

Hanger Shims

For packing out between irregular wall surfaces and battens, frames and wallboard, hangers can be easily located over a screw shaft.

Retainer lugs prevent detachment before the screw is tightened and allow the shims to hang vertically or horizontally. They can be stacked together in any combination, and are suitable for both interior and exterior use.

Hanger shims come in standard thicknesses of 1 to 5mm and like Stadon's standard packers, they are colour coded for easy identification.

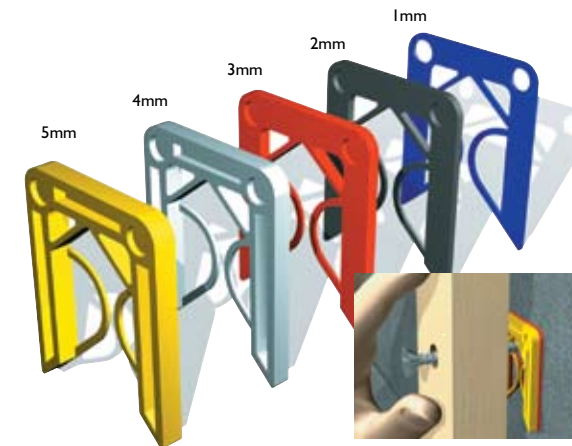

General features:

- Colour coded sizes
- Quick and easy to apply
- Excellent load performance
- Will not split when nailed
- Will not rot, corrode or shrink
- Moisture resistant
- Good soundproofing
- Cost-effective and convenient

Packers (Shims)

These flexible packers are suitable for many and various uses.

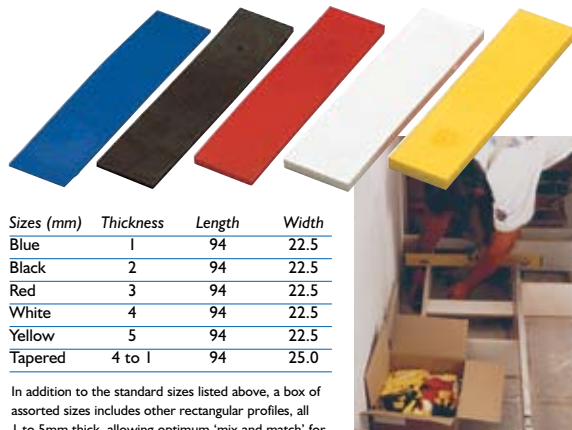

Indispensable on the job-site for shimming, levelling and spacing, they are non-abrasive and colour coded for size.

Sizes (mm)	Thickness	Length	Width
Blue	1	54	46
Black	2	54	46
Red	3	54	46
White	4	54	46
Yellow	5	54	46

Hangers also feature:

- Flexible retainer lugs to allow engagement over a screw and then resist disengagement whilst the screw is tightened.
- Centering recesses for hanging vertically or horizontally.
- Convenient registration locators so they can be 'stacked' together.

Sizes (mm)	Thickness	Length	Width
Blue	1	94	22.5
Black	2	94	22.5
Red	3	94	22.5
White	4	94	22.5
Yellow	5	94	22.5
Tapered	4 to 1	94	25.0

In addition to the standard sizes listed above, a box of assorted sizes includes other rectangular profiles, all 1 to 5mm thick, allowing optimum 'mix and match' for the fitter.
