

Gaia Touch Thermostat

The Gaia Touch Thermostat is a programmable touch screen thermostat, designed to be used with wet and electrical underfloor heating.

It allows you to set six events per day with corresponding pre-set temperatures in blocks of 5/2, 6/1, or 7/0 day programming. With a choice of either 'manual' or 'period control' mode.

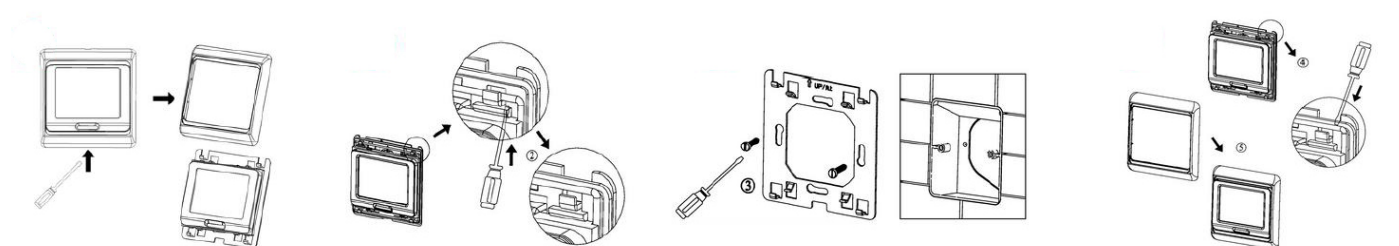

The thermostat comes with energy saving functions such as sensor setup and frost protection mode, to help reduce heating costs.

Benefits

- Touch screen operation
- Six event programming
- Screen lock
- Sensor setup
- Frost protection mode
- 2-year warranty

Type	Value
Supply voltage	230V
Power consumption	2W
Max. current	16A
Housing material	Anti-inflammatory PC
Ambient temperature	-5 – 50°C
IP class	IP20

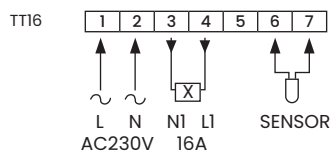

1. Release the front cover by inserting a screwdriver into bottom crack

2. Take the backing plate apart as shown above

3. Install the thermostat into the electrical connection box with screws

4. Install the housing cover and lock the external frame

The thermostat must be installed by a fully qualified electrician and all wiring must meet most recent wiring regulations.

The thermostat must be installed within a 47mm single-gang back box.
