How To Apply GoRend HBS

1 First pass

Mix GoRend HBS with clean water and apply to new blockwork in two passes, (wet on wet).

2 Embed ProMesh

Embed ProMesh into the first pass and all stress points. Use full mesh coverage on lightweight block.

3 Second pass

Apply second pass of GoRend immediately after embedding mesh, rule off to smooth surface.

4 Scrape back

Once cured (5–36 hrs depending on conditions), scrape back using a nail float, brush off loose scrapings, and leave to fully cure.

Need help? Call our technical team on 01647 24620.

GOMESH

GoMesh is an alkali-resistant fibreglass mesh designed to reinforce render and prevent cracking. Use with GoRend HBS for enhanced strength and long-term durability.

PROBEAD

ProBead is a premium, 100% recycled PVCu render bead – durable, clean-edged, and built to last. Available in 18 colours and 34 profiles, it is made to match GoRend and ProRend systems. With a 25-year guarantee, ProBead ensures perfect edges every time.

GOREND HBS

PREMIER RENDER SYSTEMS

With over 35 years of hands-on experience in the rendering and plastering industry, SAS is your trusted partner. Our expertise ranges from practical material application to on-site technical troubleshooting. We are committed to improving our service and providing timely, top-notch information.

Driven by innovation, we develop cutting-edge products tailored to meet the needs of the market. Our product portfolio boasts premium quality offerings that ensure durability for property owners and swift, technically sound application for contractors.
