

Hoarding Service

PCD05

We supply and install both **Timber and Steel Hoardings**, plus gates for pedestrian and vehicular access, vision panels, lighting and access controls. The timber hoarding is normally made of plywood from FSC accredited sources, or 'Smart Ply Plus' which is supplied with a pre-applied protective undercoat.

Steel Hoardings vs. Timber Hoardings

If the usage is for a long time or an intention to reuse the hoarding, steel hoarding is often the better option. They can be supplied on demountable posts, pre-finished in a specific colour, and with PPC over galvanised finish.

Applications

Construction Steel
Airports
Industrial Units
Retail

Product Data

- Procter site hoarding service takes care of the main contractor's responsibility for securing the site.
