

Technical specification

Double Conic

The double conic canopy is an aesthetically pleasing structure that can be utilised for a number of applications.

Dimensions

This structure is available in two sizes: 8m x 6m and 10m x 8m. Both have an eave height of 2.7 metres.

Frame

The steel frame can have a low maintenance hot dip galvanised finish or a polyester powder coated finish. Available in a range of colours. Resin bolted to foundations. The frame is guaranteed for 25 years.

Foundations

Typical foundation size: 1500mm x 1500mm x 1000mm C35. Set 300mm below finished floor level. Dependent on ground conditions and location. This canopy has base plates resin bolted to foundations.

Cladding

The structure is clad in a pvc tensile fabric. Comes in three grades: 502, 702 and 1002 used depending on size. All are guaranteed for 10 years.

Optional extras

Fordingbridge can supply and install padded covers for canopy posts, available in a range of colours to cover various post widths and heights.

Tensile Fabric

A cost-effective fabric for creating large covered spaces
