be fixed directly to flat substrates.

If you are unsure which method suits your project, our sales team is happy to help — just get in touch.

Manufactured stone

Stone slips and corners can be cut from reconstituted stone blocks, available in a range of colours and finishes.

Eurobrick supplied this self-build project with buff stone slips and corners.

Natural stone

Natural stone slips and corners can be specially cut to meet your project requirements.

Eurobrick supplied this McDonald's restaurant in Dunbar with specially-cut St Bees Rubbed stone slips.

Lead times

All stone slips and corners are cut or manufactured to order, so lead times can vary depending on the product and quantity. Please contact us to confirm timings when planning schedules and placing your order. Please see our Terms and Conditions for more details.
